Prison Reform And State Elites:

Prison Reform and State Elites Richard A. Berk, Peter Henry Rossi, 1977 **Gender, Ethnicity, and the State** Juanita Díaz-Cotto, 1996-01-01 Examines the experiences of Latina and Latino prisoners in New York maximum security prisons offering a realistic interpretation of the relationship that exists between prisoners the state and the civil society within which prisons operate *The Culture of Control* David Garland, 2024-05-31 The past 30 years have seen vast changes in our attitudes toward crime More and more of us live in gated communities prison populations have skyrocketed and issues such as racial profiling community policing and zero tolerance policies dominate the headlines How is it that our response to crime and our sense of criminal justice has come to be so dramatically reconfigured David Garland charts the changes in crime and criminal justice in America and Britain over the past twenty five years showing how they have been shaped by two underlying social forces the distinctive social organization of late modernity and the neoconservative politics that came to dominate the United States and the United Kingdom in the 1980s Garland explains how the new policies of crime and punishment welfare and security and the changing class race and gender relations that underpin them are linked to the fundamental problems of governing contemporary societies as states corporations and private citizens grapple with a volatile economy and a culture that combines expanded personal freedom with relaxed social controls It is the risky unfixed character of modern life that underlies our accelerating concern with control and crime control in particular It is not just crime that has changed society has changed as well and this transformation has reshaped criminological thought public policy and the cultural meaning of crime and criminals David Garland s *The Culture of Control* offers a brilliant guide to this process and its still reverberating consequences *The American Prison* Lynne Goodstein, Doris L. MacKenzie, 2013-03-08 Despite the dire forecasts of others who had themselves edited books we proceeded with the project of an edited volume on the American prison although with more than a little trepidation We had heard the horror stories of authors turning in their chapters months or years late or never at all of publishers delaying publication dates of volumes that read more like patchwork quilts than finely loomed cloth As if to prove the others wrong our experience in editing this volume has been marvelous and we think the volume reflects this Most likely the success of our experience and of the volume stems from two elements first the professionalism and commitment of the authors themselves and second the fact that early in the life of this volume most of the authors convened for a conference to critique and coordinate the chapters This book brings together an illustrious group of criminologists and correctional scholars who wrote chapters explicitly for this volume Co hesiveness was furthered by the charge we gave to each author to 1 present the major issues 2 review the empirical research and 3 discuss the implications of this work for present and future correctional policy The goal of this project was to examine the major correctional issues facing prison systems The chapters scrutinize the issues from the perspective of the system and the individual from theory to practical and daily management problems from legal to psychological concerns Prison reform

and state elites Richard Berck,1977 **Reaffirming Rehabilitation** Francis T. Cullen,Karen E. Gilbert,2013 Reaffirming Rehabilitation 2nd Edition brings fresh insights to one of the core works of criminal justice literature This groundbreaking work analyzes the rehabilitative ideal within the American correctional system and discusses its relationship to and conflict with political ideologies Many researchers and policymakers rejected the value of rehabilitation after Robert Martinson s proclamation that nothing works Cullen and Gilbert s book helped stem the tide of negativism that engulfed the U S correctional system in the years that followed the popularization of the nothing works doctrine Now Cullen traces the social impact on U S corrections policy This new edition is appropriate as a textbook in corrections courses and as recommended reading in related courses It also serves as a resource for researchers and policymakers working in the field of corrections

Political Elites Robert Goehlert,1985 Crime And Capitalism David Greenberg,2010-06-10 Classic and contemporary viewpoints on crime *Drug Abuse Treatment in Prisons and Jails* Carl G. Leukefeld, Frank M. Tims, National Institute on Drug Abuse,1992 This monograph is based on the papers and discussions from a technical review on Drug Abuse Treatment in Prisons and Jails held on May 24 25 1990 in Rockville MD The review meeting was sponsored by the National Institute on Drug Abuse Title page verso **Surveying Cultures** David R. Heise,2010-03-02 Surveying Cultures uniquely employs techniques rooted in survey methodology to discover cultural patterns in social science research Examining both classical and emerging methods that are used to survey and assess differing norms among populations the book successfully breaks new ground in the field introducing a theory of measurement for ethnographic studies that employs the consensus as culture model The book begins with a basic overview of cross cultural measurement of sentiments and presents innovative and sophisticated analyses of measurement issues and of homogeneity among respondents Subsequent chapters explore topics that are at the core of successful data collection and analysis in culture studies including The role of bipolar scales and Internet data collection in measuring sentiments Key methodological variables that determine the quality of quantitative data including measurement errors validity and reliability New approaches to reliability and several new methods of assessing a respondent s degree of inculcation into group culture Sampling coverage nonresponse and measurement errors with an in depth discussion of their occurrence in culture surveys their impact assessments and how current measurement techniques are constructed to help prevent these kinds of errors Common problems often encountered in the acquisition and communication of data including identifying error variances interpreting gender differences in responses and defining the difference between cultures and subcultures Throughout the book each topic is accompanied by a review of related methodological literature For many of the presented concepts the author includes a formal analysis of the related issues in measuring cultural norms and reports on analyses Each chapter concludes with an organized list of major findings as well as an insightful outline of specific recommendations regarding practical problems in culture studies Surveying Cultures serves as a valuable supplemental book to courses on survey and research methods at the upper undergraduate and graduate levels

