Reluctant Farmer Wendy Lewis, 2003-04-01 *The Reluctant Farmer* Wendy Lewis, 2001-01-01 **The Reluctant Farmer of Whimsey Hill** Bradford M Smith, 2016-06-29 In *The Reluctant Farmer of Whimsey Hill* opposites attract for better or for worse That is what troubles animal phobic robotics engineer Smith who just got married He learns that his bride's dream is to have a farm where there are lots of animals and she can rescue ex-race horses to retrain and find them new homes But according to a Meyers Briggs Personality Test that they took for fun their marriage is doomed There is only one problem the newlyweds took the test after the wedding Whether Smith is chasing a cow named Pork Chop through the woods with a rope getting locked in a tack room by the family pony being snubbed by his wife's dog or unsuccessfully trying to modernize their barn using the latest technology the odds are stacked against him It seems like everything with four legs is out to get him Will the animals win forcing Smith to admit defeat or will he fight to keep his family and the farm together Enjoy the true warm and frequently hilarious stories of Smith's journey along the bumpy road from his urban robotics lab to a new life on a rural Virginia farm *The Reluctant Farmer* Roy Vernon Scott, 1971 Roy Scott here surveys the rise of agricultural extension education in the United States from the 1780s to 1914 He examines in detail attempts by the farm press local agricultural clubs and societies county fairs and colleges to improve farming devices Scott shows that these otherwise useful agencies and institutions all found it nearly impossible to convince farmers of the value of science There was a stigma attached to book farming and the abundance of cheap and fertile land strengthened stubborn convictions that new techniques were unnecessary and unwise It remained for Seaman Knapp and several others to point the way through demonstration to show farmers ways to more productive agriculture The enactment of the Smith Lever Act in 1914 provided legislative founding for the expansion of the demonstration method throughout the United States **The Reluctant Farmer** Debbie S. Dougherty, 2011 There are few social issues more pressing than the seemingly disparate issues of social class and safe food At this point in history food production work and social class are intertwined in a way that puts our collective health at risk and discourse about food production has become classed language designed to show one's place in the social stratosphere Consequently this shift in the function of discourse about food production has focused attention away from the three major issues facing the farming industry First farmers need to concern themselves with feeding the world's hungry populations Second farmers need to produce healthy food Third farmers need to be able to feed their own families To illustrate the relationship between social class work and food production the author uses her own experience as an academic and a farmer as well as interviews with a family farmer an organic farmer and a family who are agribusiness farmers The author concludes that farming needs to be more diverse in order to feed hungry people around the world and produce high quality healthy food for the regional population where the food is produced Several suggestions are provided that can be used to help farmers achieve this The writer's gentle sense of humour and story telling approach make the book accessible to

a wide range of readers First it would be a useful book for advanced undergraduates studying social justice social class or organizational communication Second the book will provide the material for the high level of conversation necessary in a graduate level course Third the book will be valuable to intelligent people concerned about both social justice and healthy food production

The Reluctant Farmer of Whimsey Hill Bradford Smith, Nancy Raven Smith, Lynn Raven, 2016-07-08 In *The Reluctant Farmer of Whimsey Hill* opposites attract for better or for worse That is what troubles animal phobic robotics engineer Smith who just got married He learns that his bride s dream is to have a farm where there are lots of animals and she can rescue ex race horses to retrain and find them new homes But according to a Meyers Briggs Personality Test that they took for fun their marriage is doomed There is only one problem the newlyweds took the test after the wedding Whether Smith is chasing a cow named Pork Chop through the woods with a rope getting locked in a tack room by the family pony being snubbed by his wife s dog or unsuccessfully trying to modernize their barn using the latest technology the odds are stacked against him It seems like everything with four legs is out to get him Will the animals win forcing Smith to admit defeat or will he fight to keep his family and the farm together Enjoy the true warm and frequently hilarious stories of Smith s journey along the bumpy road from his urban robotics lab to a new life on a rural Virginia farm

