## **Rem Koolhaas Conversations With Students:**

**Rem Koolhaas** Rem Koolhaas, Lynn Fitzpatrick, Doug Hofius, 1991      Rem Koolhaas Rem Koolhaas, 1996      *Rem Koolhaas* Rem Koolhaas, 1991      **Rem Koolhaas, OMA + AMO / Spaces for Prada** Rem Koolhaas, 2021 Source Books in Architecture No 14 Rem Koolhaas OMA AMO Spaces for Prada is the most recent volume in the Source Books in Architecture series Among the topics discussed in the book are the long standing relationship with Prada and how the early objectives in that relationship have both maintained and shifted An underlying theme to the conversations held with students and faculty of the Knowlton School community is the topic of architect client relationships their history their problems and how they have contributed to the discipline over time Explicitly a focus of the conversation is a number of projects that OMA has developed or completed with Prada a large number of which are installation scale environments that manifest in the form of runway shows and exhibitions The challenge of such projects is to retain a commitment to the political and cultural agenda that OMA embeds in the larger and permanent buildings Given the ephemerality and role of these environments as literal backgrounds to highlighted events the projects are ideal scenarios in which to develop an architecture that lacks the permanence of buildings while still carrying potency and contributing to larger cultural discussions involving for example event place concept product staging the crowd lighting and materiality Source Books in Architecture No 14 contains project documentation from the OMA and Prada archives transcripts from Koolhaas conversations with students at the Knowlton School at The Ohio State University and commentary and critique from architects critics and theorists      *Hotel Lobbies and Lounges* Tom Avermaete, Anne Massey, 2013-01-25 This series investigates the historical theoretical and practical aspects of interiors The volumes in the Interior Architecture series can be used as handbooks for the practitioner and as a critical introduction to the history of material culture and architecture Hotels occupy a particular place in popular imagination As a place of exclusive sociability and bohemian misery a site of crime and murder and as a hiding place for illicit liaison the hotel has embodied the dynamism of the metropolis since the eighteenth century This book explores the architectural significance of hotels throughout history and how their material construction has reflected and facilitated the social and cultural practices for which they are renowned Contemporary developments in the planning and design of hotels are addressed through a series of interviews and case studies Illustrated throughout this book is an innovative and important contribution to architectural and interior design theory literature      **Architecture, Ethics and Globalization** ,      *The Contested Territory of Architectural Theory* Elie G. Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice Offering critical assessment in the face of major social and environmental issues of today 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics gender representation race environmental crisis and history The chapters are grouped into two distinct sections the first section

explores various historical perspectives on architectural theory mapping theory's historiographical turn and its emergence and decline from the 1960s to the present the second offers alternative visions and new directions for architectural theory incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects

**Take One Building : Interdisciplinary Research Perspectives of the Seattle Central Library** Ruth Conroy Dalton, Christoph Hölscher, 2016-11-25 This book evaluates how we experience and understand buildings in different ways depending upon our academic and professional background With reference to Rem Koolhaas Seattle Central Library the book illustrates a range of different methods available through its application to the building By seeing such a variety of different research methods applied to one setting it provides the opportunity for researchers to understand how tools can highlight various aspects of a building and how those different methods can augment or complement each other Unique to this book are contributions from internationally renowned academics from fields including architecture ethnography architectural criticism phenomenology sociology environmental psychology and cognitive science all of which are united by a single real world application the Seattle Central Library This book will be of interest to architects and students of architecture as well as disciplines such as ethnography sociology environmental psychology and cognitive science that have an interest in applying research methods to the built environment

*Utopias and Architecture* Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper-modern stance and orthodox modernist architecture

**Architecture as Cultural and Political Discourse** Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce

people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Konigsplatz Auschwitz concentration camp and the Prora resort Sydney s suburban race riots and the Australian Immigration Detention Centre on Christmas Island **Rem Koolhaas** ,2003 New SubUrbanisms Judith K De Jong,2013-09-11 Historically we see the city as the cramped crumbling core of development and culture and the suburb as the vast outlying wasteland convenient but vacant Contemporary urban design proves this wrong In New SubUrbanisms Judith De Jong explains the on going flattening of the American Metropolis as suburbs are becoming more like their central cities and cities more like their suburbs through significant changes in spatial and formal practice as well as demographic and cultural changes These revisionist practices are exemplified in the emergence of hybrid sub urban conditions such as parking practices the residential densification of suburbia hyper programmed public spaces and inner city big box retail among others Each of these hybridized conditions reflects to varying degrees the reciprocating influences of the urban and the suburban Each also offers opportunities for innovation in new formal and spatial practices that re configure conventional understandings of urban and suburban and in new ways of forming the evolving American metropolis Based on this new understanding De Jong argues for the development of new ways of building the city Aimed at students and practitioners of urban design and planning New SubUrbanisms attempts to re frame the contemporary metropolis in a way that will generate more instrumental engagement and ultimately better design *The Routledge Companion to Dramaturgy* Magda Romanska,2014-08-07 Dramaturgy in its many forms is a fundamental and indispensable element of contemporary theatre In its earliest definition the word itself means a comprehensive theory of play making Although it initially grew out of theatre contemporary dramaturgy has made enormous advances in recent years and it now permeates all kinds of narrative forms and structures from opera to performance art from dance and multimedia to filmmaking and robotics In our global mediated context of multinational group collaborations that dissolve traditional divisions of roles as well as unbend previously intransigent rules of time and space the dramaturg is also the ultimate globalist intercultural mediator information and research manager media content analyst interdisciplinary negotiator social media strategist This collection focuses on contemporary dramaturgical practice bringing together contributions not only from academics but also from prominent working dramaturgs The inclusion of both means a strong level of engagement with current issues in dramaturgy from the impact of social media to the ongoing centrality of interdisciplinary and intermedial processes The contributions survey the field through eight main lenses world dramaturgy and global perspective dramaturgy as function verb and skill dramaturgical leadership and season planning production dramaturgy in translation adaptation and new play development interdisciplinary dramaturgy play analysis in postdramatic and new media dramaturgy social media and audience outreach Magda Romanska is Visiting Associate Professor of Slavic

