Coser, 2017-07-12 Written and compiled by friends and former students The Idea of Social Structure honors Robert K Merton considered one of the premier sociologists of the twentieth century Along with Talcott Parsons and Marion J Levy Merton was emphatic in his use of the term social structure however different they were in defining and refining the term The chapters in this volume address many of Merton's diverse sociological theories and in turn his theories impact upon a very large sociological territory The volume includes major statements on the context of working with Merton by Lewis A Coser Paul F Lazarsfeld Robert A Nisbet and Seymour Martin Lipset as well as memorable statements covering Merton's interests in the sociology of knowledge and science planning communities medical education relative deprivation everyday life political roles and communication media This is a powerful sourcebook for understanding the work of Merton and of his intellectual successors Nisbet called the decade of the 1930s among the most vital and creative periods in American history It was certainly a period of intense struggle political military and ideological But the formation of modern sociology was without question one of the crowning achievements in the scientific evolution of the century The volume is

Baumgartner, 2021-12-06 This volume asks why Jewish groups Sadducees Pharisees Essenes and the Dead Sea Scroll sect flourished during the Maccabean era. It argues that such a result is uncommon requiring special explanation. In the introduction sectarianism is defined and its varieties in Second Temple Judaism assessed. Among the causes of the known results suggested are the encounter with an outside culture that seemed to be weakening the external national perimeter the impact of expanded literacy the move to the city from the farm as well as eschatological hope aroused by Maccabean victory. In proposing these conclusions full advantage is taken of recently published Qumran sources such as 4QMMT. The objective is to discover the connection between context and consequence which will explain why sectarianism was so prominent at that time. **Meaning and Moral Order** Robert Wuthnow, 1989-04-27 Meaning and Moral Order goes beyond classical

neoclassical and poststructural theories of culture in its attempt to move away from problems of meaning to a more objective concept of culture. Innovative controversial challenging it will compel scholars to rethink many of the assumptions on which the study of ideology ritual religion science and culture have been based. **Routledge Library Editions: Sociology of Religion** Various, 2021-07-14 This set collects together in 19 volumes a wealth of texts on Sociology of Religion. An invaluable

reference resource it contains classic books on a wide range of topics including religion and violence religion and family life religion and society culture and class. Pentecostal Pacifism Jay Beaman, 2009-11-01 At a time when the Evangelical wing of the church is beginning to show some signs of soul searching over the issues of war and peace the Pentecostals would do well to study their own heritage. Whether they accept or reject their earlier world view they need to interpret the motivation for their original beliefs and those which they now hold. As people of the word of God have Pentecostals altered their

pacifistic views as a result of new biblical insights or cultural accommodation. From the Introduction *Divine Hierarchies* Sean McCloud, 2009-01-05 Placing the neglected issue of class back into the study and understanding of religion Sean McCloud reconsiders the meaning of class in today's world. More than a status grounded in material conditions says McCloud class is also an identity rhetorically and symbolically made and unmade through representations. It entails relationships

identifications boundaries meanings power and our most ingrained habits of mind and body. He demonstrates that employing class as an analytical tool that cuts across variables such as creed race ethnicity and gender can illuminate American religious life in unprecedented ways. Through social theory historical analysis and ethnography McCloud makes an interdisciplinary argument for reinserting class into the study of religion. First he offers a new three part conception of class for use in studying religion. He then presents a focused cultural history of religious studies by examining how social class surfaced in twentieth century theories of religious affiliation. He concludes with historical and ethnographic case studies of religion and class. *Divine Hierarchies* makes a convincing case for the past and present importance of class in American

religious thought practice and scholarship Beyond Conformity Or Rebellion Gary Schwartz,1987-07-06 Abstract In this new study of high school aged youth in the early 70 s the author reveals subtle yet significant changes in the style of deviance in adolescent culture The argument is made that a new peer group pluralism emerged from the 60 s which is characterized by a deviance defined less by persistent violations of the law than by disengagement from traditional images of success and civic responsibility This work is based on an ethnographic study of six communities located in a midwestern agricultural and industrial state This study will be of interest to individuals involved in the fields of adolescence education delinquency and deviance community life and the texture of life and values among high school youth Christian Millenarianism Stephen Hunt,2001-08-22 To grasp this subject one needs a multifaceted multidisciplinary approach by a variety of expert hands such as have been brought together in this book Here one has the whole argument from the inter Testamental and earliest Christian periods through medieval and early modern times up to the complex overlaps with the New Age or Pentecostalism and Neo Pentecostalism or Judaising movements like the Seventh Day Adventists and the Peruvian Israelites from the Foreword by David Martin Students with a serious interest in the manifestations of millennialism and those concerned with the origins and motivations embraced by revolutionary ideologies will find this book an indispensable resource for laymen it offers a truly fascinating read Bryan R Wilson This timely book examines the impact of Christian millenarian ideas in a comparative and historical perspective with a special emphasis on contemporary religious movements inspired by such ideas The contributors are Andrew Bradstock Eugene Gallagher Malcolm B Hamilton Massimo Introvigne Orestis Lindermeier Kenneth Newport Susan J Palmer Mark Patterson Martyn Percy Margaret Poloma Stanley E Porter Ian Reader Damian Thompson Andrew Walker Diane Watt and Michael York Seeking a Sanctuary Malcolm Bull,Keith Lockhart,2006-12-20 The completely revised second edition further explores one of the most successful of America s indigenous religious groups Despite this the Adventist church has remained largely invisible Seeking a Sanctuary casts light on this marginal religion through its socio historical context and discusses several Adventist figures that shaped the perception of this Christian sect Contagious Conflict Arie Nicolaas Jan Den Hollander,1973 *Sociologie Et Religions* Liliane Voyé,Jaak Billiet,1999 What are the relations between sociology and the different religions Christianity with its various branches Judaism Islam Oriental religions sects and New Religious Movements That is the question which this work conceived on the occasion of the XXVth Conference of the International Society for the Sociology of Religion Soci t Internationale de Sociologie des Religions SISR wishes to clarify The book retraces the varied and troubled history of these relations and also reveals how in opening up its research to other religions besides the Christian sociology is forced to redefine the very object of its field of study What is the religious This question which until recently was considered impertinent informs this book throughout It confronts the necessity of rethinking theories and methodological approaches which constructed in the context of 19th and early 20th century Western Europe prove to be rather inadequate for