Agriculture in the Midwest, 1815-1900 R. Douglas Hurt, 2023-07 2024 Jon Gjerde Prize Winner for best book in Midwestern History After the War of 1812 and the removal of the region s Indigenous peoples the American Midwest became a paradoxical land for settlers Even as many settlers found that the region provided the bountiful life of their dreams others found disappointment even failure and still others suffered social and racial prejudice In this broad and authoritative survey of midwestern agriculture from the War of 1812 to the turn of the twentieth century R Douglas Hurt contends that this region proved to be the country s garden spot and the nation s heart of agricultural production During these eighty five years the region transformed from a sparsely settled area to the home of large industrial and commercial cities including Chicago Milwaukee Cleveland and Detroit Still it remained primarily an agricultural region that promised a better life for many of the people who acquired land raised crops and livestock provided for their families adopted new technologies and sought political reform to benefit their economic interests Focusing on the history of midwestern agriculture during wartime utopian isolation and colonization as well as political unrest Hurt contextualizes myriad facets of the region s past to show how agricultural life developed for midwestern farmers and to reflect on what that meant for the region and nation

Farm and Factory Daniel Nelson, 1995-12-22 *Farm and Factory* illuminates the importance of the Midwest in U S labor history America s heartland often overlooked in studies focusing on other regions or particular cities or industries has a distinctive labor history characterized by the sustained simultaneous growth of both agriculture and industry Since the transfer of labor from farm to factory did not occur in the Midwest until after World War II industrialists recruited workers elsewhere especially from Europe and the American South The region s relatively underdeveloped service sector shaped by the presumption that goods

were more desirable than service ultimately led to agonizing problems of adjustment as agriculture and industry evolved in the late twentieth century

The Forging of Bureaucratic Autonomy Daniel Carpenter, 2020-06-16 Until now political scientists have devoted little attention to the origins of American bureaucracy and the relationship between bureaucratic and interest group politics In this pioneering book Daniel Carpenter contributes to our understanding of institutions by presenting a unified study of bureaucratic autonomy in democratic regimes He focuses on the emergence of bureaucratic policy innovation in the United States during the Progressive Era asking why the Post Office Department and the Department of Agriculture became politically independent authors of new policy and why the Interior Department did not To explain these developments Carpenter offers a new theory of bureaucratic autonomy grounded in organization theory rational choice models and network concepts According to the author bureaucracies with unique goals achieve autonomy when their middle level officials establish reputations among diverse coalitions for effectively providing unique services These coalitions enable agencies to resist political control and make it costly for politicians to ignore the agencies ideas Carpenter assesses his argument through a highly innovative combination of historical narratives statistical analyses counterfactuals and carefully structured policy comparisons Along the way he reinterprets the rise of national food and drug regulation Comstockery and the Progressive anti vice movement the emergence of American conservation policy the ascent of the farm lobby the creation of postal savings banks and free rural mail delivery and even the congressional Cannon Revolt of 1910

Dickinson Emily Dickinson, Helen Vendler, 2010-09-07 The unrivaled doyenne of close reading offers an interpretive introduction to Emily Dickinson's brilliant enigmatic verse In commentaries accompanying 150 selected poems Helen Vendler explores Dickinson's major thematic preoccupations while highlighting the poet's startling imagination and the ingenuity of her linguistic invention Roots of Reform Elizabeth Sanders, 1999-08 Offering a revision of the understanding of the rise of the American regulatory state in the late 19th century this book argues that politically mobilised farmers were the driving force behind most of the legislation that increased national control **Better Living by Their Own Bootstraps** Cherisse Jones-Branch, 2023-04-28 The first major study to consider Black women's activism in rural Arkansas *Better Living by Their Own Bootstraps* foregrounds activists' quest to improve Black communities through language and foodways as well as politics and community organizing In reexamining these efforts Cherisse Jones Branch lifts many important figures out of obscurity positioning them squarely within Arkansas's agrarian history The Black women activists highlighted here include home demonstration agents employed by the Arkansas Agricultural Cooperative Extension Service and Jeanes Supervising Industrial Teachers all of whom possessed an acute understanding of the difficulties that African Americans faced in rural spaces Examining these activists through a historical lens Jones Branch reveals how educated middle class Black women worked with their less educated rural sisters to create all female spaces where they confronted economic educational public health political and theological concerns free from white regulation and interference Centered on the period between 1914 and 1965 *Better Living by Their Own Bootstraps* brings long overdue attention to an important chapter in Arkansas history spotlighting a group of Black women activists who uplifted their communities while subverting the formidable structures of white supremacy *Regulation and the Revolution in United States Farm Productivity* Sally H. Clarke, 2002-07-25 This book explains how US government activity in the 1930s led to gains in farm productivity **Rural Worlds Lost** Jack Temple Kirby, 1986-12-01 Immediately following the Civil War and for many years thereafter southerners proclaimed a New South implying not only the end of slavery but also the beginning of a new era of growth industrialization and prosperity Time has shown that those declarations at least in terms of progress and prosperity were premature by several decades Life for an Alabama tenant farmer in 1920 did not differ significantly from the life his grandfather led fifty years earlier In fact the South remained primarily a land of poor farming folks until the 1940s Only then and after World War II did the real New South of industrial growth and urban development begin to emerge Jack Temple Kirby's massive and engaging study examines the

