Private Health Providers In Developing Countries Serving The Public Interest:

The World Health Report 2000 World Health Organization, 2000 Includes table of health system attainment and performance in all member states 191 ranked by eight measures *Are Incentives Everything?* Varun Gauri, 2001

Private Health Providers in Developing Countries Sara Bennett, Barbara McPake, Anne Mills, 1997-06-01 New ideas on the role of the state in developing countries have considerable implications for the social sectors especially health Certain international organizations have advocated a larger role for private sector health care providers and many developing country governments have adopted this approach Yet until now very little evidence has existed about how shifting the balance between public and private roles might affect equity and the quality and efficiency of health care This book presents the results from a coordinated programme of research on the private health care sector including studies carried out by Asian African and Latin American researchers The conceptual chapters draw upon both industrialized and developing country literature to describe the intellectual terrain analyse the key issues and summarize experience to date This book will help increase understanding of the private sector as well as illustrating the contentious issues involved in privatization It will be useful to students and academics involved in international public health courses and to health policy makers in developing countries

Private Participation in Health Services April Harding, Alexander S. Preker, 2003 Although many countries already make use of private sector services to achieve policy objectives in public health care provision it remains a controversial topic Drawing on a wide range of country experiences this book considers the use of the private sector in the provision of public health services in developing countries in terms of assessing the potential for private sector involvement contracting with the private sector for health services regulating the sector and what to do when key information is not available *Le financement de la santé dans les pays d'Afrique et d'Asie à faible revenu*, 2003-01-01 Les conceptions et les politiques en matière de financement de la santé dans les pays à faible revenu s'articulent autour de paradigmes successivement dominants dans les approches des gouvernements et de leurs partenaires extérieurs la gratuité des soins de base et la santé pour tous dans la lignée de la conférence d'Alma Ata tout d'abord la contribution financière des usagers recouvrement des coûts partir de la seconde moitié des années quatre vingt Plus récemment l'accent a été mis sur le développement de mécanismes assuranciers tout en approfondissant et en reconsidérant la réflexion sur la gratuité des soins et sur la participation financière des populations Dans cette perspective cet ouvrage a voulu confronter des travaux théoriques et appliqués sur une sélection de grandes questions soulevées par le financement de la santé Il analyse des expériences et des politiques conduites en ces domaines dans plusieurs pays d'Afrique et d'Asie à faible revenu Le livre est structuré autour de trois parties La première porte sur les déterminants de l'accès aux soins sur l'équité et la protection des plus pauvres questions principalement abordées sous l'angle des effets de la contribution financière des usagers La seconde traite des approches plurielles qui se développent en matière de mécanismes d'assurance notamment dans le secteur informel La troisième s'interroge sur les relations entre le

financement et la régulation des systèmes de santé en considérant différentes problématiques qui mettent en relief l'importance des institutions et plus globalement des choix publics rejoignant ainsi des orientations majeures de la réflexion économique contemporaine

Social Policy for Development Anthony L Hall, James Midgley, 2004-03-31 Strong social policy is essential for sustainable growth This book is an extremely useful overview of social policy issue for policy makers and anyone who wants to understand the true roots of successful sustainable development Ian Johnson Vice President for Sustainable Development The World Bank Throughout the world issues of social development have now taken centre stage There is no more comprehensive and readable guide to the choices and conflicts of this global drama This book is essential reading for all students and practitioners of social development and for every World Bank economist David Piachaud Professor of Social Policy London School of Economics This much needed textbook fulfils a major gap in providing a complete up to date guide and introduction to the increasingly important role of social policy in the context of development processes and practice Across a number of key sectors and areas of social policy concern the authors accessibly introduce and explain the main conceptual debates the most recent policy discussions and provide applied examples to illustrate the latest developments in the social policy and planning field Central topics covered include poverty rural development urban development education health social work social welfare international development and cooperation Social Policy for Development is an essential text for all students and practitioners alike seeking a deeper understanding of the issues of poverty social exclusion and deprivation across social policy and development studies internationally