Languages and Literatures at Harvard University Associate Professor of Theatre and Dramaturgy at Emerson College and Dramaturg for Boston Lyric Opera Her books include *The Post Traumatic Theatre of Grotowski and Kantor* 2012 *Boguslaw Schaeffer An Anthology* 2012 and *Comedy An Anthology of Theory and Criticism* 2014 *Writing Urbanism* Douglas Kelbaugh, Kit McCullough, 2008-05-17 A carefully crafted reader which represents the discipline's best thinking and promotes an understanding of the principles of urban design *Writing Urbanism* is the ideal volume for both architects and urban designers

39 Microlectures Matthew Goulish, 2002-01-04 A series of accidents has brought you this book You may think of it not as a book but as a library an elevator an amateur performance in a nearby theatre Open it to the table of contents Turn to the page that sounds the most interesting to you Read a sentence or two Repeat the process Read this book as a creative act and feel encouraged

39 Microlectures In *Proximity of Performance* is a collection of miniature stories parables musings and thinkpieces on the nature of reading writing art collaboration performance life death the universe and everything It is a unique and moving document for our times full of curiosity and wonder thoughtfulness and pain Matthew Goulish founder member of performance group Goat Island meditates on these and other diverse themes proving along the way that the boundaries between poetry and criticism and between creativity and theory are a lot less fixed than they may seem The book is revelatory solemn yet at times hilarious and genuinely written to inspire or perhaps provoke creativity and thought

Interdisciplinary Design Hanif Kara, 2022-03-07 Architects and engineers both claim to be designers though how they define design and the approaches they use to realize it vary widely However their interaction has also created some of the world's most memorable enduring and impressive buildings The unprecedented impact of digital technologies illuminates the complexity and non linearity of the process that these designers go through while massively expanding both the ability to visualize and represent forms and to analyze their structural behavior It has obviously changed both architecture and engineering and so also the potential for interaction between them *Interdisciplinary Design* began as a course at Harvard GSD attended by graduate students in architecture and also by MIT graduate students in structural engineering and computation In this course students and instructors examined a series of built projects in order to develop new viewpoints and communication across disciplinary boundaries in teaching practice and construction

Rethinking the Meaning of Place Lineu Castello, 2016-03-23 The spread of newly invented places such as theme parks shopping malls and revamped historic areas necessitates a redefinition of the concept of place from an architectural perspective In this interdisciplinary work these invented places are categorized according to the different phenomenological experiences they are able to provide The book explores how such cloning spaces use placemaking and placemarketing in attempt to replicate the characteristics found in urban spaces traditionally viewed as successful and how these places can affect society's environmental perception A range of international empirical studies illustrates how such invented places can be perceived as legitimate urban spaces and contribute towards the quality of life in today's cities

**Matters of Revolution** Dominik Bartmanski, 2022-03-30 Symbols

matter and especially those present in public spaces but how do they exert influence and maintain a hold over us Why do such materialities count even in the intensely digitalized culture This book considers the importance of urban symbols to political revolutions examining manifold reasons for which social movements necessitate the affirmation or destruction of various material icons and public monuments What explains variability of life cycles of certain classes of symbols Why do some of them seem more potent than others Why do people exhibit nostalgic attachments to some symbols of the controversial past and vehemently oppose others What nourishes and threatens the social life of icons Through comparative analyses of major iconic processes following the epochal revolution of 1989 in Berlin and Warsaw the book argues that revolutionary action needs objects and sites which concretize the transformative redrawing of the symbolic boundaries between the sacred and profane good and evil before and after and progressive and reactionary the symbolic shifts that every revolution implies in theory and formalizes in practice Public symbols ensconced within actual urban spaces provide indispensable visibility to human values and social changes As affective topographies that externalize collective feelings their very presence and durability is meaningful and so are the revolutionary rituals of preservation and destruction directed at those spaces Far from being mere gestures or token signifiers they have their own gravity with profound cultural ramifications This volume will appeal to sociologists anthropologists geographers and social theorists with interests in urban studies public heritage material culture political revolution and social movements
