Remnants Elyse Semerdjian,2023-08-15 A groundbreaking and profoundly moving exploration of the Armenian genocide told through the traces left in the memories and on the bodies of its women survivors Foremost among the images of the Armenian Genocide is the specter of tattooed Islamized Armenian women Blue tribal tattoos that covered face and body signified assimilation into Muslim Bedouin and Kurdish households Among Armenians the tattooed survivor was seen as a living ethnomartyr or alternatively a national stain and the bodies of women and children figured centrally within the Armenian communal memory and humanitarian imaginary In Remnants these tattooed and scar bearing bodies reveal a larger history as the lived trauma of genocide is understood through bodies skin and in what remains of those lives a century afterward bones With this book Elyse Semerdjian offers a feminist reading of the Armenian Genocide She explores how the Ottoman Armenian communal body was dis membered disfigured and later re membered by the survivor community Gathering individual memories and archival fragments she writes a deeply personal history and issues a call to break open the archival record in order to embrace affect and memory Traces of women and children rescued during and after the war are reconstructed to center the quietest voices in the historical record This daring work embraces physical and archival remnants the imprinted negatives of once living bodies as a space of radical possibility within Armenian prosthetic memory and a necessary way to recognize the absence that remains      Voicing Memories, Unearthing Identities: Studies in the Twenty-First-Century Literatures of Eastern and East-Central Europe Aleksandra Konarzewska,Anna Nakai,2023-09-12 In the region known as Eastern and East Central Europe the framework provided by memory studies became highly valuable for understanding the overload of interpretations and conflicting perspectives on events during the twentieth century The trauma of two world wars the development of collective consciousness according to national and ethnic categories stories of the trampled lands and lives of people and resistance to the rule of authoritarian and totalitarian terrors these trajectories left complex layers of identities to unfold The following volume addresses the issue of identity as a pivot in studies of memory and literature In this context it addresses the question of cultural negotiation as it took shape between memory and literature history and literature and memory and history with the help of contemporary authors and their works The authors take the literature of countries such as Estonia Poland Serbia Ukraine and Russia as the point of departure and explain its

significance in terms of geographical theoretical and thematic perspectives      **Report from the Pathological Department of Clinical Psychiatry**, 1914      **Martyrdom and Memory** Elizabeth Anne Castelli, 2004 Utilising a wide range of early

*Remnants* Kristin J. Wall, 2022-07-08 It is the year 2044 Copy 13 the sole remnant of the highly advanced self replicating Haldis species is reeling from the fated deaths of her late Primary and her twelve co copies on a foreign contaminated life sphere She accepts her inevitable fate She must become the new Primary But Copy 13 s resolve begins to unravel when she learns the horrific truth about the state of humanity from a plump primitive on the toxic beach The pitiful economic landscape Excessive pollution Greed Self destruction Selfishness All of it culminated in the turning point The point of no return The splitting off of humanity into three distinct remnant factions The dirters The leafers The ruthless quad walking cannibalistic fleshers The end of civilization on a global scale Copy 13 s convergence with the plump primitive terminates with an auto replication the sacrificial primitive freed from the insanity of its own species Her first copy as Primary She couldn t be more relieved But her relief is short lived The inevitable shakes her to her very core She will face the nearly impossible task of replicating on a foreign toxic uncivilized tri factioned life sphere There is too much at stake She must reach stability If not her highly advanced species will cease to exist Her strength will to live and sanity will be pushed to the brink as she embarks on a hopeless journey into the remnant city her sole copy at her side A journey that will force Primary

to decide the fate of the tri factioned humans      **Report from the Department of Pathology and the Department of Clinical Psychiatry, Central Indiana Hospital for the Insane. 1903-1906-1917-1918 and 1918-1919** Central Indiana Hospital for the Insane, 1914      **Pamphlet Architecture 32** James A. Craig, Matt Ozga-Lawn, 2013-07-02 The competition for Pamphlet Architecture 32 centered on the theme of resilience By addressing the capacity to cope the ability to bounce back and the mitigation and management of risk participants were asked to showcase a fresh understanding of the architectural opportunities found in resilience The winning entry successfully takes on the topic through an investigation of the ravaged city of Warsaw Poland By identifying interrogating and ultimately reinforcing both the physical and immaterial conditions of the landscape the project allows the space to become something new and yet hold on to what it is truly exhibiting resilience      **Report from the Department of Pathology and the Department of Clinical Psychiatry** Indiana. Central State Hospital, Indianapolis, 1914      **Digital Forensics and Forensic Investigations: Breakthroughs in Research and Practice** Management Association, Information Resources, 2020-04-03 As computer and internet technologies continue to advance at a fast pace the rate of cybercrimes is increasing Crimes employing mobile devices data embedding mining systems computers network communications or any malware impose a huge threat to data security while cyberbullying cyberstalking child pornography and trafficking crimes are made easier through the anonymity of the internet New developments in digital forensics tools and an understanding of current criminal activities can greatly assist in minimizing attacks on individuals organizations and society as a whole Digital Forensics and Forensic Investigations Breakthroughs in Research and Practice addresses current challenges and issues emerging in cyber forensics and new investigative tools and methods that can be adopted and implemented to address these issues and counter security breaches within various organizations It also examines a variety of topics such as advanced techniques for forensic developments in computer and communication link environments and legal perspectives including procedures for cyber investigations standards and policies Highlighting a range of topics such as cybercrime threat detection and forensic science this publication is an ideal reference source for security analysts law enforcement lawmakers government officials IT professionals researchers practitioners academicians and students currently investigating the up and coming aspects surrounding network security computer science and security engineering      Ruin Memories Bjørnar Olsen, Þóra Pétursdóttir, 2014-04-24 Since the nineteenth century mass production consumerism and cycles of material replacement have accelerated increasingly larger amounts of things are increasingly victimized rapidly and made redundant At the same time processes of destruction have immensely intensified although largely overlooked when compared to the research and social significance devoted to consumption and production The outcome is a ruin landscape of derelict factories closed shopping malls overgrown bunkers and redundant mining towns a ghostly world of decaying modern debris normally omitted from academic concerns and conventional histories The archaeology of the recent or contemporary past has grown fast during the

last decade This development has been concurrent with a broader popular artistic and scholarly interest in modern ruins in general *Ruin Memories* explores how the ruins of modernity are conceived and assigned cultural value in contemporary academic and public discourses reassesses the cultural and historical value of modern ruins and suggests possible means for reaffirming their cultural and historic significance Crucial for this reassessment is a concern with decay and ruination and with the role things play in expressing the neglected unsuccessful and ineffable Abandonment and ruination is usually understood negatively through the tropes of loss and deprivation things are degraded and humiliated while the information knowledge and memory embedded in them become lost along the way Without even ignoring its many negative and traumatizing aspects a main question addressed in this book is whether ruination also can be seen as an act of disclosure If ruination disturbs the routinized and ready to hand to what extent can it also be seen as a recovery of memory as exposing meanings and presences that perhaps are only possible to grasp at second hand when no longer immersed in their withdrawn and useful reality Anybody interested in the archaeology of the contemporary past will find *Ruin Memories* an essential guide to the very latest theoretical research in this emerging field of archaeological thought
