Remembering Boethius Elizabeth Elliott,2016-03-23 Remembering Boethius explores the rich intersection between the reception of Boethius and the literary construction of aristocratic identity focusing on a body of late medieval vernacular literature that draws on the Consolation of Philosophy to represent and reimagine contemporary experiences of exile and imprisonment Elizabeth Elliott presents new interpretations of English French and Scottish texts including Machaut s Confort d ami Remede de Fortune and Fonteinne amoureuse Jean Froissart s Prison amoureuse Thomas Usk s Testament of Love and The Kingis Quair reading these texts as sources contributing to the development of the reader s moral character These writers evoke Boethius in order to articulate and shape personal identities for public consumption and Elliott s careful examination demonstrates that these texts often write not one life but two depicting the relationship between poet and aristocratic patron These works associate the reception of wisdom with the cultivation of memory and in turn illuminate the contemporary reception of the Consolation as a text that itself focuses on memory and describes a visionary process of education that takes place within Boethius s own mind In asking how and why writers remember Boethius in the Middle Ages this book sheds new light on how medieval people imagined and reimagined themselves

Recommender Systems for Social Tagging Systems Leandro Balby Marinho,Andreas Hotho,Robert Jäschke,Alexandros Nanopoulos,Steffen Rendle,Lars Schmidt-Thieme,Gerd Stumme,Panagiotis Symeonidis,2012-02-10 Social Tagging Systems are web applications in which users upload resources e g bookmarks videos photos etc and annotate it with a list of freely chosen keywords called tags This is a grassroots approach to organize a site and help users to find the resources they are interested in Social tagging systems are open and inherently

social features that have been proven to encourage participation. However, with the large popularity of these systems and the increasing amount of user contributed content, information overload rapidly becomes an issue. Recommender Systems are well known applications for increasing the level of relevant content over the noise that continuously grows as more and more content becomes available online. In social tagging systems, however, we face new challenges. While in classic recommender systems the mode of recommendation is basically the resource, in social tagging systems there are three possible modes of recommendation: users, resources, or tags. Therefore, suitable methods that properly exploit the different dimensions of social tagging systems data are needed. In this book, we survey the most recent and state of the art work about a whole new generation of recommender systems built to serve social tagging systems. The book is divided into self contained chapters covering the background material on social tagging systems and recommender systems to the more advanced techniques like the ones based on tensor factorization and graph based models.

PHI THIEN CHAPTER 62 Huu Khanh, 2025-08-04 PHI THIEN CHAPTER 62 Want to see The five people saw that the whole group was looking at them and did not keep it to themselves; they all threw it out. Vice President Wu Hanshan, in charge of the eastern city, also took out the jade slip and waved it around, placing it on the table in front of them. I also have one. The master behind Wu Hanshan is the Kou family, one of the Four Heavenly Kings. Huangfu Junru took it and examined it, reading it from beginning to end. It was indeed a banquet invitation. The contents roughly said that there had been many misunderstandings in the past, hoping that from now on the evil spirits would turn into white jade, inviting shopkeeper Liao Xiuchun and shopkeeper Liao to attend the dinner party three days later. The last part of the seal was indeed Niu Youde. Huangfu Junru received this seal.
