Religious Function Of The Psyche:

The Religious Function of the Psyche Lionel Corbett,1996 The book offers an alternative approach to spirituality that can be applied in psychotherapeutic and everyday life It also serves as an introduction to Jung and religion The Feminine in Jungian Psychology and in Christian Theology Ann Belford Ulanov,1971 The Feminine in Jungian Psychology and in Christian Theology investigates the implications for Christian theology of Jung s special insights into the feminine In it Ann Belford Ulanov gathers together in one volume what Jung and Jungians have discovered about the feminine in order to explore what Jungian thought and methods may illuminate about the place of the feminine in Christian theology Jung focuses on the human person and sees as central its mixture of masculine and feminine elements In a time when so much is asserted and written about women in society their rights roles identities needs and contributions it is especially significant that Jung asserts the existence of the feminine as a key element not only in women but in men as well No less contested are the roles and identities of Christians Ulanov brings into focus the deep and fascinating connections between theology and psychology

The Religious Function of the Psyche and Its Implications for Counseling from a Christian Perspective N. Douglas Wiegand,1982 Ego and Archetype Edward F. Edinger,2017-02-28 A medical psychiatrist and founding member of the Jung Foundation explores a pivotal part of analytical psychology encountering the self through individuation This book is about the individual s journey to psychological wholeness known in analytical psychology as the process of individuation Edward Edinger traces the stages in this process and relates them to the search for meaning through encounters with symbolism in religion myth dreams and art For contemporary men and women Edinger believes the encounter with the self is equivalent to the discovery of God The result of the dialogue between the ego and the archetypal image of God is an experience that dramatically changes the individual s worldview and makes possible a new and more meaningful way of life

Psyche and the Sacred Lionel Corbett,2006-09-30 This book describes an approach to spirituality that is based on personal experience of the sacred rather than upon any pre existing religious doctrine or dogma Using the language and insights of depth psychology it describes the intimate relationship between sacred experience and the psychology of the individual revealing the seamless continuity of personal and transpersonal levels of the psyche This work contributes to the emergence of the new myth that is arising alongside the Judeo Christian tradition **Ego & Archetype** Edward F. Edinger,1992 **The Handbook of Jungian Psychology** Renos K. Papadopoulos,2012-10-12 The field of Jungian psychology has been growing steadily over the last twenty years and awareness is increasing of its relevance to the predicaments of modern life Jung appeals not only to professionals who are looking for a more humane and creative way of working with their clients but also to academics in an increasingly wide range of disciplines This Handbook is unique in presenting a clear comprehensive and systematic exposition of the central tenets of Jung s work which has something to offer to both specialists and those seeking an introduction to the subject Internationally recognised experts in Jungian Psychology

cover the central themes in three sections Theory Psychotherapy Applications Each chapter begins with an introduction locating the topic in the context of Jung s work as a whole before moving on to an investigation of contemporary developments and concluding by demonstrating how Jung s theories continue to evolve and develop through their practical therapeutic applications The Handbook of Jungian Psychology is the definitive source of authoritative information on Jungian psychology for Jungian analysts psychotherapists counsellors and related professionals It will be an invaluable aid to those involved in Jungian academic studies and related disciplines **Dreaming about the Divine** Bonnelle Lewis Strickling, 2012-02-01 In Dreaming about the Divine Bonnelle Lewis Strickling argues that people dream about the divine in forms that fit their current emotional and spiritual condition Using Jungian psychology and the philosophy of Karl Jaspers Strickling contends that dreams about the divine occur in the context of existential issues psychic and emotional crises which open us to the experience of the divine She concludes that working with dreams of the divine can be spiritually psychically and emotionally helpful both to people who are engaged in a spiritual search and also to people who are already committed to a spiritual tradition Subjectivity, the Unconscious and Consumerism Marlon Xavier, 2018-09-17 Subjectivity the Unconscious and Consumerism is a unique and imaginative psycho sociological exploration of how postmodern contemporary consumerism invades and colonises human subjectivity Investigating especially consumerism s unconscious aspects such as desires imagination and fantasy it engages with an extensive analysis of dreams The author frames these using a synthesis of Jungian psychology and the social imaginaries of Baudrillard and Bauman in a dialogue with the theories of McDonaldization and Disneyization The aim is to broaden our understanding of consumerism to include the perennial consumption of symbols and signs of identity a process which is the basis for the fabrication of the commodified self The book offers a profound innovative critique of our consumption societies challenging readers to rethink how we live and how our identities are impacted by consumerism As such it will be of interest to students and scholars of critical psychology psychoanalysis sociology anthropology and cultural studies but is also accessible to anyone interested in the complex psychology of contemporary subjectivity Ego and Archtype ,1973 When Sickness Heals Siroj Sorajjakool, 2006-04 In When Sickness Heals Dr Siroj Sorajjakool draws on more than ten years of studies on health benefits in relation to spirituality especially focusing on the function of meaning He expounds on his theory that healing is primarily the function of meaning and meaning transcends sickness and even death itself He concludes that what people ultimately seek in life is the healing of their souls Sorajjakool brings many Eastern and Western resources to his conversation on health meaning and healing He incorporates the perspectives of theologians and philosophers like Paul Tillich Carl Jung S ren Kierkegaard Raimundo Panikkar Dietrich Bonhoeffer and John Macquarrie as well as references to religious texts including yin and yang and alchemy A clear distinct understanding of spirituality in clinical contexts is presented with an argument for the role of meaning in the healing process based on evidence that there may be healing even in the face of death Sorajjakool identifies

