On Reflection Hilary Kornblith,2012-09-27 Hilary Kornblith presents a new account of reflection and its importance for knowledge reasoning freedom and normativity Philosophers have frequently extolled the value of reflective self examination and a wide range of philosophers who differ on many other things have argued that reflection can help to solve a number of significant philosophical problems The importance of reflecting on one s beliefs and desires has been viewed as the key to solving problems about justification and knowledge about reasoning about the nature of freedom and about the source of normativity In each case a problem is identified which reflective self examination is thought to address Kornblith argues that reflection cannot solve any of these problems There is a common structure to these issues and the problems which reflection is thought to resolve are ones which could not possibly be solved by reflecting on one s beliefs and desires More than this he suggests that the attempt to solve these problems by appealing to reflection saddles us with a mystical view of the powers of reflective self examination Recognition of this fact motivates a search for a demystified view of the nature of reflection To this end Kornblith offers a detailed examination of views about knowledge reasoning freedom and normativity in order to better understand the motivations for extolling self reflective examination He explores both the logic of these views and the psychological commitments they involve In the final chapter he offers a more realistic view of reflection which draws on dual process approaches to cognition