rural southern world of the first half of this century its collapse and the resulting modernization of southern society The American South was the last region of the Western world to undergo this process and *Rural Worlds Lost* is the first book to so thoroughly assess the profound changes modernization has wrought Kirby painstakingly charts the structural changes in agriculture that have occurred in the South and the effects these changes have had on people both at work and in the community He is quick to note that there is not just one South but many emphasizing the South's diversity not only in terms of race but also in terms of crop type and topography and the resultant cultural differences of various areas of the region He also skillfully compares southern life and institutions with those in other parts of the country noting discrepancies and similarities Perhaps even more significant however is Kirby's focus on the lives and communities of ordinary people and how they have been transformed by the effects of modernization By using the oral histories collected by WPA interviewers Kirby shows firsthand how rural southerners lived in the 1930s and what forces shaped their views on life He assesses the impact of cash upon traditional rural economies the revolutionary effects of New Deal programs on the rich and poor and the forms and cultural results of migration Kirby also treats home life recording attitudes toward marriage and sex health maintenance and class relationships not to mention sports and leisure moonshining and the southerner's longstanding love hate relationship with the mule *Rural Worlds Lost* based on exceptionally extensive research in archives throughout the South and in federal agricultural censuses definitively charts the enormous changes that have taken place in the South in this century Writing about Kirby's previous book *Media Made Dixie* Time Magazine noted Kirby's scholarship of rare lucidity That same high level of scholarship as well as an undeniable affection for the region is abundantly evident in this new path breaking book

Mama Learned Us to Work Lu Ann Jones, 2003-10-16 Farm women of the twentieth century South have been portrayed as oppressed worn out and isolated Lu Ann Jones tells quite a different story in *Mama Learned Us to Work* Building upon evocative oral histories she encourages us to understand these women as consumers producers and agents of economic and cultural change As consumers farm women bargained with peddlers at their backdoors A key business for many farm women was the butter and egg trade small scale dairying and raising chickens Their earnings provided a crucial margin of economic safety for many families during the 1920s and 1930s and offered women some independence from their men folks These innovative women showed that poultry production paid off and laid the foundation for the agribusiness poultry industry that emerged after World War II Jones also examines the relationships between farm women and home demonstration agents and the effect of government sponsored rural reform She discusses the professional culture that developed among white agents as they reconciled new and old ideas about women's roles and shows that black agents despite prejudice linked their clients to valuable government resources and gave new meanings to traditions of self help mutual aid and racial uplift

Rural Democracy Marilyn P. Watkins, 2019-05-15 What happens to social movements in rural settings when they do not face the divisive issues of race and class Marilyn Watkins examines the stable political climate built by successive waves of

Populism socialism the farmer labor movement and the Grange in turn of the century western Washington She shows how all of these movements drew upon the same community base empowered farmers and encouraged them in the belief that democracy independence and prosperity were realizable goals Indeed they were in a setting where agriculture was diversified farmers were debt free and critically women enjoyed equal status as activists in social movements Rural Democracy illuminates the problems that undermined Populism and other forms of rural radicalism in the South and the Midwest by demonstrating the political success of those movements where such problems were notably absent in Lewis County Washington By so doing Watkins convincingly demonstrates the continuing value of local community studies in understanding the large scale transformations that continue to sweep over rural America

Women in Utah History

Patricia Lyn Scott,Linda Thatcher,2005-11-15 A project of the Utah Women s History Association and cosponsored by the Utah State Historical Society Paradigm or Paradox provides the first thorough survey of the complicated history of all Utah women Some of the finest historians studying Utah examine the spectrum of significant social and cultural topics in the state s history that particularly have involved or affected women