the transitional processes people may go through as they seek to make sense of their experiences during a health crisis He suggests an alternative approach to spiritual assessment and provides methods of spiritual care that speak to the soul

The Sacred Cauldron Lionel Corbett, 2011 At a time when psychotherapy seems to be a purely secular pursuit with no connection to the sacred The Sacred Cauldron makes the startling claim that for both participants psychotherapeutic work is actually a spiritual discipline in its own right The psyche manifests the sacred and provides the transpersonal field within which the work of therapy is carried out This book demonstrates some of the ways in which a spiritual sensibility can inform the technical aspects of psychotherapy The Sacred Cauldron is truly a book to be read by both therapists and non therapists for it offers a thoughtful intelligent sensitive passage through the spiritual quarrels and complexities of our time and addresses our common summons which is to treat the life of the spirit with the respect the gravity and the centrality it deserves This book is instructive to all for Corbett not only marshals a wealth of scholarship and clinical experience but also expresses challenging insights through a calm reasonable and commonsense appeal After this book the reader will be more thoughtful more considered more sophisticated more appreciative of the importance of therapy as a vehicle for healing and for engaging the numinous James Hollis Ph D Jungian analyst and author of What Matters Most Living a More Considered Life Dr Lionel Corbett trained in medicine and psychiatry in England and as a Jungian analyst at the C G Jung Institute of Chicago He is currently on the core faculty of Pacifica Graduate Institute in Santa Barbara California and the author of The Religious Function of the Psyche and the ways in which this function expresses itself through the structures of personality

The author merges Terrence Dawson's literary theory concerning the discernment of the effective protagonist of a narrative with Jungian's method of dream interpretation to analyze the text subjectively from the effective protagonist s point of view The author then extrapolates the book s contents onto a hypothetical historical situation to contextualize the book within the Jewish identity and uses her findings to Consciousness in Jung and Patañjali Leanne Whitney, 2017-08-03 The East West dialogue conduct objective analysis increasingly seeks to compare and clarify contrasting views on the nature of consciousness For the Eastern liberatory models where a nondual view of consciousness is primary the challenge lies in articulating how consciousness and the manifold contents of consciousness are singular Western empirical science on the other hand must provide a convincing account of how consciousness arises from matter By placing the theories of Jung and Pata jali in dialogue with one another Consciousness in Jung and Pata jali illuminates significant differences between dual and nondual psychological theory and teases apart the essential discernments that theoreticians must make between epistemic states and ontic beliefs Pata jali s Classical Yoga one of the six orthodox Hindu philosophies is a classic of Eastern and world thought Pata jali teaches that notions of a separate egoic I are little more than forms of mistaken identity that we experience in our attempts to take ownership of consciousness Carl Jung s depth psychology which remains deeply influential to psychologists religious scholars and artists alike argues that ego consciousness developed out of the unconscious over the course of evolution By exploring the work of key theoreticians from both schools of thought particularly those whose ideas are derived from an integration of theory and practice Whitney explores the extent to which the seemingly irremediable split between Jung and Pata jali s ontological beliefs can in fact be reconciled This thorough and insightful work will be essential reading for academics theoreticians and postgraduate students in the fields of psychology philosophy of science and consciousness studies It will
