Do Good Fences Make Good Neighbors? Brent L. Sterling, 2009-10-30 A number of nations conspicuously Israel and the United States have been increasingly attracted to the use of strategic barriers to promote national defense In Do Good Fences Make Good Neighbors defense analyst Brent Sterling examines the historical use of strategic defenses such as walls or fortifications to evaluate their effectiveness and consider their implications for modern security Sterling studies six famous defenses spanning 2 500 years representing both democratic and authoritarian regimes the Long Walls of Athens Hadrian s Wall in Roman Britain the Ming Great Wall of China Louis XIV s Pr Carr France s Maginot Line and Israel s Bar Lev Line Although many of these barriers were effective in the short term they also affected the states that created them in terms of cost strategic outlook military readiness and relations with neighbors Sterling assesses how modern barriers against ground and air threats could influence threat perceptions alter the military balance and influence the builder s subsequent policy choices Advocates and critics of strategic defenses often bolster their arguments by selectively distorting history Sterling emphasizes the need for an impartial examination of what past experience can teach us His study yields nuanced lessons about strategic barriers and international security and yields findings that are relevant for security scholars and compelling to general readers

Arming Against Hitler Eugenia C. Kiesling,1996 In May June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead While many historians have focused on Frances failure to avoid this catastrophe Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies military doctrine and combat forces would preserve the nation

Science Under Attack Ralph B. Alexander,2018-12-01 Evidence and logic are lacking in many areas

of public debate today on hot button issues ranging from dietary fat to vaccination In *Science Under Attack* Dr Alexander shows how science is being abused sidelined or ignored making it difficult or impossible for the public to form a reasoned opinion about important issues Readers will learn why science is becoming more corrupt and also how it is being abused for political and economic gain support of activism or the propping up of religious beliefs To illustrate how science is being ignored and abused the author examines six different issues and the way they are currently discussed evolution dietary fat climate change vaccination GMO crops and continental drift In his research he has gone back to the original source wherever possible rather than quoting second hand sources adding a degree of accuracy and nuance often missing The controversial assertion that science does not support the conventional wisdom on climate change should be of particular interest Alexander shows that the scientific evidence for a substantial human contribution to climate change is actually flimsy and he demonstrates the fallacy of comparing the strong link between smoking and lung cancer to the much weaker connection between human activity and global warming

Seed Policy and Programmes in Latin America and the Caribbean ,2001-01-01 The meeting recognised the need for the sustainable use of plant genetic resources for sustainable agricultural development of the region Discussions focused on the appropriate mechanisms required to ensure capacity for the maintenance production and equitable distribution of good quality seeds from a wide range of plant varieties The meeting agreed to establish the Seed Consultative Forum for Latin America and the Caribbean

Is the End of the World Near? Ron Miller,2011-08-01 At one time or another just about everyone has talked about the end of the world But what does this phrase really mean Does it mean the end of the human race The end of planet Earth The end of our Sun and solar system And if the world were to actually end how and when would it happen People have been asking these questions for thousands of years Many religious prophets have predicted the end of the world Science fiction writers have created lots of end of the world stories Scientists too talk about natural events that could destroy human life or planet Earth Some end of the world events are dramatic Imagine an asteroid slamming into Earth creating a massive explosion Other scenarios don t involve a single catastrophic event For example global warming is changing the planet and threatening people plants and animals It might not bring about the end of the world but it might change life as we know it In this book we ll look at these scenarios and many more everything from Mayan prophecy to nuclear disaster to the end of the universe We ll find out which scenarios to ignore and which ones to really worry about

The Mississippi Valley in the Civil War John Fiske, 1900 Although often overshadowed in Civil War literature by accounts of the Army of the Potomac s struggles against Robert E Lee in Virginia and the bold Confederate invasion of the Maryland and Pennsylvania the Western theatre of the Civil War was the scene of some of the most desperate hard fought and strategically important battles of the five year conflict John Fiske s eloquent narrative begins with the seizure of the secessionist arsenal at Camp Jackson in St Louis MO and follows the Union Army through its campaign to control the Mississippi River and its subsequent actions in Georgia and Tennessee The text draws heavily on remembrances and personal journals of Generals Ulysses S Grant and William Tecumseh Sherman and examines in painstaking detail not just events on the field of battle but the logistical considerations and political maneuvering that helped shape these campaigns The result is a fascinating informative and engrossing account of the turning of the Confederacy s left flank and the resulting defeat of the Army of the Rebellion
