Reform on Campus: Changing Students, Changing Academic Programs Carnegie Commission on Higher Education, 1972
Bound together v 3 no 1 3 *What Ever Happened to the Faculty?* Mary Burgan, 2006-11-24 In this provocative work Mary Burgan surveys the deterioration of faculty influence in higher education From campus planning curriculum and instructional technology to governance pedagogy and academic freedom she urges far greater consideration for the perspective of the faculty Burgan evokes the pervasive atmosphere of charge and counter charge on U S campuses where competition trumps reason not only in athletics but also in research faculty recruitment and fund raising Relating this winner take all mentality to the overspecialization of faculty and to overreliance on non tenure track instructors Burgan suggests that improving life on campus depends on faculty members successful engagement with their administrative colleagues as well as their students Informed by experience fueled by conviction and full of practical strategic advice for the future *What Ever Happened to the Faculty* is an excellent resource for administrators and faculty who are eager to change the tone and trajectory of contemporary higher education *Research in Education* ,1972 *Planning For Higher Education* Allan O. Pfnister, 2019-06-10 This book focuses on some of the last decade s more significant writing about developments in higher education planning organizing the wide ranging commentaries and studies to show the administrator the faculty member and the informed layman what the current status of higher education appears to be *Transformational Change Efforts: Student Engagement in Mathematics through an Institutional Network for Active Learning* Wendy M. Smith, Matthew Voigt, April Ström, David C. Webb, W. Gary Martin, 2021-05-05 The purpose of this handbook is to help launch institutional transformations in mathematics departments to improve student success We report findings from the Student Engagement in Mathematics through an Institutional Network for Active Learning SEMINAL study SEMINAL s purpose is to help change agents those looking to or currently attempting to enact change within mathematics departments and beyond trying to reform the instruction of their lower division mathematics courses in order to promote high achievement for all students SEMINAL specifically studies the change mechanisms that allow postsecondary institutions to incorporate and sustain active learning in Precalculus to Calculus 2 learning environments Out of the approximately 2 5 million students enrolled in collegiate mathematics courses each year over 90% are enrolled in Precalculus to Calculus 2 courses Forty four percent of mathematics departments think active learning mathematics strategies are important for Precalculus to Calculus 2 courses but only 15 percent state that they are very successful at implementing them Therefore insights into the following research question will help with institutional transformations What conditions strategies interventions and actions at the departmental and classroom levels contribute to the initiation implementation and institutional sustainability of active learning in the undergraduate calculus sequence Precalculus to Calculus 2 across varied institutions **Resources in Education** ,2001-10
The Uses of the University Clark Kerr, 2013-08-01 America s university president extraordinaire adds a new chapter and

preface to *The Uses of the University* probably the most important book on the modern university ever written This summa on higher education brings the research university into the new century The multiversity that Clark Kerr so presciently discovered now finds itself in an age of apprehension with few certainties Leaders of institutions of higher learning can be either hedgehogs or foxes in the new age Kerr gives five general points of advice on what kinds of attitudes universities should adopt He then gives a blueprint for action for foxes suggesting that a few hedgehogs need to be around to protect university autonomy and the public weal

Reform and Change in Higher Education Alberto Amaral,Orlanda Tavares,Cristina Sin,2025-07-15 This insightful book explores the complexities and opportunities of implementing reform in higher education systems Chapters analyse the diverse factors taken into account at the system level the institutional level and the individual grass root level outlining potential causes of resistance from the academic community and highlighting innovative avenues for change

Academia's Golden Age Richard M. Freeland,1992 This book examines the evolution of American universities during the years following World War II Emphasizing the importance of change at the campus level the book combines a general consideration of national trends with a close study of eight diverse universities in Massachusetts The eight are Harvard M I T Tufts Brandeis Boston University Boston College Northeastern and the University of Massachusetts Broad analytic chapters examine major developments like expansion the rise of graduate education and research the professionalization of the faculty and the decline of general education These chapters also review criticisms of academia that arose in the late 1960s and the fate of various reform proposals during the 1970s Additional chapters focus on the eight campuses to illustrate the forces that drove different kinds of institutions research universities college centered universities urban private universities and public universities in responding to the circumstances of the postwar years

