The Philadelphia School and the Future of Architecture John Lobell, 2022-08-05 Flourishing from 1951 to 1965 the Philadelphia School was an architectural golden age that saw a unique convergence of city practice and education all in renewal And it was a bringing together of architecture city and regional planning and landscape architecture education under the leadership of Dean G Holmes Perkins During that time at the architecture school at the University of Pennsylvania known as the Graduate School of Fine Arts or GSFA Louis Kahn and Robert Venturi were transforming modern architecture Romaldo Giurgola was applying continental philosophy to architectural theory Robert Le Ricolais was building experimental structures Ian McHarg was questioning Western civilization and advancing urban and regional ecology Herbert Gans was moving into Levittown and Denise Scott Brown was forging a syncretism of European and American planning theory and discovering popular culture And in the city Edmund Bacon was directing the most active city planning commission in the country This book describes the history of the school the transformation of the city of Philadelphia and the philosophy of the Philadelphia School in the context of other movements of the time and looks at what the Philadelphia School has to offer to architecture today and in

the future all from the point of view of a student who was there **Public Spaces, Marketplaces, and the Constitution** Anthony Maniscalco, 2015-10-15 Examines how the Supreme Court has banished free expression from shopping malls and other public spaces In spite of their public attractions and millions of visitors most shopping malls are now off limits to free speech and expressive activity The same may be said about many other public spaces and marketplaces in American cities and suburbs leaving scholars and other observers to wonder where civic engagement is lawfully permitted in the United States In *Public Spaces Marketplaces and the Constitution* Anthony Maniscalco draws on key legal decisions social theory and urban history to demonstrate that public spaces have been split apart from First Amendment protections while the expression of political ideas has been excluded from privately owned publicly accessible malls Today the traditional indoor suburban shopping mall that icon of modern American capitalism and culture is being replaced by outdoor retail centers Yet the law and courts have been slow to catch up Maniscalco argues that scholars students and the public must confront these innovations in commercial design and consumer practices as well as what they portend for contemporary metropolitan America and its civic spaces *The Italian Legacy in Philadelphia* Andrea Canepari, Judith Goode, 2021-12-03 The Italian Legacy in Philadelphia examines the impact and influence of Italian arts culture people and ideas on the city of Philadelphia from the founding to the present *Big Plans* Kenneth L. Constructions of Greek Past Hero Hokwerda, 2021-11-22 In May 1999 a second conference of Hellenists of all periods and subject areas from the Dutch speaking countries was organized in Groningen The theme of this second conference was *Constructions of Greek Past Identity and Historical Consciousness from Antiquity to the Present* The conference theme was described as follows When seeking to establish its own identity a culture country people nation readily resorts to its own history which it uses either as an example or as something to react against In recent years there has been a growing awareness that this process often reveals more about a culture in the present day than the historical era to which it harks back its own identity and thus its own history are constructed in this way The constructional approach is usually applied to the birth of new nation states and the development of their national ideologies particularly in the nineteenth century But it can be applied more broadly too Greek culture is an excellent subject area for studying this phenomenon even further back in history precisely because its history is so long and included several Golden Ages to which later periods could and can hark back Greek culture still presents itself as a product of Ancient Greek and or Byzantine

culture However the problem of continuity in Greek culture has frequently manifested itself particularly during periods of radical political ideological or demographic change The Homeric influence on the Mycenaean world is therefore also an aspect of this phenomenon The Homeric world served as an example for later periods as did the Attic period for the Greeks in the Hellenistic Roman age The tensions between the Hellenistic and Roman character of the Greek world had a strong influence on the shaping of the Greek identity during late Antiquity and the Middle Ages Those tensions still exist today ellenism s ellenik tita v romiosyni The theme was designed to bring together Hellenists of all periods and disciplines literature language history archaeology ecclesiastical history sociology etc relating to the Greek world The colloquium sessions were held in Dutch but the papers are published in English two in French

History and Precedent in

Environmental Design Anatol Rapoport,2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful
