Researching Children's Popular Culture:

Researching Children's Popular Culture Claudia Mitchell, Jacqueline Reid-Walsh, 2005-06-29 The place of childhood in popular culture is one that invites new readings both on childhood itself but also on approaches to studying childhood. Discussing different methods of researching children's popular culture they argue that the interplay of the age of the players, the status of their popular culture, the transience of the objects and indeed the ephemerality and long lastingness of childhood all contribute to what could be regarded as a particularized space for childhood studies and one that challenges many of the conventions of doing research involving children. Literacy and Popular Culture Jackie Marsh, Elaine

Millard, 2000-12-22 Most children engage with a range of popular cultural forms outside of school. Their experiences with film, television, computer games and other cultural texts are very motivating but often find no place within the official curriculum where children are usually restricted to conventional forms of literacy. This book demonstrates how to use children's interests in popular culture to develop literacy in the primary classroom. The authors provide a theoretical basis for such work through an exploration of related theory and research drawing from the fields of education, sociology and cultural studies. Teachers are often concerned about issues of sexism, racism, violence and commercialism within the discourse of children's media texts. The authors address each of these areas and show how such issues can be explored directly with children. They present classroom examples of the use of popular culture to develop literacy in schools and include interviews with children and teachers regarding this work. This book is relevant to all teachers and students who want to develop their understanding of the nature and potential role of popular culture within the curriculum. It will also be useful to language coordinators, advisers, teacher educators and anyone interested in media education in the 5-12 age range. **Handbook of Research on**
