Bruce Jones, Giovanni Zurlini, Kinga Krauze, Sergey Victorov, Bai-Lian Li, William G. Kepner, 2007-10-24 This book examines environmental security from the perspective of landscape sciences identifying the forces that threaten environmental security at all levels It stems from the last five years of the Pilot Study Project on Use of Landscape Sciences for Environmental Assessment sponsored by the NATO Committee on the Challenges of Modern Society Readers explore concepts of environmental security from subjective and objective perspectives *Facing Global Environmental Change* Hans Günter Brauch, Navnita Chadha Behera, Patricia Kameri-Mbote, John Grin, Úrsula Oswald Spring, Béchir Chourou, Czesław Mesjasz, Heinz Krummenacher, 2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth session Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world *Environmental Change and Human Security: Recognizing and Acting on Hazard Impacts* Peter H. Relations and Public Policy Salve Regina University 1 Nontraditional Threats to Security The events of September 11 2001 have sharpened the debate over the meaning of being secure Before 9 11 there were warnings in all parts of the world that social and environmental changes were occurring While there was prosperity in North America and Western Europe there was also increasing recognition that local and global effects of ecosystem degradation posed a serious threat Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher for example travel writer Paul Theroux concluded that development in sub Saharan Africa had failed to improve the quality of life for 300 million people Africa is materially more decrepit than it was when I first knew it hungrier poorer less educated more pessimistic more corrupt and you can't tell the politicians from the witch doctors 2002 While scholars and historians will debate the causes of 9 11 for some time one message is clear An often dizzying array of nontraditional threats and complex vulnerabilities define security today We must understand them and deal with them or suffer the consequences Environmental security has always required attention to nontraditional threats linked closely with social and economic well being *Rethinking Human Security* Moufida Goucha, John Crowley, 2009-04-22 This book provides seven studies that address major issues such as the human rights and human security nexus gender aspects of human security ethical and environmental challenges human security as a basic element for a policy framework the human security agenda developed by the Human Security Network and debates on human security within the United Nations Building on its variety of themes the book takes account of the complexity and scope of the concept of human security and proposes thereby to refresh and enrich discussion Contributors are internationally renowned experts in the different subfields of human security Offers an overview of current trends and insights on what is at stake if the international community is to maintain the momentum created a few years ago when the concept of human security emerged Designed to help both newcomers and experts in the field of human security Readers will find inspiration in the new developments of a concept that aims to shape practical action to meet the needs of the most vulnerable *Human Security and the Environment* Edward Page, M. R. Redclift, 2002-01-01 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin discussions of

environmental security demonstrating that this is a relatively new and essentially contested concept *Environmental Security and Sustainable Land Use - with Special Reference to Central Asia* Hartmut Vogtmann, Nikolai

Environmental Security in the Arctic Ocean Paul Arthur Berkman, Alexander N. Vylegzhanin, 2012-11-29 This seminal book results from a NATO Advanced Research Workshop at the University of Cambridge with Russian co-directorship enabling the first formal dialogue between NATO and Russia about security issues in the Arctic Ocean. Involving interdisciplinary participation with experts from 17 nations including all of the Arctic states, this workshop itself reflects progress in Arctic cooperation and collaboration. Interests now are awakening globally to take advantage of extensive energy shipping, fishing, and tourism opportunities in the Arctic Ocean as it is being transformed from a permanent sea ice cap to a seasonally ice-free sea. This environmental state change is introducing inherent risks of political, economic, and cultural instabilities that are centralized among the Arctic states and indigenous peoples with repercussions globally. Responding with urgency, environmental security is presented as an integrated approach for assessing and responding to the risks as well as the opportunities generated by an environmental state change. In this book, diverse perspectives on environmental security in the Arctic Ocean are shared in chapters from high-level diplomats, parliamentarians, and government officials of Arctic and non-Arctic states; leaders of Arctic indigenous peoples organizations; international law advisors from Arctic states as well as the United Nations; directors of inter-governmental organizations and non-governmental organizations; managers of multinational corporations; political scientists; historians; and economists along with Earth system scientists and oceanographers. Building on the common Arctic issues of sustainable development and environmental protection established by the Arctic Council, environmental security offers an holistic approach to assess opportunities and risks as well as develop infrastructure responses with law of the sea as the key international legal framework to promote the peaceful uses of the Arctic Ocean. With vision for future generations, environmental security is a path to balance national interests and common interests in the Arctic Ocean for the lasting benefit of all. *Achieving Environmental Security* P. H. Liotta, 2010 Ecosystem services and human welfare W. G. Kepner
