N. Dwivedi,R. Mahajan,2013-12-19 The complete shop floor automation a lights out factory where workers initially set up all machines turn off the lights lock the door and the machine churns up the parts remains an unfulfilled dream Yet when we look at the enormity of the process of automation and

integration even for the most simply conceived part factory we can recognize that automation has been applied and is being applied more so when it made sense from a cost benefit standpoint It is our nature to be dissatisfied with near term progress but when we realize how short a time the tools to do that automation have been available the progress is clearly noteworthy considering the multitudes of factors and the environment we have to deal with Most of the automation problems we confront in today's environment are multidisciplinary in nature They require not just the knowledge and experience in various distinct fields but good cooperation from different disciplined organizations to adequately comprehend and solve such problems In Volume III we have many examples that reflect the current state of the art techniques of robotics and plant automation The papers for Volume III have been arranged in a logical order of automation planning automated assembly robot programming and simulation control motion coordination communication and networking to factories of the future
