unnecessary wars The authors persuasively argue that not one foreign intervention in the past 50 years has made us or the world safer With additions by Molly Sinclair McCartney a fellow journalist with 30 years of experience America s War Machine provides the context for today s national security state and explains what can be done about it      **Launch of Strategic Target System Vehicles, Kauai Test Facility, Pacific Missile Range Facility** ,1992      **Bulletin of the Atomic Scientists** ,1987-11      CIS Annual ,1988      CIS Annual Congressional Information Service,1987      **Rethinking International Relations** Fred Halliday,1994-10-26 International Relations as an academic discipline is faced with three major convergent challenges a historical challenge from the end of the Cold War and from new forms of internationalism and fragmentation an institutional challenge from the growing preoccupation of other social sciences with the international and a theoretical challenge both from these cognate disciplines and from within Ranging widely over the discipline Fred Halliday s book powerfully reaffirms the specificity of International Relations and lays the basis for a long overdue reformulation
