Want Dr. David Kuhl, 2011-07-27 An internationally renowned palliative care physician offers guidance on living with a terminal illness Based on research funded by the Soros Foundation and extensive interviews with dying people A profound and practical book about living with a terminal illness over a long period of time It offers guidance solace and helpful strategies for people who are terminally ill their families and caregivers Facing death results in more fear and anxiety than any other human experience Western medicine has accomplished a great deal in addressing physical pain and controlling symptoms for people with a terminal illness but much slower progress has been made in understanding and alleviating psychological and spiritual distress In *What Dying People Want* Dr David Kuhl begins to bridge that gap He does so by addressing end of life realities physical psychological and spiritual through his own experiences as a doctor and through the words and experiences of people who know that they are dying He presents ways of addressing the pain of finding new life in the process of dying and of understanding the inner reality of living with a terminal illness He acknowledges the despair and recognizes the desire for hope and meaning Dr Kuhl also makes the provocative case that insensitive communication by doctors creates more suffering for patients than either the illness or the knowledge of impending death and offers both the dying and their caregivers guidance on preventing painful interactions He provides ways of speaking about difficult topics

with physicians family members friends and those who have a terminal illness This book started with a research question What is the daily experience of living with a terminal illness How does that experience affect your sense of self your relationship with others and your understanding of the spiritual Many of those I interviewed asked me to share what they had given me with others who would follow those with a terminal illness as well as their friends and family members who would care for them and about them They asked specifically that I write a book for a general audience and not only for my colleagues in the medical profession This is the book that grew out of that research Dr David Kuhl
