Painting as a Modern Art in Early Renaissance Italy Robert Brennan, 2019 Painting as a Modern Art in Early Renaissance Italy reconstructs a historical concept of modern art on the basis of sources written between the 1390s and 1440s The central point of reference in these sources was Giotto the early fourteenth century painter who as one writer put it in 1442 first modernized modernized ancient and mosaic figures The word modern was used in a wide variety of ways throughout this period some quite polemical others rather prosaic To call art *ars modern* however was to invoke a stable well defined concept whose roots ran deep in late medieval intellectual life According to this concept to make an art modern was to set it on a new foundation in science *scientia* and rationalize it accordingly As familiar as this formulation may sound in principle each and every one of its key terms art modernity science rationality meant something strikingly different in this period than it does in our time The hallmark of modern art was not verisimilitude or expression or virtually any of the achievements that art historians associate with Giotto today but rather the invention of techniques that aimed to imitate nature in its very manner of operation aligning the concrete step by step process of painting with the inner workings of nature itself By reclaiming this concept and tracking its complex relation to early Renaissance concerns such as linear perspective and the canon of proportion the book not only establishes a novel framework for the visual analysis of fourteenth and fifteenth century Italian painting but also unravels a fundamental master narrative of Western art history from within clearing the way for renewed discussions of alternative modernities including those that precede the story of modernism as we know it Publisher's website

**The Renaissance Restored** Matthew Hayes, 2021-07-27 This handsomely illustrated volume traces the intersections of art history and paintings restoration in nineteenth century Europe Repairing works of art and writing about them the practices that became art conservation and art history share a common ancestry By the nineteenth century the two fields had become inseparably linked While the art historical scholarship of this period has been widely studied its restoration practices have received less scrutiny until now This book charts the intersections between art history and conservation in the treatment of Italian Renaissance paintings in nineteenth century Europe Initial chapters discuss the restoration of works by Giotto and Titian framed by the contemporary scholarship of art historians such as Jacob

Burckhardt G B Cavalcaselle and Joseph Crowe that was redefining the earlier age Subsequent chapters recount how paintings conservation was integrated into museum settings The narrative uses period texts unpublished archival materials and historical photographs in probing how paintings looked at a time when scholars were writing the foundational texts of art history and how contemporary restorers were negotiating the appearances of these works The book proposes a model for a new conservation history object focused yet enriched by consideration of a wider cultural horizon **What was**

**Contemporary Art?** Richard Meyer, 2013 Contemporary art in the early twenty first century is often discussed as though it were a radically new phenomenon unmoored from history Yet all works of art were once contemporary to the artist and culture that produced them In What Was Contemporary Art Richard Meyer reclaims the contemporary from historical amnesia exploring episodes in the study exhibition and reception of early twentieth century art and visual culture **Space, Image, and Reform in Early Modern Art** Arthur J. DiFuria, Ian Verstegen, 2021-11-08 The essays in Space Image and Reform in Early Modern Art build on Marcia Hall s seminal contributions in several categories crucial for Renaissance studies especially the spatiality of the church interior the altarpiece s facture and affectivity the notion of artistic style and the controversy over images in the era of Counter Reform Accruing the advantage of critical engagement with a single paradigm this volume better assesses its applicability and range The book works cumulatively to provide blocks of theoretical and empirical research on issues spanning the function and role of images in their contexts over two centuries Relating Hall s investigations of Renaissance art to new fields Space Image and Reform expands the ideas at the center of her work further back in time further afield and deeper into familiar topics thus achieving a cohesion not usually seen in edited volumes honoring a single scholar Early Modern Art Theory. Visual Culture and Ideology, 1400-1700 James Hutson, 2016-03 The

development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts In order to elucidate the relationship between theory and practice we must consider the wider connections between art theory poetic theory natural philosophy and related epistemological matrices Investigating the interdisciplinary reality of framing art making and interpretation this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches focusing on stylistic transformation in particular artist s oeuvres Michelangelo Annibale Carracci Guercino Guido Reni Poussin and others and the contemporary environments that facilitated them Through the dual understanding of the art theoretical concept of the Idea an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity beauty and the goal of art as an exercise in encapsulating the divine truth of nature **RENAISSANCE & MODERN ART** William Henry 1846
