Loewenthal, 2021-03-25 This book is an introduction to critical existential analytic psychotherapy It has been written as a response to what is considered to be a crisis point in what is currently taken as psychotherapeutic knowledge A focus point is the relentless move in psychotherapy and psychotherapy trainings towards evidence based practice It is suggested that such developments can be usefully challenged if we are to consider Can starting with theory be a form of violence Should a primacy be given to practice Does reliance on empirical research mean we start from the wrong place From a critical existential analytic psychotherapeutic perspective the answer to all three of these questions is yes This perspective therefore is fundamentally different from what psychological therapists are increasingly purporting to do and further challenges other current notions from diagnosis and treatment to dominant discourses in psychology The aim of this book is to consider some ways in which the psychological therapies might be able to move away from the crisis mainly caused by what is currently wrongly being understood in terms of evidence based practice as the nature of psychotherapeutic knowledge Instead it is proposed that primacy be given to practice considering theories having implications rather than applications and privileging thoughtfulness with notions of research being seen more as cultural practices This book is based on a special issue of the European Journal of Psychotherapy Counselling **A House Rabbit Primer** Lucile C Moore, 2005-03-01 A House Rabbit
