It covers besides the colorful historical perspective within the utilization of carbohydrates and their derivatives all modern aspects on their properties nomenclature uses and natural occurrence as such or as residues in a variety of biologically active molecules. Special emphasis is paid to various conversion techniques for producing value added chemicals biofuels and other products from carbohydrate rich renewable resources. This book can be primarily used as an advanced textbook for a wide range of readers in many disciplines not only students and teachers but also everyone who works in the laboratory as a researcher or in production and planning or who generally needs relevant knowledge of carbohydrates. Green Chemistry for Surface Coatings, Inks and Adhesives Rainer Höfer, Avtar Singh Matharu, Zhanrong Zhang, 2019-06-06 Many modern surface coatings and adhesives are derived from fossil feedstocks. With fossil fuels becoming more polluting and expensive to extract as supplies dwindle industry is turning increasingly to nature mimicking natural solutions using renewable raw materials and employing new technologies. Highlighting sustainable technologies and applications of renewable raw materials within the framework of green and sustainable chemistry circular economy and resource efficiency this book provides a cradle to cradle perspective. From potential feedstocks to recycling reuse opportunities and the de manufacture of adhesives and solvents green chemistry principles are applied to all aspects of surface coating printing adhesive and sealant manufacture. This book is ideal for students researchers and industrialists working in green sustainable chemistry industrial coatings adhesives inks and printing technologies.
