**An Uncertain Future - Anticipating Oil in Uganda** Annika Witte,2018 The discovery of oil in Uganda in 2006 ushered in an oil age era with new prospects of unforeseen riches However after an initial exploration boom developments stalled Unlike other countries with major oil discoveries Uganda has been slow in developing its oil In fact over ten years after the first discoveries there is still no oil During the time of the research for this book between 2012 and 2015 Uganda s oil had not yet fully materialised but was becoming The overarching characteristic of this research project was waiting for the big changes to come a waiting characterised by indeterminacy There is a timeline but every year it gets expanded and in 2018 having oil still seems to belong to an uncertain future This book looks at the waiting period as a time of not yet ness and describes the practices of future and resource making in Uganda How did Ugandans handle the new resource wealth and how did they imagine their future with oil to be This ethnography is concerned with Uganda s oil and the way Ugandans anticipated different futures with it promising futures of wealth and development and disturbing futures of destruction and suffering The book works out how uncertainty was an underlying feature of these anticipations and how risks and risk discourses shaped the imaginations of possible futures Much of the talk around the oil involved the dichotomy of blessing or curse and it was not clear which one the oil would be Rather than adding another assessment of what the future with oil will be like this book describes the predictions and prophecies as an essential part of how resources are being made This ethnography shows how various actors in Uganda from the state the oil industry the civil society and the extractive communities have tried to negotiate their position in the oil arena Annika Witte argues in this book that by establishing their risks and using them as power resources actors can influence the becoming of oil as a resource and their own place in a petro future The book offers one of the first ethnographic accounts of Uganda s oil and the negotiations that took place in an oil state to be      Resources for an Uncertain Future Charles Johnston Hitch,Lewis M. Branscomb,1978      Non-Renewable Resources Extraction Programs and Markets J. Hartwick,2013-10-08 Considers the role of economics in discussions about the depletion of finite stocks of natural resources including oil      **Managing Water Resources in the West Under**

**Conditions of Climate Uncertainty** National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee on Climate Uncertainty and Water Resources Management,1991-02-01 The question of whether the earth s climate is changing in some significant human induced way remains a matter of much debate But the fact that climate is variable over time is well known These two elements of climatic uncertainty affect water resources planning and management in the American West **Managing Water Resources in the West Under Conditions of Climate Uncertainty** examines the scientific basis for predictions of climate change the implications of climate uncertainty for

water resources management and the management options available for responding to climate variability and potential climate change      **Energy Abstracts for Policy Analysis** ,1984      **Sustainability of Water Resources Under Increasing Uncertainty** International Association of Hydrological Sciences. Scientific Assembly,1997      *Economics of Coastal and Water Resources: Valuing Environmental Functions* R.K. Turner,I. J. Bateman,W.N. Adger,2013-04-18 Most of the chapters in this volume are authored by staff or associates of the Centre for Social and Economic Research on the Global Environment CSERGE CSERGE is a research centre sponsored by the UK Economic and Social Research Council ESRC which specialises in interdisciplinary work focussed on environmental management issues We are grateful for the long term support that we have received from the ESRC We would also like to acknowledge the efforts of Ann Dixon and SHin Pearce in the preparation of this volume vii INTRODUCTION CHAPTER 1 ECOLOGICAL ECONOMICS AND COASTAL ZONE ECOSYSTEMS VALUES AN OVERVIEW Turner R K Bateman I J and Adger W N 1 1 Coastal zone pressure and sustainable management challenges Given the continued intensification of the process of globalisation involving population growth population density changes via urbanisation industrial development increased trade and capital flows liberalisation of transnational corporation activity and lifestyle and attitudinal changes coastal zones and their hydrologically linked catchment areas have come under heavy environmental pressure The scale and extent of socio economic activities have profound implications for the now coevolving natural and human systems and their complex interrelationships Turner Perrings and Folke 1997 The consequences of this process of change manifest themselves across a range of spatial and temporal scales Indeed the juxtaposition of different spatial functional and temporal scales that is inherent in the catchment coastal ecosystems seas oceans continuum poses particularly difficult challenges for both science and resource management governance      *The Future of Helium as a Natural Resource* William Nuttall,Richard Clarke,Bartek Glowacki,2012-06-25 The book reveals the changing dynamics of the helium industry on both the supply side and the demand side The helium industry has a long term future and this important gas will have a role to play for many decades to come Major new users of helium are expected to enter the market especially in nuclear energy both fission and fusion Prices and volumes supplied and expected to rise and this will prompt greater efforts towards the development of new helium sources and helium conservation and recycling      Environmental Flows in an Uncertain Future Avril C. Horne,Rebecca Elizabeth Tharme,Jonathan Tonkin,Eric D. Stein,2022-12-05      Water Resources Management VI C. A. Brebbia,Viktor Popov,2011 The biennial Water Resources Management conference is one of the most important of several water related conferences organised by the Wessex Institute of Technology As water becomes an increasingly precious resource communities all over the world are under extreme pressure to ensure its continued adequate supply to their populations It is therefore essential that those responsible for managing water resources share their expertise in dealing with issues of water quality quantity management and planning as well as other related concerns that help or hinder sustainable management of this vital resource In this

