Redefining Security Population Movements And National Security:

Redefining Security David T. Graham, Nana Poku, 1998-10-30 International migration has become a major domestic political issue in many countries and a major topic of international debate. Thus far most of the attention has centered on the plight of refugees or on ways to curb the flow of illegal immigrants. As more and more migrants cross interstate boundaries, however, governments are realizing that immigration and asylum problems cannot be separated from broader socio-economic and political issues nor can they be resolved by countries acting unilaterally. Even with this understanding, attempts to develop multilateral strategies to ease international tensions arising from uncontrolled migration will be complicated by economic disparities, regional political tensions, and mounting population and ecological pressures. Internal migration, particularly in terms of forced resettlement and urbanization, also gives rise to a myriad of problems relating to aspects of security. The increase in other major population movements such as tourism and business travel also has implications for security. Until recently the question what is security was rarely asked in the context of these developments. This was because there was a perceived consensus on what the nature of security was. The nature of security was held to mean national political and military security. Thus security was virtually synonymous with defense. The theoretical claim of this volume is that these developments are necessitating a redefinition of security. This volume provides major theoretical analyses of these trends as well as in-depth case studies that explore specific developments of major concern to scholars and other researchers involved with international relations, migration, and development issues.

Migration, Globalisation and Human Security David T. Graham, Nana K. Poku, 2005-08-04 Migration, Globalisation and Human Security looks at a range of security and human security issues related to the displacement of civilian populations and shows how the tenuous existence of migrants can lead to a myriad of human security threats. Providing major theoretical analyses of recent migration trends and in-depth case studies, this book shows that a redefinition of the notion of human security is now needed.

Irregular Migration and Human Security in East Asia Jiyoung Song, Alistair D. B. Cook, 2014-08-13 Across East Asia intra-regional migration is more prevalent than inter-regional movements and the region's diverse histories, geopolitics, economic development, ethnic communities, and natural environments make it an excellent case study for examining the relationship between irregular migration and human security. Irregular migration can be broadly defined as people's mobility that is unauthorised or forced, and this book expands on the existing migration-security nexus by moving away from the traditional state security lens and instead shifting the focus to human security. With in-depth empirical country case studies from the region including China, Japan, North Korea, the Philippines, Burma, Myanmar, Cambodia, Thailand, and Singapore, the contributors to this book develop a human security approach to the study of irregular migration. In cases of irregular migration such as undocumented labour migrants, asylum seekers, internally displaced people, trafficked persons, and smuggled people, human security is the cause and/or effect of

migration in both sending and receiving countries By adopting a human security lens the chapters provide striking insights into the motivations vulnerabilities and insecurities of migrants the risks dangers and illegality they are exposed to during their journeys as well as the potential or imagined threats they pose to the new host countries This multidisciplinary book is based on extensive fieldwork and interviews with migrants aid workers NGO activists and immigration officers As such it will appeal to students and scholars of Asian politics and security as well as those with interests in international relations social policy law geography and migration

Security and Development in Southern Africa Nana Poku, 2001-04-30 With the end of white dominated South Africa many observers have argued for a positive transformation of the whole of Southern Africa based upon market integration and increased cooperation among the states of the region Poku and the contributors to this collection re examine this optimistic scenerio and they point to the problems of translating good intentions into actual policies In reality the economic imbalance between South Africa and its neighbors poses severe problems for the region Far from finding a stronger ally in regional reconstruction and development the countries in the region are finding that for many in South Africa they simply do not matter that much The analysis points to greater polarization which may imply greater marginalization of the poorer countries in the region Moreover a major widening of the gap between the richer South Africa and some or all of the weaker economies may lead to increased tensions and breakdown of regional relations even to a situation detrimental to economic development in the region A provocative analysis by some of the leading politico economic thinkers of the region the volume will be of great use to scholars researchers and policy makers involved with Southern African development

The Future Faces of War Jennifer Dabbs Sciubba, 2010-12-07 This comprehensive and clear volume reveals the numerous ways demographic trends such as age structure composition and migration influence national security Population size structure distribution and composition affect security in numerous ways including national power civil conflict and development The Future Faces of War Population and National Security offers a comprehensive overview of how demographic trends can function as components indicators and multipliers of a state s national security Each chapter focuses on a particular demographic trend and describes its national security implications in three realms military regime and structural Illustrating the mechanisms by which demography and security are connected the book pushes the conversation forward by challenging common conceptions about demographic trends and national security Key for policymakers and general readers alike it goes on to suggest ways trends can provide opportunities for building partnerships and strengthening states Focusing on multiple scenarios and the theoretical links between population and security the insights gathered here will remain relevant for years to come

