Seeds, Spades, Hearths, and Herds Carl Ortwin Sauer, 1972 Seeds, Spades, Hearths, and Herds Carl Ortwin Sauer, 1969 *The American Empire and the Fourth World* Anthony J. Hall, Tony Hall, 2005 In a book that Naomi Klein says could change the world Anthony Hall shows that the globalization debate actually began in 1492 *Geography and History* Alan R. H. Baker, 2003-11-06 Table of contents The Plain of Phaistos Harriet Blitzer, Despoina Hadzi-Vallianou, L. Vance Watrous, 2005-02-01 The Plain of Phaistos presents the results on an interdisciplinary regional field project 1984 1987 carried out on the island Of Crete This volume traces the changing patterns of settlement and cycles of social complexity from the Late Neolithic period to the present day within the heartland of the state of Phaistos The authors and contributors publish geological archaeological environmental botanical historical and ethnographic studies that establish the regional identity of the Western Mesara Using a combination of empirical processual and post processual theoretical approaches the volume investigates a central problem how and why did the Bronze Age and Classical states arise at Phaistos Tending the Wild M. Kat Anderson, 2005-06-14 A complex look at California Native ecological practices as a model for environmental sustainability and conservation John Muir was an early proponent of a view we still hold today that much of California was pristine untouched wilderness before the arrival of Europeans But as this groundbreaking book demonstrates what Muir was really seeing when he admired the grand vistas of Yosemite and the gold and purple flowers carpeting the Central Valley were the fertile gardens of the Sierra Miwok and Valley Yokuts Indians modified and made productive by centuries of harvesting tilling sowing pruning and burning Marvelously detailed and beautifully written Tending the Wild is an unparalleled examination of Native American knowledge and uses of California s natural resources that reshapes our understanding of native cultures and shows how we might begin to use their knowledge in our own conservation efforts M Kat Anderson presents a wealth of information on native land management practices gleaned in part from interviews and correspondence with Native Americans who recall what their grandparents told them about how and when areas were burned which plants were eaten and which were used for basketry and how plants were tended The complex picture that emerges from this and other historical source material dispels the hunter gatherer stereotype long perpetuated in anthropological and historical literature We come to see California s indigenous people as active agents of environmental change and stewardship Tending the Wild persuasively argues that this traditional ecological knowledge is essential if we are to successfully meet the challenge of living sustainably **New Geographies of Language** Rhys Jones, Huw

Lewis,2018-11-19 This book develops a novel approach to the study of language bringing it into dialogue with the latest geographical concepts and concerns and provides a comprehensive account of the geography of Welsh language analysing policy development language use ability and shift The authors examine in particular the different ways in which languages can be mapped how geographical insights can be used to develop understandings of language use the value of assemblage theory as a way of interpreting the social technical and spatial aspects of language policy development and the geographies that characterise institutional engagements with languages This book will set a research agenda for the geographical study of language developing a conceptual framework that will offer fresh insights to researchers in the fields of Applied

Waste: Uncovering the Global Food Scandal Tristram Stuart, 2009-10-26 The true cost of what the global food industry throws away With shortages volatile prices and nearly one billion people hungry the world has a food problem or thinks it does Farmers manufacturers supermarkets and consumers in North America and Europe discard up to half of their food enough to feed all the world s hungry at least three times over Forests are destroyed and nearly one tenth of the West s greenhouse gas emissions are released growing food that will never be eaten While affluent nations throw away food through neglect in the developing world crops rot because farmers lack the means to process store and transport them to market But there could be surprisingly painless remedies for what has become one of the world s most pressing environmental and social problems Waste traces the problem around the globe from the top to the bottom of the food production chain Stuart s

journey takes him from the streets of New York to China Pakistan and Japan and back to his home in England Introducing us to foraging pigs potato farmers and food industry CEOs Stuart encounters grotesque examples of profligacy but also inspiring innovations and ways of making the most of what we have The journey is a personal one as Stuart is a dedicated freegan who has chosen to live off of discarded or self produced food in order to highlight the global food waste scandal Combining front line investigation with startling new data Waste shows how the way we live now has created a global food crisis and what we can do to fix it