It is also an excellent reference for researchers in the fields of sociology anthropology psychology and political science

Governing Prisons John J. DiIulio,1990-06 Challenging the accepted notions about prisons Dilulio argues that far from being traps for society s refuse they must and can be made safely humane He shows that the key to better prisons is a highly disciplined constitutional government employing prison managers who are strong enough to control the inmates yet obliged to control themselves The book illustrates how the use of such a governing system can provide order encourage civilized behaviour and enforce punishment that is just as well as merciful

Money, Work, and Crime Peter H. Rossi,Richard A. Berk,Kenneth J. Lenihan,2013-09-03 Money Work and Crime Experimental Evidence presents the complete details of the Department of Labor s 3 4 million Transitional Aid Research Project TARP a large scale field experiment which attempted to reduce recidivism on the part of ex felons Beginning in January 1976 some prisoners released from state institutions in Texas and Georgia were offered financial aid for periods of up to six months post release Payments were made in the form of Unemployment Insurance benefits The ex prisoners who were eligible for payments were compared with control groups released at the same time from the same institutions The control groups were not eligible for benefits The assumption that modest levels of financial help would ease the transition from prison life to civilian life was partially supported Ex prisoners who received financial aid under TARP had lower rearrest rates than their counterparts who did not receive benefits and worked comparable periods of time Those receiving financial aid were also able to obtain better paying jobs than the controls However ex prisoners receiving benefits took longer to find jobs than those who did not receive benefits The TARP experiment makes a strong contribution both to an important policy area the reduction of crime through reducing recidivism and to the further development of the field and experiment as a policy research instrument

Just Punishments Peter Henry Rossi,Richard Alan Berk, The sentencing guidelines written by the U S Sentencing Commission for the federal crime courts were designed to lead to uniform the just punishments for convicted criminals How well did the Commission s judgments about what were just punishments compare to the view of the American public Using data from a 1994 national household survey the authors compare the punishments described by the Commission to those desired by the public Contrary to the frequency claims of excessive leniency on the part of judges that are often asserted by journalists and shapers of opinions Rossi and Berk find strong correspondence between the median sentences deemed appropriate by the public and the sentences prescribed by the guidelines Although the authors conclude that the Commission was able to match prescribed punishments closely to the American consensus for most crimes in one category drug trafficking offenses the guidelines were much harsher in dealing with offenders The national survey used a factorial survey as its design strategy allowing for analysis of a large variety of federal crimes and variations in the social characteristics of convicted felons A wealth of detail along with ample graphic and tabular illustrations extends the book s application to issues of consensus and variations in

 Hesselton,2007 This dissertation examines Minnesota s Stillwater prison between 1960 and 2000 focusing specifically on the
 violence and disorder that plagued the prison in the early 1970s A framing approach is adopted to understand the factors
 that gave rise to the disorder as well as the reforms that restored order in the late 1970s and beyond In an effort to
 contextualize these trends the research also explores why Minnesota responded to prison disorder in unexpected ways and
 why the state ultimately abandoned these reforms in favor of the more punitive reforms adopted elsewhere **NIDA**
Research Monograph ,1976 **Federal Probation** ,1994 **The Future of Imprisonment** Michael Tonry,2004-04-08
 The imprisonment rate in America has grown by a factor of five since 1972 In that time punishment policies have toughened
 compassion for prisoners has diminished and prisons have gotten worse a stark contrast to the origins of the prison 200
 years ago as a humanitarian reform a substitute for capital and corporal punishment and banishment So what went wrong
 How can prisons be made simultaneously more effective and more humane Who should be sent there in the first place What
 should happen to them while they are inside When how and under what conditions should they be released The Future of
 Imprisonment unites some of the leading prisons and penal policy scholars of our time to address these fundamental
 questions Inspired by the work of Norval Morris the contributors look back to the past twenty five years of penal policy in an
 effort to look forward to the prison s twenty first century future Their essays examine the effects of current high levels of
 imprisonment on urban neighborhoods and the people who live in them They reveal how current policies came to be as they
 are and explain the theories of punishment that guide imprisonment decisions Finally the contributors argue for the strategic
 importance of controls on punishment including imprisonment as a limit on government power chart the rise and fall of
 efforts to improve conditions inside analyze the theory and practice of prison release and evaluate the tricky science of
 predicting and preventing recidivism A definitive guide to imprisonment policies for the future this volume convincingly
 demonstrates how we can prevent crime more effectively at lower economic and human cost *Correctional Ethics* John
 Kleinig,2017-07-05 *Correctional Ethics* gathers the most prominent contributions to this burgeoning field ranging from the
 philosophy of punishment through to ethical appraisals of incarceration the professional responsibilities of prison personnel
 and formative work in restorative justice In addition it provides an annotated research agenda to help shape the development
 of a comprehensive correctional ethic For those working in correctional ethics this collection provides an essential resource
