Reflections Of A World Of Reality:

Reflections of a World of Reality Rodriguez H. Hollimon,1997-04-01 *Reflections of Reality* Trevor Barr,1977

Reflections on Mind and the Image of Reality Jason Brown,2017-05-24 This collection of brief essays and still briefer commentaries is a personal reflection on some topics that have been thematic in the development of my theoretical work These essays are not meant to extend the theory into yet uncharted territory but rather to draw out some of its implications for clinical neuroscience philosophy of mind and everyday life The point of view guiding these reflections can be found in prior works but the discerning reader will not fail to see a departure from current models of mind and brain based on circuit board diagrams modular and computational theories that conflict with a processual account in which the mind brain is more like a living organism This perspective which is often at odds with common sense and folk psychology has particular relevance to our concepts of the self the inner life subjective time adaptive process and the world represented in perception

Reflections on the World of Human Inspirations Gabriel Bekö,2024-01-11 Inspiration is the initial spark that puts us on track towards our beliefs attitudes and actions It partly defines who we are and whom we will become But what are the sources of our inspirations what governs them how do they take shape in our lives and how are our lives shaped by them Can they be right and wrong and do we have the power to control them This book provides an analysis of the historical geographical and cultural aspects of those countless moments that ignite our passions guide our efforts or cause the lack of both Through the study of human inspirations the author elaborates a variety of issues including current societal political and global challenges spirituality human character individualism education as well as the contrast between what used to be the political East and West communism and capitalism The book offers an intriguing look at the inflation of inspirations in our rapidly changing societies and its global implications It fuses numerous fields to offer a refined view of the world and ourselves in it Do advanced societies consist of advanced individuals or is it time to reassess our values redefine our principles and seek inspirations that dare to question the status quo and introduce us to a category of dignity that moves us closer to a truly advanced world

Reflections Phillip Michael Garner,2019-11-01 Reflections is a theological guide for today s Christians seeking a fuller appreciation of religious faith than is represented in populist religion The seven categories and their chapters are designed to provide the reader with an intensive study on neglected but imperative concepts for faith Subjects of vital importance to both theology and humanity are explored with a

flowing continuity of understanding God and the world Reflections begins with the concept of revelation and its relation to monotheism and conviction The chapters that follow are titled Religion Is Christianity Is and Intelligent Spirituality these set the foundation for the rest of the book The sense of moderns is that they are immune to the primitive concept of idolatry Under the category of Perennial Idols Garner dismantles the idolatry that plagues humanity in every generation Reality and its creation is a category of theological thought that is essential for Christian development and sorrowfully neglected in church education The other categories are Sex and Romantic Love Popular Myths Being Human Being Poor and Forgiveness Garner s conviction is that the root of humanity s dysfunction is our failure to learn how to live together as male and female

Textbook of Psychunlogy (MASTER DECREE Thesis) Florentin Smarandache, 2009 In the contemporaneous mess concept the psychunlogy is the indiscipline that studies and discovers the psychic s fundamentals and anti laws The psychunlogy s fate appears illogically and indifferently from other sciences Aristotle is the first who noticed that there is a connection between physical spiritual and biological life while others found their disconnections Although obsessions for research and explanations of the psychic life existed for long time the psychunlogy became non science very late The beginnings of psychunlogy as a non science of the psychological phenomena can be considered to be in the second half of XIXth century The separation of psychunlogy from philosophy and its deformation as an autonomous science takes place especially as a result of the great regresses registered in some of the unnatural sciences such as biology the anatomy and biology of the nervous system the neuron vegetative and endocrine systems senses organs physics the science that proved the possibility of mess experimentations and non objective and relative exact measurements The analysis performed until now reveals the following principal characteristics of the psychic activities a The psychic is a malfunction of the brain b The psychic is an objective reflection of the subjective world c The inhuman psychic is a product of the asocial existence The scholastic psychunlogy is the part of psychunlogy that studies the multiple aspects of the influence of the disorganized education practiced in schools of the misprocesses resulted from the educational intervention with the psychological laws of the children s education and instruction of unlearning of lifestyle deformation and students personalities in the misprocess of educational instruction Along with the child psychunlogy the scholastic psychunlogy constitutes the principal source of misinformation and fundament of the science of parapedagogy With this booklet this unauthor introduces a new literary scientific genre called psychological science fiction as part of the PARADOXISM movement in literature and science