The Origins of the World's Mythologies E.J. Michael Witzel, 2012-12-13 This remarkable book is the most ambitious work on mythology since that of the renowned Mircea Eliade who all but single handedly invented the modern study of myth and religion Focusing on the oldest available texts buttressed by data from archeology comparative linguistics and human population genetics Michael Witzel reconstructs a single original African source for our collective myths dating back some 100 000 years Identifying features shared by this Out of Africa mythology and its northern Eurasian offshoots Witzel suggests that these common myths recounted by the communities of the African Eve are the earliest evidence of ancient spirituality Moreover these common features Witzel shows survive today in all major religions Witzel s book is an intellectual hand grenade that will doubtless generate considerable excitement and consternation in the scholarly community Indeed everyone interested in mythology will want to grapple with Witzel s extraordinary hypothesis about the spirituality of our common ancestors and to understand what it tells us about our modern cultures and the way they are linked at the deepest level

Smallholders and Stockbreeders P. Boomgaard, David E.F. Henley, 2021-11-15 Historians of Southeast Asia have traditionally preferred to write about politics and culture rather than economics and ecology and where they have looked at the history of agriculture they have most often concentrated on cash crops like sugar coffee and rubber which figure prominently in colonial records Smallholders and stockbreeders by contrast provides a rare survey of the history of foodcrop farming and a unique look at the history of animal husbandry in the Southeast Asian region Thirteen contributions by an international selection of expert authors cover topics ranging from the agricultural economy of precolonial Java to the growth of rice production in the Mekong Delta since 1950 and from the breeding of horses on the northern borderlands of mainland Southeast Asia to the production and consumption of beef in the Philippines New light is shed on old questions regarding the directions in which Southeast Asian agriculture has evolved over the centuries and new questions raised regarding the cultural demographic economic and political determinants of farming practices While the geographical and chronological scales of analysis vary most chapters deal with relatively large areas and with developments over periods of 100 years or more Besides production for subsistence commercial aspects of livestock and foodcrop farming are also given due attention and prove to have been important in many parts of the region from very early periods Smallholders and stockbreeders is essential reading for anyone interested in the agricultural history of Southeast Asia whether for its own sake or in connection with other aspects of regional history or for purposes of comparison with other

parts of the world **Savages and Civilization** Jack Weatherford, 2010-05-19 A provocative and vivid Minneapolis Star Tribune look at the primitive cultures that have given many gifts to the modern world and how their very existence is now threatened This book should serve as a wake up call to people everywhere Library Journal In Indian Givers and Native Roots renowned anthropologist Jack Weatherford explored the clash between Native American and European cultures Now in *Savages and Civilization* Weatherford broadens his focus to examine how civilization threatens to obliterate unique tribal and ethnic cultures around the world and in the process imperils its own existence As Weatherford explains the relationship between civilized and savage peoples through history has encompassed not only violence but also a surprising degree of cooperation mutual influence trade and intermarriage But this relationship has now entered a critical stage everywhere in the world as indigenous peoples fiercely resist the onslaught of a global civilization that will obliterate their identities *Savages and Civilization* powerfully demonstrates that our survival as a species is based not on a choice between savages and civilization but rather on a commitment to their vital coexistence Food Studies in Latin American Literature Rocío del Aguila, Vanesa Miseres, 2021-12-10 Collection of essays analyzing a wide array of Latin American narratives through the lens of food studies *Land, Livelihood, and Civility in Southern Mexico* Scott Cook, 2014-05-15 In the Valley of Oaxaca in Mexico's Southern Highland region three facets of sociocultural life have been interconnected and interactive from colonial times to the present first community land as a space to live and work second a civil religious system managed by reciprocity and market activity wherein obligations of citizenship office and festive sponsorships are met by expenditures of labor time and money and third livelihood In this book noted Oaxacan scholar Scott Cook draws on thirty five years of fieldwork 1965 1990 in the region to present a masterful ethnographic historical account of how nine communities in the Oaxaca Valley have striven to maintain land livelihood and civility in the face of transformational and cumulative change across five centuries Drawing on an extensive database that he accumulated through participant observation household surveys interviews case studies and archival work in more than twenty Oaxacan communities Cook documents and explains how peasant artisan villagers in the Oaxaca Valley have endeavored over centuries to secure and or defend land worked and negotiated to subsist and earn a living and striven to meet expectations and obligations of local citizenship His findings identify elements and processes that operate across communities or distinguish some from others They also underscore the fact that landholding is crucial for the sociocultural life of the valley Without land for agriculture and resource extraction occupational options are restricted livelihood is precarious and contingent and civility is jeopardized
