Seeking Scientific Explanations For Natural Phenomena:

Seeking Scientific Explanations for Natural Phenomena Ben R. Golden, 1990 Seeking Scientific Explanations for Natural Phenomena Rhyne, Golden, 1992-01-01 Seeking a Scientific Explanation for Natural Phenomena Pamela J. Rhyne, 1993-06-01 *Problematic Research Practices and Inertia in Scientific Psychology* James T. Lamiell, Kathleen L. Slaney, 2020-11-04 This volume explores the abiding intellectual inertia in scientific psychology in relation to the discipline's engagement with problematic beliefs and assumptions underlying mainstream research practices despite repeated critical analyses which reveal the weaknesses and in some cases complete inappropriateness of these methods. Such paradigmatic inertia is especially troublesome for a scholarly discipline claiming status as a science. The book offers penetrating analyses of many, albeit not all of the most important areas where mainstream practices require either compelling justifications for their continuation or adjustments possibly including abandonment toward more apposite alternatives. Specific areas of concern addressed in this book include the systemic misinterpretation of statistical knowledge, the prevalence of a conception of measurement at odds with yet purporting to mimic the natural sciences, the continuing widespread reliance on null hypothesis testing and the continuing resistance within psychology to the explicit incorporation of qualitative methods into its methodological toolbox. Broader level chapters examine mainstream psychology's systemic disregard for critical analysis of its tenets and the epistemic and ethical problems this has created. This is a vital and engaging resource for researchers across psychology and those in the wider behavioural and social sciences who have an interest in or who use psychological research methods. Science, Politics and Business in the Work of Sir John Lubbock Mark Patton, 2016-04-01 Sir John Lubbock 1834-1913, first Lord Avebury, was a leading figure in the scientific, political and economic world of Victorian Britain and his life provides an illuminating case study into the ways that these different facets were interlinked during the nineteenth century. Born into a Kent banking family, Lubbock's education was greatly influenced by his neighbour Charles Darwin and after the publication of *The Origin of Species* he was one of his most vocal supporters. A pioneer of both entomology and archaeology and a successful author, Lubbock also ran the family bank from 1865 until his death in 1913 and served as a Liberal MP from 1870 until his ennoblement in 1900. In all these roles he proved extremely successful, but it is the interrelations between science, politics and business that forms the core of this book. In particular, it explores the way in which Lubbock acted as a link between the scientific worlds of Darwin, Huxley and Tyndall, the political world of Gladstone and Chamberlain and the business world of Edison and Carnegie. By tying these threads together, this study shows the important role Lubbock played in defining and popularising the Victorian ideal of progress and its relationship to society, culture and Empire. **Reaching Beyond Faith** IBN F?R?BI, 2015-12-30 *Reaching beyond Faith: A Modern Mind Reads the Koran* takes the reader beyond the realm of pure faith to explore the Koran from an essentially non-pietistic point of view and in social, historical, geographic and above all human contexts. Its 14 chapters, using some 800 verses from the Koran, take a

critical look at a wide range of issues from the audience the message of the Koran was meant for to the role of humans in the compilation of the Koran itself from the nature of Gods speech to the human side of the life of the Prophet of Islam from jihad to crime and punishment from the Korans call to piety to the place of women in society from the magnificence of Gods creation to the insignificance of man The rationale of such an exploration should be rather obvious Although the state of the human mind that read the Koran some 1400 years ago may still be evidenced in many parts of the Muslim world most modern Muslims today will be mortally offended if someone were to tell him or her that their minds harked back to those ancient times To them it is impossible to ignore the epochal strides made in human knowledge and circumstance since Muhammad was first inspired to say Read

Hans Jonas's Ethic of Responsibility Theresa Morris, 2013-12-01 Articulates the fundamental importance of ontology to Hans Jonas's environmental ethics Despite his tremendous impact on the German Green Party and the influence of his work on contemporary debates about stem cell research in the United States Hans Jonas's 1903-1993 philosophical contributions have remained partially obscured In particular the ontological grounding he gives his ethics based on a phenomenological engagement with biology to bridge the is-ought gap has not been fully appreciated Theresa Morris provides a comprehensive overview and analysis of Jonas's philosophy that reveals the thread that runs through all of his thought including his work on the philosophy of biology ethics the philosophy of technology and bioethics She places Jonas's philosophy in context comparing his ideas to those of other ethical and environmental philosophers and demonstrating the relevance of his thought for our current ethical and environmental problems Crafting strong supporting arguments for Jonas's insightful view of ethics as a matter of both reason and emotion Morris convincingly lays out his account of the basis of our responsibilities not only to the biosphere but also to current and future generations of beings

