Religion Without Explanation:

Science, Reason and Religion Derek Stanesby, 2013-05-02 Philosophy matters This is the message of this highly original inquiry into the relationship between science and religion It is only when we examine the intellectual presuppositions on which science and religion are based with regard to such fundamentals as truth objectivity and realism that we perceive the link between these two enterprises which are essential to any characterization of man The book offers a lucid and enlightening account of the main movements in the philosophy of science in the twentieth century and then proceeds to demonstrate their consequences for philosophy of religion After examining the wide and all pervasive influence of positivism and its offspring relativism in both science and theology he suggests that the attempt to provide an alternative made by Karl Popper offers the most satisfactory way forward in man's twofold enquiry in terms of his relationship with God and with the Religion without Transcendence? T. Tessin, D. Phillips, 2016-07-27 What can transcendence mean for us We live in a world world in which there are many conceptions of transcendence Some philosophers say that they all point in their way to a transcendent realm without which death and life s sorrows have the last word while their opponents argue that since this realm is an illusion we must use our own resources to meet life s trials Others argue that moral and religious concepts of transcendence are obscured by philosophical notions of transcendence and must be rescued from them These conflicting views on a central issue in our culture are brought into sharp relief in the present collection **Conjunctive Explanations** in Science and Religion Diarmid A. Finnegan, David H. Glass, Mikael Leidenhag, David N. Livingstone, 2023-02-28 This book investigates the nature and relevance of conjunctive explanations in the context of science and religion It explores questions concerning how scientific and religious explanations for features of the world or phenomena within it relate to each other and whether they might work together in mutually enriching ways The chapters address topics including the relationship between Darwinian and teleological explanations non reductive explanations of mind and consciousness and explanations of Christian faith and religious experience while others explore theological and philosophical issues concerning the nature and feasibility of conjunctive explanations Overall the contributions help to provide conceptual clarity on how scientific and religious explanations might or might not work together conjunctively as well as exploring how these ideas relate to specific topics in science and religion more generally Religions and the Truth Hendrik M Vroom, 1990 Religion Within the Limits of Language Alone Felicity McCutcheon, 2017-03-02 Religion Within the Limits of Language Alone provides a critical examination of the Wittgensteinian philosophers of religion who claim that the word God cannot be understood as referring to a metaphysical being who may or may not exist McCutcheon traces the arguments offered by these philosophers of religion back to Wittgenstein's own criticisms of speculative metaphysics arguing that in its religious usage the concept of God does not fall under Wittgenstein s anti metaphysical gaze In presenting a detailed account of Wittgenstein s own philosophical method including his criticisms of metaphysics McCutcheon shows that it is possible to accept Wittgenstein s

criticisms of metaphysics whilst retaining the metaphysical content of religious language This book offers a fresh understanding of Wittgenstein's philosophical method and a new critique of religious discourse for those studying philosophy and religious studies Religion and the Hermeneutics of Contemplation D. Z. Phillips, 2001-07-26 Leading philosopher of religion D Z Phillips examines the conceptual assumptions of atheistic thought Gregory W. Dawes, 2012-09-10 In this timely study Dawes defends the methodological naturalism of the sciences Though religions offer what appear to be explanations of various facts about the world the scientist as scientist will not take such proposed explanations seriously Even if no natural explanation were available she will assume that one exists Is this merely a sign of atheistic prejudice as some critics suggest Or are there good reasons to exclude from science explanations that invoke a supernatural agent On the one hand Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the conditions under which this would be true are unlikely ever to be fulfilled On the other hand he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue **Philosophy of Religion: An Introduction** Michael B. Wilkinson, 2010-04-08 God, Reason, and Theistic Proofs Stephen T. Davis, 1997 Wisely structured and clearly written God Reason and Theistic Proofs will make an excellent resource for those looking for an introduction to the debate surrounding the existence of God or for those seeking intellectual validation for their faith D.Z. Phillips' Contemplative **Philosophy of Religion** Andy F. Sanders, 2016-05-13 This collection presents a critical discussion and exploration of the late D Z Phillips contemplative approach in the philosophy of religion What are the main characteristics of this ground breaking approach which is inspired by thinkers like Kierkegaard and Wittgenstein and meant as a serious critical alternative to the mainstream way of doing philosophy of religion What is its aim if it is deliberately avoiding apology and defence of faith How does Phillips approach relate to systematic historical and empirical theology and is it really as neutral as he claims it to be Or is he perhaps a certain kind of theologian What are the implications of his contemplative philosophy for central issues of religious life today such as petitionary prayer the hope of eternal life and radical religious diversity. The essays of six distinguished scholars from five different nations critically and sympathetically address these questions and are responded to by Phillips in essays of his own written briefly before his sudden death in July 2006 The Non-religion of the Future The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Jean-Marie Guyau, 1897 Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion

