Dirk Hofäcker

Retirement And Public Policy Proceedings Of 2nd Conference Of National Academy:

Retirement and Public Policy National Academy of Social Insurance (U.S.). Conference, Alicia Haydock Munnell, 1991
Comprises conference papers and comments which analyse the historical patterns of retirement review the implications of introducing a social insurance programme into the traditional economic analysis of retirement investigate whether people retire voluntarily summarize the medical evidence on trends in the health of older workers and explore policy options which could affect retirement

Older Workers in a Globalizing World Dirk Hofäcker, 2010-01-01 the book can be recommended to all with an interest in the issue of older workers in a globalised world Ageing and Society Early retirement has been a policy to cope with the problems of massive unemployment in many Western welfare states However it has become apparent that this strategy is costly and destroys human capital urgently needed in ageing societies This book offers a comprehensive and up to date study of late career patterns and processes of early retirement in fourteen OECD countries using both cross sectional and longitudinal data It is an important contribution to life course research and will provide the foundation for any serious discussion on pension reforms and increasing the employability of older workers Hans J rgen Andre University of Cologne Germany This timely book investigates the growth of the early retirement trend and its varying spread among different groups of older workers in fourteen modern societies It argues for a differentiated political approach to reverse early retirement which relies on both pension and employability policies for older workers Examining the early retirement trend virtually all modern societies have been faced with since the onset of the globalization process in the 1970s and 1980s this book provides a thorough analysis of older workers late careers and their retirement transitions as well as explaining why this trend has developed differently between nations To promote an effective reversal of the early retirement trend national policymakers are advised not to concentrate their efforts exclusively on reducing the financial incentives for an early exit still present in most national pension systems In addition it is also recommended that they invest in the employability of older workers implying a thorough reconsideration of the design of education and labor market policies Dirk Hofäcker presents a unique and comprehensive synthesis of theories describing and explaining the trend towards early retirement and critically discusses their comparative advantages and shortcomings Researchers and students of sociology economics gerontology demography and comparative welfare states should not be without this book and policymakers and practitioners dealing with labor market policies will find it invaluable

Making America Work Jonathan Barry Forman, 2006-09 Work Hard work And plenty of it That is what has made the United States into the world s foremost economic superpower But while we Americans value and respect work we are also concerned about economic justice We like to see all workers earn a fair day s pay for a fair day s work And we like having a safety net to catch those who cannot compete successfully in our labor markets America works because of this balance between the desire to reward work and our concerns about economic justice But according to Jon Forman America could work even better In Making America Work

Forman explains how current government policies influence work and work behavior and makes the case for changing government tax welfare Social Security pension and labor market policies to encourage work and promote greater economic justice It is a clear provocative declaration of principles and a bold prescription for policies that restore and preserve the balance of work rewards and economic justice [A History of Public Sector Pensions in the United States](#) Robert L. Information Requirements for Transportation Economic Analysis National Research Council (U.S.). Transportation Research Board,2000 Conference participants sought to identify gaps in the data and analytic tools needed to support economic analysis as related to transportation investment and to develop research proposals designed to fill those gaps The opening day of the conference featured presentations by economists transportation analysts and policy makers on the theory

and practice of economic analysis and its usefulness to decision makers The second and third days of the conference revolved around participatory workshops Six separate working groups deliberated over three questions 1 What is the appropriate level of investment in transportation to encourage economic health 2 How should projects be prioritized within a multimodal transportation program 3 How much revenue is likely to flow from user charges tolls and other sources At the conclusion of its deliberations each working group developed a list of research proposals which it then presented to the conference as a whole
