Forman, José M. Sánchez-Ron, 2001-11-30 To some philosophers seeking to understand the human condition technology is a necessary guide But to think through the complex human phenomenon of technology we must tackle philosophy of science philosophy of culture moral issues comparative civilizational studies and the economics of specific industrial and military technologies in their historical contexts The philosopher wants to grasp the technological factor in this troubled world even as we see it is only one factor and that it does not speak openly for itself Put directly our human troubles to a considerable extent have been transformed exaggerated distorted even degraded perhaps transcended by what engineers and scientists entrepreneurs and politicians have wrought But our problems are ancient problems of dominations struggles survival values in conflict greed and insane sadisms To get some conceptual light on the social reality which seems immediately to be so complicated a philosopher will need to learn from the historians of technology A few years ago the philosopher Elisabeth Straker concluded that a historical philosophy of technology is required since history and history alone provides all those concepts that form part of the repertoire of the philosophical analysis of technology And she added that this goes far beyond the triviality that like other cultural achievements technology has its historical development Now historical comprehension is no substitute for a logical methodology in the analysis of technological problems **Gift Of Prophecy, A: Essays In Celebration Of The Life Of Robert Eugene Marshak** E C George Sudarshan, 1995-02-22 Robert Eugene Marshak 1916-92 devoted much of his life to helping other people carry out scientific research and gather to discuss their work In addition to his scientific statesmanship he was an extraordinarily gifted research scientist and many of his scientific contributions have been prophetic This book pays homage to his creativity and continuing work with contributions from many of the people whose lives have been influenced by him **Energy Research Abstracts** ,1989 *Biographies in the History of Physics* Christian Forstner, Mark Walker, 2020-07-22 This book sheds new light on the biographical approach in the history of physics by including the

biographies of scientific objects institutions and concepts What is a biography Can biographies also be written for non human subjects like scientific instruments institutions or concepts The respective chapters of this book discuss these controversial questions using examples from the history of physics By approaching biography as metaphor it transcends the boundaries between various perspectives on the history of physics and enriches our grasp of the past **Fermilab** Lillian
