Quotation and Truth-Conditional Pragmatics Xiaofei Wang,2017-12-22 In the past decades quotation theories have developed roughly along three lines quotation types meaning effects and theoretical orientations toward the semantics pragmatics distinction Currently whether the quoted expression is truth conditionally relevant to the quotational sentence and if there is a truth conditional impact whether it is generated via semantic or pragmatic processes have become the central concerns of quotation studies In this book quotation is clearly defined for the first time as a constituent embedded within yet distinctive from the quotational sentence Also as the first monograph to address the semantics pragmatics boundary dispute over quotation it argues that the semantic content of quotation amounts to its contribution to the intuitive truth conditional content of the quotational utterance via two modes of presentation which are incarnated in the functioning of quotation marks and manifested as use and mention The use mention based analysis in this book can shed light on the semantic theorizing of other metalinguistic phenomena while the semantics pragmatics perspective will provide methodological implications for other relevant studies The new conception of quotation and thought
