Remembering The Body:

ReMembering the Body Gabriele Brandstetter, Hortensia Völckers, 2000 This text and picture book designed by Bruce Mau reflects the myriad issues surrounding representations and concepts of the body focusing on the body in movement ReMembering the Body is dedicated to dance the experimental territory par excellence of the moving body and explores a variety of topics such as choreography in the cinema choreography and spatial concepts the aesthetics of violence and subversion in both the sciences and the arts and notions of the body as a machine and as an animalistic organism Texts by cultural critics such as Fredrich Kittler and Mau's picture essay combine to present fragments of the pictorial dismemberment of the body as a vivid history of movement Arrestingly and uniquely designed ReMembering the Body is an ideal and thoroughly indexed reference work as well as an important cultural document

Remembering the Body Trenea Orchard, 2016-12-01 This volume explores the arts based methodology of body mapping a participant driven approach wherein people create richly illustrated life size maps that articulate their embodied experiences with various health issues First developed in the global South as a means of community mobilization and advocacy regarding women's health and HIV related care needs body mapping is now used by researchers health practitioners and community agencies globally to explore social determinants of health among diverse groups However the selective borrowing of certain tenets of the approach and the disregard for others in these studies raises the issue of cultural appropriation and this is one of the key issues the explored The second issue examined relates to the analysis of body mapping data which remains an under developed aspect of the methodology that the author addresses through the new mixed method approach she created to more fully understand these arts based data Orchard also examines and seeks to explain the transformative nature of the body mapping research experience for herself and the study participants The data for this book come from an ethnographic study with HIV positive women and men who struggle with addictions HIV stigma and historical traumas stemming from colonialism in two Canadian cities including the beautiful body maps individual interviews and field notes The author provides a compelling and deeply empathetic account of the powerful role that the arts therapeutic practice and human connection play in the production of research that yields rich data and can transform the lives of those involved Remembering the Body will be of interest to social science and health scholars community agencies and those in activist circles who are interested in using body mapping in their mindful academic and applied work

The Body Yasuo Yuasa, 1987-07-01 This book explores mind body philosophy from an Asian perspective It sheds new light on a problem central in modern Western thought Yuasa shows that Eastern philosophy has generally formulated its view of mind body unity as an achievement a state to be acquired rather than as essential or innate Depending on the individual's own developmental state the mind body connection can vary from near dissociation to almost perfect integration Whereas Western mind body theories have typically asked what the mind body is Yuasa asks how the mind body relation varies on a

spectrum from the psychotic to the yogi from the debilitated to the athletic from the awkward novice to the master musician Yuasa first examines various Asian texts dealing with Buddhist meditation kundalini yoga acupuncture ethics and epistemology developing a concept of the dark consciousness not identical with the psychoanalytic unconscious as a vehicle for explaining their basic view He shows that the mind body image found in those texts has a striking correlation to themes in contemporary French phenomenology Jungian psychoanalysis psychosomatic medicine and neurophysiology The book clears the ground for a provocative meeting between East and West establishing a philosophical region on which science and religion can be mutually illuminating

Postcommunism and the Body Politic Ellen E. Berry, 1995-07 The epidemic of mass rape in the former Yugoslavia has illustrated once again and in particularly brutal fashion the inextricable relationship between national politics sexual politics and body politics The nexus of these three forces is highly charged in any culture at any time in history but especially so among cultures in which rapid even cataclysmic changes in material realities and national self conceptions are eroding or overwhelming previously secure boundaries The postcommunist moment in the so called Second World Central and Eastern Europe and the former Soviet Union has dramatically exposed the opportunities and dangers that arise when the political cultural and economic foundations of a society are de and then re structured Gender roles and relations expressions of sexuality or attempts to recontain them representations of the body especially the female body and the larger cultural meanings it assumes are particularly marked sites to witness the performance of complex national dramas of crisis and change This groundbreaking volume turns its attention to the Second World specifically to such subjects as the birth of the sex media and porn industry in Russia Russian women and alcoholism cinema in post communist Hungary patriotism and gender in Poland sexual dissidence in Eastern Europe and women in the former Yugoslavia go to the Genders website

Philosophy and Phenomenology of the Body M. Henry, 2012-12-06 THE SEEMING CONTINGENCY OF THE QUESTION CONCERNING THE BODY AND THE NECESSITY FOR AN ONTOLOGICAL ANALYSIS OF THE BODY When we disclose and bring forth within ontological investigations aimed at making possible the elaboration of a phenomenology of the ego a problematic concerning the body we may well seem with respect to the general direction of our analysis to elaborate only a contingent and accidental specification of such an analysis and to forget its true goal Up to the present we pursued the clarification of the being of the ego 2 on the level of absolute subjectivity and in the form of an ontological analysis Is it not possible that the reasons which motivated the project of conducting the investigations relative to the problem of the ego within a sphere of absolute immanence may cease to be valid because we might be led to believe that the body also constitutes the object of these investigations and belongs to a first reality whose study is the task of fundamental ontology Actually does not the body present itself to us as a transcendent being as an inhabitant of this world of ours wherein subjectivity does not reside If consequently the body must constitute the theme of our philosophical reflection is it not on condition that the latter submit to a radical modification and cease to be turned toward subjectivity in order to be a