Migration, Regional Integration and Human Security Harald Kleinschmidt, 2017-03-02 This original and timely book is the first to analyze the interconnectedness of migration regional integration and the new security studies Exploring the conflict between the actions of transnational migrants and state government policy in a series of theoretical chapters and regional case studies the book includes theoretical chapters

which look at three key facets of the nation state population territory and government discussing the ways in which migration regional integration and new security thinking challenge the accepted role and responsibilities of the state Regional case studies are also included which explore the specific challenges faced in regions including Central America Asia and the Pacific and Central and Eastern Europe As a book that asks crucial questions about the formulation of migration policies and the consequences of that success or failure it will be essential reading for students and scholars of migration in sociology politics and international relations and also for those with professional interests in the area **People Changing Places**

Isabelle Côté, Matthew I. Mitchell, Monica Duffy Toft, 2018-07-04 While migration and population settlement have always been an important feature of political life throughout the world the dramatic changes in the pace direction and complexity of contemporary migration flows are undoubtedly unique Despite the economic benefits often associated with global regional and internal migration the arrival of large numbers of migrants can exacerbate tensions and give rise to violent clashes between local populations and recent arrivals This volume takes stock of these trends by canvassing the globe to generate new conceptual empirical and theoretical contributions The analyses ultimately reveal the critical role of the state as both an actor and arena in the migration conflict nexus Security Studies Arda Özkan, Göktürk Tüysüzoglu, 2023-07-10 As an

important aspect of human polity the concept of security has an important place and space in politics Though regularly mentioned or referred the concept is rarely given a proper definition usually left in the shadows of politics and policymaking and usually referred to as a cause to an effect Within the framework of this book classic modern and post modern security issues are analyzed while also focusing on the classical and diverse conceptual dimensions of security current problems are also evaluated especially in the axis of post modern security studies In security studies a distinction is usually made between classical and post modern approaches but in this study both are considered together One of the important features of this work is that it offers a perspective from Turkish experts on the concept of security in international relations

Non-Traditional Security in Asia Ralf Emmers, 2017-03-02 The security issues confronting Asia are both complex and diverse Given the increasing trend towards an expanding security agenda beyond the military dimension of inter state relations this volume provides an extensive study of emerging non traditional challenges to this region New realities and new challenges have come to the fore including environmental degradation illegal immigration infectious diseases transnational crime poverty and underdevelopment Drawing upon the concepts of securitization and de securitization this book brings together regional perspectives from across Asia to examine how these challenges are perceived and managed It is a valuable contribution to both security and Asian studies and will be ideally suited to those interested in security studies international relations and development studies Globalization, Development and Human Security Anthony G. McGrew, Nana K.

Poku, 2007-02-12 Whether globalization development and human security are inescapably trapped within a vicious circle or a virtuous circle is the central concern of this book *The Securitization of Humanitarian Migration* Scott D.

Watson,2009-06-02 This book examines how western liberal states are progressively restricting access to refugees and asylum seekers even though these states have signed international agreements obliging them to offer protection to those fleeing persecution and to advocate the spread of human rights and humanitarian principles Watson examines how refugees and asylum seekers have come to be treated so poorly by these states through the use of policies such as visa requirements mandatory detention and prevention return policies Providing extensive documentary analysis of debates on restrictive refugee policies in Canada and Australia the author addresses the relationship between security and migration an issue of increased importance in the aftermath of 9 11 and the war on terror He then examines hotly contested policies such as detention and the forceful return of asylum seekers to demonstrate how attempts to securitise these issues have been resisted in the media and by political opposition Given the importance of providing refuge for persecuted populations not only to ensure the survival of targeted individuals but also to maintain international peace and security the erosion of protective measures is of great importance today The book will be of interest to students and scholars of international security international relations migration and human rights