when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony I Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion Scientific Explanation and Religious Belief Michael G. Parker, Thomas M. Schmidt, 2005 Contributions from an international conference held December 11 13 2002 at the Institute for Philosophy of Religion at the Johann Wolfgang Goethe University in Frankfurt The Territories of Human Reason Alister E. McGrath, 2019 The Territories of Human Reason is the first major study to explore the emergence of multiple situated rationalities It focuses on the relation of the natural sciences and Christian theology but its approach can easily be extended to other disciplines Faith after Foundationalism D.Z. Phillips, 2013-05-02 Foundationalism is the view that philosophical propositions are of two kinds those which need supporting evidence and those which in themselves provide the evidence which renders them irrefutable This book originally published 1988 describes the battle between foundationalism which places belief in God in the first category and various other approaches to the problem of faith Reformed Epistemology hermeneutics and sociological analysis In the concluding section of the book an examination of concept formation in religious belief is used to reinterpret the gap between the expressive power of language and the reality of God **Grammars of Faith** P. F. Bloemendaal, 2006 D Z Phillips is a leading figure in advocating a Wittgensteinian approach to the philosophical study of religion His writings exert an important influence on contemporary philosophy of religion giving a new direction to the philosophical discussion of religious belief and practice Although his work has prompted much often critical comment a thorough investigation has not been forthcoming Grammars of Faith fills that gap The book pays close attention to Wittgenstein's own remarks on religious belief arranging them against the background of his broader philosophical methodology as well as to the efforts of the early Wittgensteinians at providing a more comprehensive Wittgensteinian philosophy of religion Central to this study are Phillips's understanding of philosophical enquiry as a form of contemplation and his descriptive accounts of religious belief By means of a careful and methodical examination of Phillips s oeuvre the study seeks to present a fair assessment of Phillips s position showing not only its weaknesses but also its strength

Scientific Theology: Theory Alister E. McGrath,2007-01-23 The third volume of an extended and systematic exploration of the relation between Christian theology and the natural sciences focussing on the origins and place of theory in Christian theology Scientific Theology: Theory Alister E. McGrath,2006-11-23 Noting the important parallels between scientific theory and Christian doctrine McGrath offers a sustained defense of the necessity of doctrine within Christian theology

against those who argue for a non dogmatic Christianity The approach developed within this volume builds on the work of writers such as Heidegger and Habermas and argues that theory is to be conceived in terms of the communal beholding of reality The many theoretical issues to be addressed in this volume include the manner in which closure is secured in theological theorizing the implications of the stratification of reality for its representation the place of metaphysics in Christian theology and the nature of revelation itself Viewed as a whole Theory represents a fresh evaluation of the origins and place of theory in Christian theology which is certain to provoke discussion and debate This third volume completes the A Scientific Theology series A Scientific Theology is a groundbreaking work of systematic theology in three volumes Nature Reality and Theory Now available as a three volume set D. Z. Phillips on Religious Language, Religious Truth, and God Hyoseok Kim, 2022-02-25 D Z Phillips 1934 2006 was one of the most influential ingenious and perhaps controversial thinkers in the Anglo American philosophy of religion In particular he is widely regarded as a leading proponent of a Wittgensteinian approach to the philosophy of religion While almost every book on religious language or Anglophone philosophy of religion deals with Phillips thought or at least mentions his name all too frequently his position has been grossly misunderstood and has often attracted unwarranted criticism from various sides Seeking to offer a constructive presentation and critical discussion of Phillips view of philosophy religious language religious truth and God Hyoseok Kim endeavors to resolve some misunderstandings refute undue criticisms of Phillips position and make some suggestions concerning directions in which his view might and ought to be further developed OCR Religious Studies A Level Year 1 and AS Hugh Campbell, Michael Wilkinson, Michael Wilcockson, 2016-12-12 Exam Board OCR Level A Level Subject Religious Studies First Teaching September 2016 First Exam Spring 2017 An OCR endorsed textbook Help students to build their subject knowledge and understanding with guidance and assessment preparation from a team of subject specialists brought to you by the leading Religious Studies publisher and OCR s Publishing Partner Develops students understanding of Philosophy of religion and Religion and ethics through accessible explanations of key theories and terms Enables you to teach Developments in Christian thought confidently with comprehensive coverage of the key theological arguments Supports assessment preparation with sample questions and revision advice written by subject specialists Encourages students to reflect on their learning and develop their own ideas Helps to extend learning and enhance responses with suggested ideas and additional reading Content covered Philosophy of religion Religion and ethics Developments in Christian thought
