The Battle of the Atlantic and Signals Intelligence: U-Boat Tracking Papers, 1941-1947 David Syrett, 2002 Explore communications intelligence including the decryption of enemy radio messages and the location of German U boats by means of radio Communications intelligence was pivotal to the Allied conduct of naval operations during the Second World War The papers from the Public Record Office and the National Archives in this collection were written between 1941 and 1947 for the most part by a small group of American and British naval intelligence officers stationed at Bletchley Park near London and in Washington D C and responsible for the production and dissemination of intelligence obtained from the interception and analysis of radio transmissions made to and from

German U boats The documents have been selected with the objective of showing the functioning of the whole process of producing intelligence from obtaining processing and analysing the raw material of communications intelligence including radio direction finding D F bearings and decoded U boat radio messages through to the production of the information necessary to fight and defeat the U boats They thus provide an insider's view of the workings of communications intelligence during what became known as the Battle of the Atlantic
