Gender, Human Security and the United Nations Natalie Florea Hudson, 2009-09-22 This book examines the relationship between women gender and the international security agenda exploring the meaning of security in terms of discourse and practice as well as the larger goals and strategies of the global women s movement Today many complex global problems are being located within the security logic From the environment to HIV AIDS state and non state

actors have made a practice out of securitizing issues that are not conventionally seen as such. As most prominently demonstrated by the UN Security Council Resolution 1325 2001, activists for women's rights have increasingly framed women's rights and gender inequality as security issues in an attempt to gain access to the international security agenda, particularly in the context of the United Nations. This book explores the nature and implications of the use of security language as a political framework for women, tracing and analyzing the organizational dynamics of women's activism in the United Nations system and how women have come to embrace and been impacted by the security framework globally and locally. The book argues that from a feminist and human security perspective, efforts to engender the security discourse have had both a broadening and limiting effect, highlighting reasons to be sceptical of securitization as an inherently beneficial strategy. Four case studies are used to develop the core themes: 1. the campaign to implement UN Security Council Resolution 1325; 2. the strategies utilized by those advocating women's issues in the security arena compared to those advocating for children; 3. the organizational development of the UN Development Fund for Women and how it has come to securitize women; and 4. the activity of the UN Peacebuilding Commission and its challenges in gendering its security approach. The work will be of interest to students of critical security, gender studies, international organizations, and international relations in general.

Natalie Florea Hudson received her PhD in Political Science from the University of Connecticut and is an Assistant Professor at the University of Dayton. She specializes in gender and international relations, human rights, international security studies, and international law and organization.

ECOWAS and the Dynamics of Conflict and Peace-building Thomas Jaye, Dauda Garuba, 2011-12-15

ECOWAS and the Dynamics of Conflict and Peace building testifies to the fact that we cannot talk of West African affairs more so of conflict and peace building without talking about ECOWAS. For over two decades now, West Africa has remained one of Africa's most conflict-ridden regions. It has been a theatre of some of the most atrocious brutalities in the modern world. It has nonetheless witnessed one of the most ambitious internal efforts towards finding regional solutions to conflicts through ECOWAS. The lead role of ECOMOG, the ECOWAS peacekeeping force in search of peaceful solutions to civil wars in Liberia, Sierra Leone, Guinea-Bissau, and Cote d'Ivoire, has yielded a mix of successes and failures. In this book, the authors take a candid look at the role that ECOWAS has played and show how the sub-regional organisation has stabilised and created new conditions conducive to nation building in a number of cases. Conversely, the book shows that ECOWAS has aggravated, if not created, new tensions in yet other cases. The comparative advantage that ECOWAS has derived from these experiences is reflected in the various mechanisms, protocols, and conventions that are now in place to ensure a more comprehensive conflict prevention framework. This book provides a nuanced analysis of the above issues and other dynamics of conflicts in the region. It also interrogates the roles played by ECOWAS and various other actors in the context of the complex interplay between natural resource governance, corruption, demography, and the youth bulge, gender, and the conflicting interests of national, regional, and international players.

Strategy and Security in the Asia-Pacific Robert Ayson, Desmond Ball, 2020-07-25 From the war on terror to the rise of China this book unlocks the major strategic themes and security challenges of the early twenty first century Strategy and Security in the Asia Pacific provides the analytical frameworks needed to make sense of this complex but exciting strategic universe Offering a unique mix of global strategic thinking and Asia Pacific security analysis this book is for readers from Sydney to Seoul who want to put their own local security challenges in a wider regional and global context It is also for North

American and European readers requiring an understanding of the dynamic security developments in the Asia Pacific region around which so much of global strategy is increasingly based. The really vital questions facing the international community are dealt with here: Why do governments and groups still use armed force? Has warfare really changed in the information age? Why should we be concerned about non-traditional security challenges such as water shortages and the spread of infectious disease? Is a great clash imminent between the United States and China? What are the prospects for peace on the Korean peninsula and between India and Pakistan? Can Southeast Asia survive the challenges of transnational terrorism? What does security mean for the Pacific island countries and for Australia and New Zealand? With contributions from leading commentators and analysts, *Strategy and Security in the Asia Pacific* offers a comprehensive and authoritative introduction to the field.

Peace and Security in the Asia-Pacific Sorpong Peou, 2010-04-15. Demonstrating that none of the various perspectives under review has emerged as the clear winner in the struggle for theoretical hegemony in security studies, this book shows that eclectic perspectives like democratic realist institutionalism can better explain peace and security in the Asian Pacific. The Asian Pacific has emerged as one of the most important regions in the world, causing scholars to pay increased attention to the various challenges old and new to peace and security there. *Peace and Security in the Asia Pacific: Theory and Practice* is a comprehensive critical review of the established theoretical perspectives relevant to contemporary peace and security studies in the light of recent experiences. Illuminating ongoing debates in the field, the book covers some 20 theoretical perspectives on peace and security in the Asian Pacific, including realist, liberal, socialist, peace, and human security, constructivist, feminist, and nontraditional security studies. The first section of the book discusses perspectives in realist security studies; the second part covers perspectives critical of realism. The author's goal is to assess whether any of the perspectives found in nonrealist security studies are capable of undermining realism. His conclusion is that each theoretical perspective has its strengths and weaknesses, leaving eclecticism as the best way to understand the region's dynamics.

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in

Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it
