The New Western Scott F. American Resistance Fighter in Television and Film explains that this fantasy has occupied the center of numerous war films and in turn shaped the way in which Americans see those wars and themselves. Informed by the author's expertise on war in contemporary literature and popular culture, this book begins with an introduction that outlines the basics of the American Guerrilla narrative and identifies it as a recurring theme in American war films. Subsequent chapters cover one hundred years of American guerrillas in film and television. The book concludes with a chapter on science fiction narratives illustrating how the conventions and politics of these stories shape even the representation of wholly fictional imagined wars on screen.

The Peace In Between by Astri Suhrke, Mats Berdal, 2013-03. This volume examines the causes and purposes of post conflict violence. The end of a war is generally expected to be followed by an end to collective violence, as the term post conflict that came into general usage in the 1990s signifies. In reality, however, various forms of deadly violence continue and sometimes even increase after the big guns have been silenced and a peace agreement signed. Explanations for this and other kinds of violence fall roughly into two broad categories: those that stress the legacies of the war and those that focus on the conditions of the peace. There are significant gaps in the literature, most importantly arising from the common premise that there is one predominant type of post war situation. This post war state is often endowed with certain generic features that predispose it towards violence, such as a weak state, criminal elements generated by the war time economy, demobilized but not demilitarized or reintegrated ex combatants, impunity and rapid liberalization. The premise of this volume differs. It argues that features which constrain or encourage violence stack up in ways to create distinct and different types of post war environments. Critical factors that shape the post war environment in this respect lie in the war to peace transition itself, above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power, normative understandings of the post war order and the international context. This book will be of much interest to students of war and conflict studies, peacebuilding and IR Security Studies in general.