Change and Reform in Medicine and Health Education in China - A Teaching Staffs Perspective Xiangyun Du,Jiannong Shi,Yuhong Zhao,2022-09-01 In recent decades medicine and health education has been challenged worldwide by changes in its profession Being a doctor nowadays encompasses much more than having biomedical knowledge and includes interdisciplinary skills related to societal needs communication skills and ethical consideration among other things In order to provide these skills and competences many medical schools are implementing changes in different aspects of the education These changes are also occurring in China In the past twenty years medical education in China has initiated a series of reforms The current reforms have mainly been led by the Ministry of Education and Ministry of Health These initial actions have evidenced both positive and negative attitudes and reactions Is there a need to make further reforms and changes If so in what aspects This book documents a national investigation of attitudes from teaching staff on the reforms and changes Nearly 1800 teaching staff from 23 medical universities participated in this investigation The results suggest that sustainable educational change demands not only supports from policy makers and leaderships but also active participation from teaching staff In order for the implementation of reforms and changes to be successful two factors are

essential from the teaching staff's perspective. First it is important for teaching staff to gain a deep understanding of educational reform and change and second they should develop appropriate skills to be able to conduct the reforms through their teaching practice. To provide these two factors institutional facilitation is necessary and crucial. *Reforms in Higher Education* Keith Watson, 1996-12-05. This text addresses the reforms in the financial and administrative structure of higher education, government intervention in introducing new managerial techniques and quality audits and the implications of these changes for both academics and administrators. It is one of a series of four volumes which look at the educational dilemmas facing governments, professional educators and practising administrators in the current climate in education. The issues are addressed from international and comparative perspectives. ERIC Clearinghouse Publications, 1981. *The Transformation of the Student Career* Michael Nugent, 2004-09. This study examines the transformation of the structural characteristics and ideological assumptions of university study in these three countries between the mid 1950s and the early 1990s. Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10. Co-published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy, 2. methodological perspectives, 3. the policy process, 4. resources management and organization, 5. teaching and learning policy, 6. actors and institutions, and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research. Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05. Universities have never been static. Even so, it is fair to say they have experienced a most radical transformation in the past twenty years. During this period, the role and responsibility of the state generally have been broadly limited while allowing market forces private

ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide **University Bulletin** University of California, Berkeley,1964 *Research, Actionable Knowledge, and Social Change* Edward P. St. John,2023-07-03 A professional text written for social science researchers and practitioners *Research Actionable Knowledge and Social Change* provides strategies and frameworks for using social science research to engage in critical social and educational problem solving Combining the best practices of critical analysis and traditional research methods this professional text offers guidance for using the Action Inquiry Model AIM a transformative model that explains how to successfully conduct action oriented research in a multitude of professional service organizations The aim of the text is to encourage a new generation of research based partnerships reforms that promote equity and access for underserved populations Topics discussed include The historical precedents for universities engaged in social change The limitations of current social science theory and methods The critical empirical approach to social research The issues relating to social justice within the policy decision process The use of social research to integrate an emphasis of social justice into economic and policy decision making *Research Actionable Knowledge and Social Change* does not propose different foundations for social research but rather argues that it is necessary to reconsider how to work with theory and research methods to inform change This text can also be used by students enrolled in graduate and Ed D Ph D Higher Education Leadership programs and graduate programs across professional fields including K 12 public administration sociology health cultural studies organizational development and organizational theory It further offers students guidance for research design and dissertation research *The Roskilde Model: Problem-Oriented Learning and Project Work* Anders Siig Andersen,Simon B. Heilesen,2014-10-25 This book describes the pedagogical foundations of the Roskilde Model of education and educational design It presents knowledge about how principles of problem oriented interdisciplinary and participant directed project work may serve as a basis for planning and applying educational activities at institutions of higher learning It discusses the dilemmas problems and

diverging views that have challenged the model provoking experiments and reforms that have helped develop practice without compromising the key principles The Roskilde Model combines various student centered learning concepts into a nexus providing the foundation for a consistent pedagogical practice that is strongly supported by the educational structure and the academic profile of the university A complex concept the Roskilde Model refers to three different aspects The first one is problem oriented interdisciplinary and participant directed project work PPL At Roskilde University half of all study activities are organized in line with this particular pedagogical approach The second aspect the model refers to is the organizing of university education on the basis of four interdisciplinary bachelor programmes These programmes are part of the humanities social sciences natural sciences and humanistic technological sciences and give admission to two year master programmes in a broad range of disciplines The third aspect the model refers to is the interdisciplinary academic and educational profile of the university *Report on Chilean University Life ,1979*