Decolonial Heritage Aníbal Arregui, Gesa Mackenthun, Stephanie Wodianka, 2018 The volume attempts to triangulate three vibrant discourses of our times It combines postcolonial and decolonial readings of cultural conflicts with assessments of ecological dimensions of those conflicts as well as their significance within discourses on natural and cultural world heritage The examples from four continents range from the medieval Middle East already shaken by a convergence of ecological and social disaster to modern imaginary constructions of medieval Vikings the persistence of Indigenous knowledge in the Arctic literary poetics of patrimony and the heritage politics of Mediterranean urban architecture Authors ask which strategies societies in developing countries use to defend their cultural and ecological uniqueness and integrity while being penetrated by environmental hazards and hegemonizing Western forms of heritage culture or how western societies construct their own past in ways that are sometimes reminiscent of traditional imaginations of a pre-modern past petrified eternally in an ideal moment of time Colonial and historical forms of heritagization of human and non-human environments the essays show answer to pressing emotional needs for a sense of stability But the desire for nostalgia frequently commodified tends to collide with the similarly pressing need for political and economic survival in a rapidly

changing world and in the face of accelerating extraction practices Without being able to solve this dilemma the volume makes an interdisciplinary contribution to taking intellectual stake of the asymmetrical politics and poetics of heritage and collective cultural memory

Epistemology and Science Education Roger S. Taylor, Michel Ferrari, 2012-03-28 How is epistemology related to the issue of teaching science and evolution in the schools Addressing a flashpoint issue in our schools today this book explores core epistemological differences between proponents of intelligent design and evolutionary scientists as well as the critical role of epistemological beliefs in learning science Preeminent scholars in these areas report empirical research and or make a theoretical contribution with a particular emphasis on the controversy over whether intelligent design deserves to be considered a science alongside Darwinian evolution This pioneering book coordinates and provides a complete picture of the intersections in the study of evolution epistemology and science education in order to allow a deeper understanding of the intelligent design vs evolution controversy This is a very timely book for teachers and policy makers who are wrestling with issues of how to teach biology and evolution within a cultural context in which intelligent design has been and is likely to remain a challenge for the foreseeable future

Evolution Vs. Creationism Eugenie Carol Scott, 2005 Almost eighty years after the Scopes trial the debate over the teaching of evolution continues to rage There is no easy resolution it is a complex topic with profound scientific religious educational and legal implications How can a student or parent understand this issue which is such a vital part of education Evolution vs Creationism provides a badly needed comprehensive and balanced survey Written by one of the leading advocates for the teaching of evolution in the United states this accessible resource provides an introduction to the many facets of the current debate the scientific evidence for evolution the legal and educational basis for its teaching and the various religious points of view as well as a concise history of the evolution creationism controversy Each of the four sections of Evolution vs Creationism provides a resource that will assist the reader in better understanding these issues The first section addresses the nature of how evolution works as part of the scientific enterprise as well as a summary of the relationship between religious beliefs and science A section on the history of the controversy provides a handy synopsis of the lengthy struggles from before Darwin to the present day between advocates of creationism and the proponents of evolution A collection of primary source documents addressing cosmology law education and religious issues from all sides of the debate constitute the third section The book concludes with a selection of resources for further information for those who wish to study the topic in more depth

The Sewanee Review , 1899

Kant on Proper Science Hein van den Berg, 2013-10-08 This book provides a novel treatment of Immanuel Kant s views on proper natural science and biology The status of biology in Kant s system of science is often taken to be problematic By analyzing Kant s philosophy of biology in relation to his conception of proper science the present book determines Kant s views on the scientific status of biology Combining a broad ideengeschichtlich approach with a detailed historical reconstruction of philosophical and scientific texts the book establishes important interconnections between Kant s

philosophy of science his views on biology and his reception of late 18th century biological theories It discusses Kant's views on science and biology as articulated in his published writings and in the *Opus postumum* The book shows that although biology is a non mathematical science and the relation between biology and other natural sciences is not specified Kant did allow for the possibility of providing scientific explanations in biology and assigned biology a specific domain of investigation

Creationism began with the fossil record and there it shall end Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth creationism coupled to flood geology It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection Ever since Darwin geology has unequivocally supported evolution and not creationism and yet today Intelligent Design thrives in popular culture Here at last we have a definitive collection of world class geologists and paleontologists who systematically demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth A perfect companion to all science courses Michael Shermer publisher of *Skeptic* magazine and author of *Why Darwin Matters* An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of *The Counter Creationism Handbook*

Defending Science - within Reason Susan

Haack,2011-03-30 Sweeping in scope penetrating in analysis and generously illustrated with examples from the history of science this new and original approach to familiar questions about scientific evidence and method tackles vital questions about science and its place in society Avoiding the twin pitfalls of scientism and cynicism noted philosopher Susan Haack argues that fallible and flawed as they are the natural sciences have been among the most successful of human enterprises valuable not only for the vast interlocking body of knowledge they have discovered and not only for the technological advances that have improved our lives but as a manifestation of the human talent for inquiry at its imperfect but sometimes remarkable best This wide ranging trenchant and illuminating book explores the complexities of scientific evidence and the multifarious ways in which the sciences have refined and amplified the methods of everyday empirical inquiry articulates the ways in which the social sciences are like the natural sciences and the ways in which they are different disentangles the confusions of radical rhetoricians and cynical sociologists of science exposes the evasions of apologists for religious resistance to scientific advances weighs the benefits and the dangers of technology tracks the efforts of the legal system to make the best use of scientific testimony and tackles predictions of the eventual culmination or annihilation of the scientific enterprise Writing with verve and wry humor in a witty direct and accessible style Haack takes readers beyond the Science Wars to a balanced understanding of the value and the limitations of the scientific enterprise