Third World Health Theodore MacDonald, 2018-12-14 Great and increasing inequities exist between the peoples of the Third World and those of the First As well we find ourselves threatened by imminent environmental catastrophes largely as a result of trying to maintain such inequities This clear and straightforward text explains the complex origins of such bodies as the International Monetary Fund the World Bank and others and demonstrates the extent to which they exacerbate the problem The situation is now so grave that we can no longer afford the luxury of leaving it to the professionals We are all involved We find ourselves hearing daily news reports of wars starvation the HIV AIDS pandemic and natural disasters rendered worse by inadequate international responses The United Nations once seen as an effective arbiter and mediator in such matters now finds itself unable to exercise authority adequately Third World Health hostage to First World Wealth adopts a positive approach and puts forward various ways in which people at all levels can become more involved It addresses the pivotal issue of health in the Third World and argues that it is very much hostage to the globalization of trade by and for the benefit of First World agencies

Private sector landscape in mixed health systems David Terence Clarke, 2020-07-20 In 2019 the World Health Organization set up an advisory group on the Governance of the Private Sector for Universal Health Coverage The group was formed with the primary goal of providing advice and recommendations on the regulation and engagement of the private sector in the context of WHO GPW goal of 1 billion more people benefiting from Universal Health Coverage and in particular

outcome 1 1 4 Countries enabled to ensure effective health governance In late 2020 the advisory group finished a new strategy designed to help WHO facilitate a new way of governing mixed health systems by building consensus around the means and strategies of engaging the private health sector in health care service delivery This new strategy focuses on the governance of the whole health system both private and public to ensure that all people have access to quality health care without suffering financial hardship irrespective of where they seek care The eight studies in this volume were commissioned by WHO to help the advisory group to complete its work on the new strategy Each of these studies also contributes valuable information to broader discussions about the role of the private sector in health care and the growing momentum to using cross sector partnerships to achieve the health related SDGs *Understanding Health Services* Nick Black, Reinhold Gruen, 2005-08-01 No single discipline can provide a full account of how and why health care is the way it is This book provides you with a series of conceptual frameworks which help to unravel the apparent complexity that confronts the inexperienced observer It demonstrates the need for contributions from medicine sociology economics history and epidemiology **Health Care in Malaysia** Heng Leng Chee, Simon Barraclough, 2007-03-06 The health care system in Malaysia has undergone a fundamental transformation over the last two decades This book examines this transformation and explores the pressing issues it faces today It includes coverage of the evolution of the system since independence from the colonial legacy of national provision bequeathed from the British to the impact of the global ideological shift against statism in the 1980s considers the responses of the Malaysian state and government policy issues such as equity of provision women s access to health care HIV AIDS health care care for the elderly The book offers a detailed examination of the changing face of health care in Malaysia and its impact on Malaysian citizens users and society *Health Economics* Barbara McPake, Charles Normand, Samantha Smith, Anne Nolan, 2013-06-07 This third edition of Barbara McPake and Charles Normand s textbook confirms it as providing the only properly international treatment of health economics on the market A key tenet of the book is its analysis of comparative health systems across borders and the text has been updated and revised to take account of changes in a host of countries Barack Obama s reforms in the United States are considered alongside the provision of healthcare in China providing a unique overview of these different approaches The introduction of performance related payment in various forms is appraised with the experience of developing countries such as Cambodia Rwanda and Uganda important in this regard An overview of the range of mathematical techniques available to perform economic evaluation in healthcare is also introduced although the text avoids becoming too technical In all the text builds on the success of the first edition and provides the perfect introduction to the fast changing world of health economics **Disease Control Priorities in Developing Countries** Dean T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove, 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions this second edition of *Disease Control Priorities in Developing Countries* 2nd edition highlights

