interactions with the built environment His book draws upon the close study of literary and visual sources to prove that early modern audiences paid sustained attention to the multisensory experience of the buildings and cities in which they lived Through reconstructing the Renaissance understanding of the senses we can better gauge how constant interaction with the built environment shaped daily practices and contributed to new forms of understanding Architecture and the Senses in the Italian Renaissance offers a stimulating new approach to the study of Renaissance architecture and urbanism as a kind of experiential trigger that shaped ways of both thinking and being in the world **Architecture of the Renaissance** Richard H.
