Racing The Antelope What Animals Can Teach Us About Running And Life:

Racing the Antelope Bernd Heinrich, 2001 *Running in the Zone* Steve King, Dan Cumming, 2006-09-01 Twenty six runners ranging in age from 46 to 76 share their secrets motivations and experiences in the fields of running All are active runners and many presently hold world age class records Some have held world records and have achieved world level performances at the Olympics Commonwealth and European games But *Running in the Zone* isnt about super achievement it is about getting the most out the running experience regardless of age or even ability This book is for anyone interested in running and running related sports whether they are elite age class runners wanting to keep up performances or newcomers considering taking up running in their middle or even advanced years Many of the contributors didnt start running until they were over 40 and some didnt achieve their best personal performances until they were in their 50s You will meet men and women who have a life long interest in running as well as those who took it up as personal challenges All are inspiring in one way or another and have something valuable to teach not necessarily about running per se but rather personal satisfaction giving back through voluntarism and commitment to a goal or purpose The book was the idea of editors Steve King and Dan Cumming and has come together through Steves contacts in the world of running and Dans love of running and editorial ability to pull the best out of a story Both Steve and Dan have a long term relationship with the sport They both perceived that a growing number of older runners are involved in the running and that *Running in the Zone* would answer many of the needs of this group of active men and women helping them to get the best out of one of the most fundamental of athletic endeavors For more information visit authors blog www.runninginthezone.ca

Material and Mind Christopher Bardt, 2019-09-17 An in depth exploration of the interaction between mind and material world mediated by language image and making in design the arts culture and science In *Material and Mind* Christopher Bardt delves deeply into the interaction of mind and material world mediated by language image and the process of making He examines thought not as something pure and autonomous but as emerging from working with material and he identifies this as the source of imagination and creative insight This takes place as much in such disciplines as cognitive science anthropology and poetry as it does in the more obvious painting sculpture and design In some fields the medium of work is in fact the very medium of thinking as fabric is for the tailor Drawing on the philosophical notions of the extended mind and the

enactive mind and looking beyond the world of material based arts Bardt investigates the realms in which material and mind interweave through metaphor representation projection analogues tools and models He considers words and their material origins and discusses the paradox of representation He draws on the design process scientific discovery and cultural practice among others things to understand the dynamics of human thinking to illuminate some of the ways we work with materials and use tools and to demonstrate how our world continues to shape us as we shape it Finally he considers the seamless immaterial flow of imagery text and data and considers the place of material engagement in a digital storm
