Religious Giving And The Invention Of Karma In Theravada Buddhism:

Religious Giving and the Invention of Karma in Theravada Buddhism James Egge, 2013-12-16 Demonstrates that Buddhists appropriated the practice vocabulary and ideology of sacrifice from Vedic religion and discusses the relationship of this sacrificial discourse to ideas of karma in the Pali canon and in early Buddhism Proselytizing and the Limits of Religious Pluralism in Contemporary Asia Juliana Finucane, R. Michael Feener, 2013-10-21 This volume brings together a range of critical studies that explore diverse ways in which processes of globalization pose new challenges and offer new opportunities for religious groups to propagate their beliefs in contemporary Asian contexts Proselytizing tests the limits of religious pluralism as it is a practice that exists on the border of tolerance and intolerance The practice of proselytizing presupposes not only that people are freely choosing agents and that religion itself is an issue of individual preference At the same time however it also raises fraught questions about belonging to particular communities and heightens the moral stakes in involved in such choices In many contemporary Asian societies questions about the limits of acceptable proselytic behavior have taken on added urgency in the current era of globalization Recognizing this the studies brought together here serve to develop our understandings of current developments as it critically explores the complex ways in which contemporary contexts of religious pluralism in Asia both enable and are threatened by projects of proselytization

Sovereignty and the Sacred Robert A. Yelle,2018-11-26 Sovereignty and the Sacred challenges contemporary models of polity and economy through a two step engagement with the history of religions Beginning with the recognition of the convergence in the history of European political theology between the sacred and the sovereign as creating states of exception that is moments of rupture in the normative order that by transcending this order are capable of re founding or remaking it Robert A Yelle identifies our secular capitalist system as an attempt to exclude such moments by subordinating them to the calculability of laws and markets The second step marshals evidence from history and anthropology that helps us to recognize the contribution of such states of exception to ethical life as a means of release from the legal or economic order Yelle draws on evidence from the Hebrew Bible to English deism and from the Aztecs to ancient India to develop a theory of polity that finds a place and a purpose for those aspects of religion that are often marginalized and dismissed as irrational by Enlightenment liberalism and utilitarianism Developing this close analogy between two elemental domains of society Sovereignty and the Sacred offers a new theory of religion while suggesting alternative ways of organizing our political and economic life By rethinking the transcendent foundations and liberating potential of both religion and politics Yelle points to more hopeful and ethical modes of collective life based on egalitarianism and popular sovereignty Deliberately countering the narrowness of currently dominant economic political and legal theories he demonstrates the potential of a revived history of religions to contribute to a rethinking of the foundations of our political and social order
