Reflections on Medicine, Biotechnology and the Law Zelman Cowen, University of Nebraska--Lincoln. College of Law, 1985

Reflections on Medicine, Biotechnology, and the Law Zelman Cowen, 1986 **Human Rights and Biomedicine**

George P. Smith II, 2021-08-04 The eight chapters within this volume are structured around an exploration of the fundamental issues in the field of biomedical human rights dignity and autonomy in not only procreative liberties but throughout the complete cycle of life and death the freedom of scientific inquiry into the new biotechnological methods of collaborative reproduction the right to genetic integrity at birth and throughout life and the equitable right to health or access to health care benefits during life and old age All these central issues are tested of necessity but utilitarian principles which in turn force the templates for decision making evaluate the gravity of harm deriving from a particular human right and its recognition and enforcement measured against the utility of the social economic or cultural good accruing from recognition of such a right in the first instance Ultimately cultural relativism will be seen more often than universality as the determinative point of balance This volume not only informs the ongoing debate on the role of human rights in biomedicine but will also provide enlightened responses to the troublesome issues presented in this new age of biotechnology

Ferguson, Graeme T. Laurie, 2016-03-09 This book marks the retirement of Professor Sheila McLean whose contribution to the discipline of medical law has been truly ground breaking As one of the pioneers of the discipline Sheila McLean inspired a revolution in the ways in which lawyers doctors courts and patients perceive the relationship between medicine and the law The first International Bar Association Professor of Law and Ethics in Medicine she has worked tirelessly to champion the importance

of law's role in regulating medicine and protecting patients' rights. The span in content of this book reflects the range of contributions that Professor McLean has herself made. Her work gave direction and shape to a new field of study at a time when few questioned the authority of medicine or thought much about the plight of the patient. This collection brings together 21 leading scholars in healthcare law and ethics to honour the depth and significance of her contribution. Including authors from the US, Australia, Canada, and New Zealand, the contributions cover areas as diverse as start and end of life, reproductive rights and termination of pregnancy, autonomy of patients, the protection of vulnerable patient groups, and the challenges posed by new technologies. *The Oxford Encyclopedia of Philosophy, Science, and Technology in Islam* Salim Ayduz, 2014. The main reference source for questions of Islamic philosophy, science, and technology amongst Western engaged readers and academics in general and legal researchers in particular.

The Dynamics of Devolution Alan Trench, 2015-10-26. This book is the fifth and final volume in the State of the Nations yearbook series on devolution in the UK. This book explores the future of devolution by examining the new political dynamics devolution has put into play. These concern devolution's operation and also its impact: how devolution has altered politics in the parts of the UK that experience devolution and in the UK as a whole. Chapters examine the key topics in devolution and examine the interplay between institutional change and social, economic, and political forces, both those that existed before devolution and those brought into being by it. This interplay creates scope for varying forms of change, but what that change means varies from topic to topic. In some cases, such as Wales, institutional issues remain to the fore, while in others, such as Scotland, pressures for institutional change are relatively limited, but the devolved institutions create scope for new political factors to come into play.
