## **Religion And Science In The Context Of Chinese Culture:**

**Religion and Science in the Context of Chinese Culture** Deguang Chen, Yi-Jia Tsai, Frank Budenholzer, 2006 Religion and science in the context of Chinese culture A Theology of Engagement Science Theology S      **Questioning Science in East Asian Contexts** Yung Sik Kim, 2014-01-16 Questioning Science in East Asian Contexts brings together twelve essays written by Yung Sik Kim addressing various questions about the social and cultural contexts of science in East Asia Most of the essays deal with the relationship between science and Confucianism especially the roles that Confucian thought values and institutions have on the development of science Kim shows that this relationship is very complex and multifaceted and cannot be dealt with in a simplistic manner Kim offers comparative perspectives and discusses the problems of intercultural comparisons he demonstrates that in spite of the potential dangers that accompany these comparisons they should be made nonetheless as they allow for a better understanding of the situation in East Asia      *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science      *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