encompassing contemporary religious phenomena and religious manifestations in other contexts To these new theoretical and methodological demands is added for the sociologist a deontological imperative which takes on all the more importance today as the religious provokes passionate social debate *What is Rape?* Hilkje Charlotte Hänel, 2018-08-07 What exactly is rape And how is it embedded in society Hilkje Charlotte Hänel offers a philosophical exploration of the often misrepresented concept of rape in everyday life systematically mapping out and elucidating this atrocious phenomenon Hänel proposes a theory of rape as a social practice facilitated by ubiquitous sexist ideologies Arguing for a normative cluster model for the concept of rape this timely intervention improves our understanding of lived experiences of sexual violence and social relations within sexist ideologies **Pentecostalism in Colombia** Cornelia Butler Flora, 1976 This sociological study details the nature of the Pentecostal movement in Colombia the comparative patterning of precedent conditions in a regional system and among individuals the comparative internal structure of the movement and its reflection in the membership and the consequences of the movement's emergence and survival on municipios and individuals [Politics and Ideology in Canada](#) Michael Ornstein, Michael Stevenson, 2003-02-18 Winner of the Harold Adams Innis Prize *Politics and Ideology in Canada* examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society Using class and ideology as key concepts Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981 The surveys cover an exceptionally broad spectrum of political issues including social programs civil and economic rights economic policy foreign ownership labour relations and language issues and sovereignty A wide ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state But there was also widespread public alienation from politics Public opinion was quite strongly linked to class but not to party politics Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents State elites fell between these two though generally more favourable to capital The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs free trade privatization and deregulation **The Social Psychology of Religion (Psychology Revivals)** Michael Argyle, Benjamin Beit-Hallahmi, 2013-11-26 Originally published in 1975 this book is a completely rewritten revised version of Michael Argyle's standard work *Religious Behaviour* first published in 1958 A great deal of new research had appeared since that date which threw new light on the nature and origins of religious behaviour beliefs and experience Trends in religious activity in Britain and the United States since 1900 and the

state of religion in these two countries at the time are examined Evidence is presented on the origins of religious activity including the effects of stress drugs meditation evangelistic meetings personality variables and social class Other studies examine the effects of religion for example on mental and physical health political attitudes racial prejudice sexual behaviour morals and the relation between religion and scientific and other achievements The findings are used to test the main theories about religion which have been put forward by psychologists and other social scientists such as Freud s father projection theory cognitive need theories and deprivation compensation theories A Liberating Spirit Michael Wilkinson, Steven M. Studebaker, 2010-09-13 The historical ambivalence among Pentecostals about their relationship to culture and society needs evaluation How do we understand Pentecostal engagement with society and how are Pentecostals in North America engaging issues of race class gender and ecology What theologically motivates North American Pentecostals to respond to social issues What categories best explain Pentecostal responses to social issues in North America How do they compare to Pentecostal responses elsewhere Recently scholars of global Pentecostalism have proposed that the experience of the Spirit among Pentecostals has elicited the development of a Pentecostal theology of liberation which has implications for understanding Pentecostal responses to social issues These projects primarily explore the Pentecostal response to cultural issues in areas outside of North America and especially focus on Africa Asia and Latin America This volume assesses whether the categories of social liberation applied to non Western Pentecostalism characterize Pentecostalism in North America Is there evidence of a Pentecostal theology of liberation that explains Pentecostal engagement in North America Do social liberation categories fit the North American Pentecostal responses to social issues or are others more suitable These and other important questions about the relation between liberation theology and North American Pentecostalism are thoroughly explored in this important collection of essays **Social Inequality and Social Stratification in US Society** Christopher B. Doob, 2019-05-22 Social Inequality and Social Stratification in US Society uses a historical and conceptual framework to explain social stratification and social inequality The historical scope gives context to each issue discussed and allows the reader to understand how each topic has evolved over the course of American history The author uses qualitative data to help explain socioeconomic issues and connect related topics Each chapter examines major concepts so readers can see how an individual s success in stratified settings often relies heavily on their access to valued resources types of capital which involve finances schooling social networking and cultural competence Analyzing the impact of capital types throughout the text helps map out the prospects for individuals families and also classes to maintain or alter their position in social stratification systems Religion and Ideology Robert Bock, Kenneth Thompson, 1985