achievable priorities measures progress toward providing efficient equitable care promotes cost effective interventions to targeted populations and encourages integrated efforts to optimize health Nearly 500 experts scientists epidemiologists health economists academicians and public health practitioners from around the world contributed to the data sources and methodologies and identified challenges and priorities resulting in this integrated comprehensive reference volume on the state of health in developing countries Social Policy in a Development Context T. Mkandawire, 2004-11-10 Drawing upon both conceptual and empirical evidence this volume argues the case for the centrality of social policy in development focusing particularly on the message that social policy needs to be closely intertwined with economic policy It is argued that social policy can provide the crucial link between economic development poverty eradication and equity This volume is a significant contribution to thinking about social policy in a development context **Commercialization of Health Care** M. Mackintosh, M. Koivusalo, 2005-09-19 Based on original research and analysis by a group of health policy experts and economists from across the world this book analyzes the causes and consequences of the expanding global and local commercialization of health care It argues for the necessity and possibility of effective policy responses to develop good quality universally inclusive health systems worldwide The book aims to contribute to a shift in the international common sense in health policy towards a more humane inclusive egalitarian and ethical framework for policy formulation *China: Bioethics, Trust, and the Challenge of the Market* J. Tao Lai Po-wah, 2008-07-08 to the Moral Challenges H Tristram Engelhardt Jr and Aaron E Hinkley 1 Taking Finitude Seriously in a Chinese Cultural Context Across the world health care policy is a moral and political challenge Few want to die young or to suffer yet not all the money in the world can deliver physical immortality or a life free of suffering In addition health care needs differ As a result unless a state coercively forbids those with the desire and means to buy better basic health care to do so access to medicine will be unequal No country can afford to provide all with the best of care In countries such as China there are in addition stark regional differences in the quality and availability of health care posing additional challenges to public policy making Further in China as elsewhere the desire to lower morbidity and mortality risks has led to ever more resources being invested in health care When such investment is supported primarily by funds derived from taxation an increasing burden is placed on a country's economy This is particularly the case as in China with its one child policy where the proportion of the elderly population consuming health care is rising These policy challenges are compounded by moral diversity De facto humans do not share one morality Instead they rank cardinal human goods and right making conditions in different orders often not sharing an affirmation of the same goods or views of the right *Spending Wisely* Alexander S. Preker, Jack Langenbrunner, 2005 This publication examines how public spending on health care can be made more efficient and equitable in developing countries focusing on strategic purchasing and contracting of services from non governmental providers It is divided into six sections under the headings of the conceptual framework how to make strategic purchasing pro poor purchasing health services purchasing inputs supply

demand and markets legal and regulatory issues Health Policy Research in South Asia Abdo Yazbeck, David H. Peters, 2003-01-01 South Asia is a region of contrasts with impressive technological achievements but also more than 40 percent of the world's poor. These contrasts are evident in the health sector which demonstrates large variations in health nutrition and fertility outcomes. Health Policy Research in South Asia showcases some of the innovative qualitative and quantitative research methodologies being used in South Asia to provide empirical guidance for health sector reform and policy development. The four research areas presented are analysis of inequality expenditure analysis private sector analysis and consumer and provider perspectives. Salient themes emerge from the 12 health policy research activities reviewed and emphasize the importance of strengthening local capacity and building ownership. Governments can and should distribute subsidies in the health sector more efficiently and effectively. The private sector which dominates service delivery in most of South Asia requires a different set of public sector policy instruments. Informed consumers/citizens can and should play an important role in influencing health service delivery. Empirical research can and should provide policymakers with some of the tools needed to improve and monitor the performance of the sector. This book will be of interest to health sector policymakers and analysts to academics and students in public health and health economics and to anyone with an interest in the impact of health policy on development.

Getting Health Reform Right Marc J. Roberts, 2008 This book provides a multi-disciplinary framework for developing and analyzing health sector reforms based on the authors' extensive international experience. It offers practical guidance useful to policymakers, consultants, academics and students alike and stresses the need to take account of each country's economic, administrative and political circumstances. The authors explain how to design effective government interventions in five areas: financing, payment, organization, regulation and behavior to improve the performance and equity of health systems around the world.

UN Millennium Development Library: Who's Got the Power UN Millennium Project, 2013-06-17 The Millennium Development Goals adopted at the UN Millennium Summit in 2000 are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015: income poverty, hunger, disease, exclusion, lack of infrastructure and shelter, while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers and representatives from civil society, UN agencies, the World Bank, the IMF and the private sector. This report

lays out the recommendations of the UN Millennium Project Task Force on Child and Maternal Health The Task Force recommends the rapid and equitable scale up of interventions like the Integrated Management of Childhood Illness the universal provision of emergency obstetric care and sexual and reproductive health services and rights be provided through strengthened health systems This will require that health systems be seen as social institutions to which all members of society have a fundamental right This bold yet practical approach will enable every country to reduce the under five mortality rate by two thirds and the maternal mortality rate by three quarters by 2015 *UN Millennium Development Library: Who's Got the Power* Elliott Sclar, 2005