8 Billion and Counting: How Sex, Death, and Migration Shape Our World Jennifer D. Sciubba,2022-03-29 A provocative description of the power of population change to create the conditions for societal transformation As the world nears 8 billion people the countries that have led the global order since World War II are becoming the most aged societies in human history At the same time the world s poorest and least powerful countries are suffocating under an imbalance of population and resources In *8 Billion and Counting* political demographer Jennifer D Sciubba argues that the story of the twenty first century is less a story about exponential population growth as the previous century was than it is a story about differential growth marked by a stark divide between the world s richest and poorest countries Drawing from decades of research policy experience and teaching Sciubba employs stories and statistics to explain how demographic trends like age structure and ethnic composition are crucial signposts for future violence and peace repression and democracy poverty and prosperity Although we have a diverse global population demographic trends often follow predictable patterns that can help professionals across the corporate nonprofit government and military sectors understand the global strategic environment Through the lenses of national security global health and economics Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there Instead she argues we must look at the forces in a society that amplify demographic trends and the forces that dilute them particularly political institutions or the rules of the game She shows that the most important skills in demographic analysis are naming and being aware of your preferences rethinking assumptions and asking the right questions Provocative and engrossing *8 Billion and Counting* is required reading for business leaders policy makers and anyone eager to anticipate political economic and social risks and opportunities A deeper understanding of fertility mortality and migration promises to point toward the investments we need to make today to shape the future we want tomorrow

Taras,2015-03-24 This is a book about conflicts and fears how domestic reasons are drawing countries in Europe into international events Raymond Taras explains why France Poland and Sweden have become engaged in outside conflicts and tells the story of when and why xen The Securitization of Migration Philippe Bourbeau,2011-03-23 Provides an overview of the integration of migration into international security frameworks emphasizing policing and defence New Threats and New Actors in International Security E. Krahmann,2005-01-14 Non state threats and actors have become key topics in contemporary international security as since the end of the Cold War the notion that state is the primary unit of interest in international security has increasingly been challenged Statistics show that today many more people are killed by ethnic conflicts HIV AIDS or the proliferation of small arms than by international war Moreover non state actors such as non governmental organizations private military companies and international regimes are progressively complementing or even replacing states in the provision of security Suggesting that such developments can be understood as part of a shift from government to governance in international security this book examines both how private actors have become one of the main sources of insecurity in the contemporary world and how non state actors play a growing role in combating these threats Securitizations of Citizenship Peter Nyers,2009-05-19 Securitizations of Citizenship critically assesses the fate of citizenship in relation to securitized practices of surveillance and control that have emerged in the post 9 11 period Water Resources in the Middle East Hillel Shuval,Hassan Dweik,2007-07-30 Israeli Palestinian Water Issues From Conflict To Cooperation This book Israeli Palestinian Water Issues From Conflict to Coope tion authored by a group of leading Palestinian Israeli and international water experts is a unique and timely document illustrating the imp tance of mutual understanding respect and amity among peoples d ing a difficult period of stress whose leaders sadly have not yet found the way of resolving the conflicts between them and of living in peace with each other Nevertheless it is a book which demonstrates hope timism and belief that people with good will in their hearts can help contribute to finding the way to peace and mutual cooperation in so ing shared problems essential for their mutual survival and welfare nd The participants in the 2 Israeli Palestinian International Conference on Water for Life in the Middle East held in Antalya Turkey in October 2004 which served as the source of most of the papers in this book concluded the Conference with the following declaration We two hundred participants in this Israeli Palestinian International Conference complete our conference with a sense of optimism It is clear that the Palestinian and Israeli participants along with their international partners remain committed to solving the many challenges associated with water quantity and quality in our region *Organizing Muslims and Integrating Islam in Germany* Kerstin Rosenow-Williams,2012-10-19 In *Organizing Muslims and Integrating Islam in Germany* Kerstin Rosenow Williams analyzes the challenges faced by Islamic organizations in Germany since the beginning of the 21st century Outlining the expectations German political actors have of Islamic organizations and the internal interests of these organizations the author illustrates that organizational response strategies involve patterns not only of adaptation but also of

decoupling and protest The study introduces an innovative research framework based on organizational sociology and provides empirical insights into three major Islamic umbrella organizations DITIB IGMG ZMD and their relationships with other actors The comprehensive analysis of the German institutional environment and related developments in Islamic organizations makes this study highly relevant to scholars and politicians as well as the general public *Security Studies*
