Remaking The Body Explorations In Embodiment:

Remaking the Body Wendy Seymour, 2012-11-12 In *Remaking the Body* Wendy Seymour interviews men and women who have suffered profound bodily paralysis and explores how they deal with their appearance relationships sexuality incontinence and sport She finds that even major impairment hasn't annihilated these people's experience of an embodied self She shows that the process of self reconstruction is interwoven with social expectations and argues that the experience of disability highlights the continuous work involved in embodiment for everyone *Remaking the Body* is a major contribution to the field of the sociology of the body and essential reading for rehabilitation professionals and students *Remaking the Body* Wendy Seymour, 1995

Remaking Humanity Adam Beyt, 2024-08-22 Drawing upon Edward Schillebeeckx's theology and Judith Butler's philosophy Adam Beyt uses the framework of nonviolent hope to construct a Catholic political theology responding to dehumanizing violence Dehumanizing violence names words institutions or acts violating the inherent dignity of being made in the image and likeness of God Theology can participate in dehumanizing violence by claiming an uninterrogated universality that marginalizes bodies due to their perceived differences such as gender race sexuality or ability The book's constructive project integrates Schillebeeckx's and Butler's thought with queer theory and phenomenology to model embodiment as an enfleshing dynamism between bodies and signification The text then posits Catholic discipleship as incarnating hope by defending the humanum the new humanity announced through God's Reign Combining reflections from Schillebeeckx and Butler this hope centers discipleship as nonviolent world building Concluding with a sustained reflection with the writings of Franz Fanon and Walter Benjamin the final chapter sketches a Catholic solidaristic response to contemporary struggles against the necropolitics of colonizing and state violence through assemblies of hope

The Sociology of the Body Kate Cregan, 2006-03-31 Through a provocative analysis this book contextualizes explicates and critically analyses the work of those key theorists and texts that have been most influential in refocusing our gaze on human embodiment Upon this foundation the author builds her own distinctive theoretical framework towards the analysis of embodiment This is a valuable addition to the field of body studies Chris Shilling University of Kent Over the last 20 years the social sciences have witnessed a remarkable interdisciplinary surge of interest in the body The latter is now recognized as a core concept and is the subject of intensive study at undergraduate and postgraduate levels But how can we map this work What are the contributions and differences of the various approaches This lucid and authoritative text Provides a critical evaluation of the work of Elias Aries Foucault Bourdieu Mary Douglas Kristeva Butler Haraway and Bordo Guides the reader through the interdisciplinary influence of these ideas Gives a clear and compelling analysis of the significance of the turn towards the body Explains the complex way in which embodiment is formed across different social formations Clearly organized and powerfully expressed the book provides the best available guide to the turn to the body in the social sciences

reproductive loss as she re conceives theology from the perspective of the miscarrying person Offering a fresh original and creative approach to theology O Donnell explores the complexity of the miscarrying body and its potential for theological revelation She offers a re conception of theologies of providence prayer hope and the body as she reimagines theology out of these messy origins This book is for those who have experiences such losses and those who minister to them But it is also for all those who want to encounter a creative and imaginative approach to theology and the life of faith in our messy complex world

Reading Embodied Citizenship Emily Russell, 2011-02-25 Liberal individualism a foundational concept of American politics assumes an essentially homogeneous population of independent citizens When confronted with physical disability and the contradiction of seemingly unruly bodies however the public searches for a story that can make sense of the difference The narrative that ensues makes abnormality an important part of the dialogue about what a genuine citizen is though its role is concealed as an exception to the rule of individuality rather than a defining difference *Reading Embodied Citizenship* brings disability to the forefront illuminating its role in constituting what counts as U S citizenship Drawing from major figures in American literature including Mark Twain Flannery O Connor Carson McCullers and David Foster Wallace as well as introducing texts from the emerging canon of disability studies Emily Russell demonstrates the place of disability at the core of American ideals The narratives prompted by the encounter between physical difference and the body politic require a new understanding of embodiment as a necessary conjunction of physical textual and social bodies Russell examines literature to explore and unsettle long held assumptions about American citizenship

Being and Dwelling through Tourism Catherine Palmer, 2017-11-06 Much of the existing literature seeks to make sense of tourism based on singular approaches such as visibility identity mobility performance and globalised consumption What is missing however is an overarching framework within which these valuable approaches can be located This book offers one such framework using the concept of dwelling taken from Heidegger and Ingold as the starting point from which to consider the interrelatedness of being dwelling and tourism The anthropological focus at the core of the book is infused with multidisciplinary perspectives that draw on a variety of subjects including philosophy material cultural studies and cultural geography The main themes include sensuous material architectural and earthly dwelling and each chapter features a discussion of the unifying theoretical framework for each theme followed by an illustrative focus on specific aspects of tourism This theoretically

substantive book will be of interest to anyone involved with tourism research from a wide range of disciplines including anthropology sociology geography cultural studies leisure studies and tourist studies

The Individual and Utopia Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual's relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world *The Individual and Utopia* enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature

Sports, Religion and Disability Nick J. Watson, Andrew Parker, 2016-04-14 This ground breaking book provides a fascinating insight into the relationship between sports and leisure religion and disability In the shadow of the London 2012 Olympic and Paralympic Games at which athletes that were both able bodied and disabled provided an extravaganza of sporting excellence and drama this text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research i disability sport and ii the theology of disability Many of the elite athletes at this global sporting mega event often explicitly displayed their religious beliefs and in turn their importance in the context of sport by observing different religious rituals and or utilising the multi faith sports chaplaincy service This raises a whole range of unanswered questions with regard to the intersections between sports religion and disability which to date has been under researched Examples of subjects addressed in this text include elite physical disability sport Paralympics intellectual disability sport Special Olympics reflections on the illness narrative of the cyclist Lance Armstrong through the lens of the theology of radical orthodoxy the application of biblical athletic metaphors in understanding modern conceptions of disability sport the role of sport and spirituality in the rehabilitation of injured British Military personnel and the importance of sports and leisure in L Archa communities This book begins a critical conversation on these topics and many others for both researchers and practitioners This book was based on two special issues of the *Journal of Religion Disability and Health*
