help us understand how memory works In the movie Slumdog Millionaire the childhood memories of a young game show contestant trigger his correct answers In Memento the amnesiac hero uses tattoos as memory aids In Away from Her an older woman suffering from dementia no longer remembers who her husband is These are compelling films that tell affecting stories about the human condition But what can these movies teach us about memory In this book John Seamon shows how examining the treatment of memory in popular movies can shed new light on how human memory works After explaining that memory is actually a diverse collection of independent systems Seamon uses examples from movies to offer an accessible nontechnical description of what science knows about memory function and dysfunction In a series of lively encounters with numerous popular films he draws on Life of Pi and Avatar for example to explain working memory used for short term retention He describes the process of long term memory with examples from such films as Cast Away and Groundhog Day The Return of Martin Guerre among other movies informs his account of how we recognize people the effect of emotion on autobiographical memory is illustrated by The Kite Runner Titanic and other films movies including Born on the Fourth of July and Rachel Getting Married illustrate the complex pain of traumatic memories Seamon shows us that movies rarely get

amnesia right often using strategically timed blows to the protagonist's head as a way to turn memory off and then on again as in *Desperately Seeking Susan* Finally he uses movies including *On Golden Pond* and *Amour* to describe the memory loss that often accompanies aging while highlighting effective ways to maintain memory function Memory Alan J.

Rubin, 2012-09-27 The field of autobiographical memory has made dramatic advances since the first collection of papers in the area was published in 1986

Now over 25 years on this book reviews and integrates the many theories perspectives and approaches that have evolved over the last decades A truly eminent collection of editors and contributors appraise the basic neural systems of autobiographical memory its underlying cognitive structures and retrieval processes how it develops in infancy and childhood and then breaks down in aging its social and cultural aspects and its relation to personality and the self Autobiographical memory has demonstrated a strong ability to establish clear empirical generalizations and has shown its practical relevance by deepening our understanding of several clinical disorders as well as the induction of false memories in the legal system It has also become an important topic for brain studies and helped to enlarge our general understanding of the brain **The**