volume containing research on recent technological and scientific developments associated with the management of surface and sub surface water presented at the Sixth International Conference on Water Resources Management they do just that The research covers Water management and planning Waste water treatment management and re use Markets policies and contracts The right to water Urban water management Water quality Pollution control Irrigation problems River basin management Hydraulic engineering and Hydrological modelling Flood risk Decision support systems Remediation and renaturalisation Climate change and water resources Governance and monitoring Regional and geo politics of water Economics Water ecology Sanitation Wetlands and Extreme events      *Global Biodiversity* World Conservation Monitoring Centre,2012-12-06 *Global Biodiversity* is the most comprehensive compendium of conservation information ever published It provides the first systematic report on the status distribution management and utilisation of the planet s biological wealth

**Report RM. ,1989      Economics of Ecological Resources** Charles Perrings,1997-01-01 Perrings book is a well edited and presented integrated work based upon nine of his articles and book chapters published between 1989 and 1995 Clive L Spash *Environmental Values* *Economics of Ecological Resources* presents new or recently published work on ecological economies sustainability poverty resource degradation and decision making under uncertainty The book explores the allocation of resources in jointly determined ecological economic systems An introductory chapter examines the work of other major contributors to the field of ecological economics and introduces Professor Perrings s work and the material in this volume The first of three parts is concerned with the dynamics of joint systems and with the implications for the control and conservation of ecological resources The second part focuses on the conditioning effect of the economic environment on private decisions in low income resource dependent economies The final part considers the way that decision makers handle the uncertainty that is an integral feature of the evolution of the ecological economic system      **Energy Resources In Colo**

Jerome G. Morse,2019-03-08 As the rate of energy use far outstrips the estimate of what resources may be available other fuels are needed to supplement dwindling supplies of oil and gas Three such alternatives are coal oil shale and uranium all of which exist in potential abundance in Colorado However large scale production of these resources will result in complex interactions with the state s social and physical environment and the technologies and issues involved must be fully identified and understood before full scale development takes place This book provides current information on coal oil shale and uranium resources in the state as well as on the potential impact of the technology associated with their development Initially prepared as three separate volumes intended to inform policymakers in the legislative and executive branches of state

government this single volume has been expanded and brought up to date for a broader audience      *International GAAP 2020* Ernst & Young LLP, 2020-02-25 *International GAAP 2020* is a comprehensive guide to interpreting and implementing International Financial Reporting Standards IFRS setting IFRS in a relevant business context and providing insights into how complex practical issues should be resolved in the real world of global financial reporting This book is an essential tool for anyone applying auditing interpreting regulating studying or teaching IFRS Written by financial reporting professionals from around the world this guide to reporting under IFRS provides a global perspective clearly explaining complex technical accounting issues and setting IFRS in a practical context Numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world are included The 2020 edition has been fully revised and updated with information on the latest IFRS changes and current issues      *Welfare, Inequality, and Resource Depletion* Mariano Torras, 2019-10-28 This book breaks new ground by accounting for the welfare implications of both severe inequality and environmental degradation and developing a sustainable development indicator that incorporates changes over time in each of these dimensions The model is applied to data from Brazil spanning the 1965 1998 period The book's findings cast significant doubt on the proposition that rapid economic growth in Brazil has resulted in comparable welfare gains The evidence presented more generally illustrates the often unsustainable nature of rapid GDP growth phases as well as the general unreliability of GDP growth as an indicator of well being improvement The specific policy implication is that Brazil should discontinue or at least severely curtail the regressive and resource intensive economic policies it has followed in recent decades in the interest of welfare improvement not only for the poorer groups in society but for future generations of Brazilians as well
