used as actuators and sensors for such control strategies are also given an in depth description The reader will find particularly interesting the two chapters on the active control of sound radiation from structures active structural acoustic control The reason for controlling high frequency vibration is often to prevent sound radiation and the principles and practical application of such techniques are presented here for both plates and cylinders The volume is written in textbook style and is aimed at students practicing engineers and researchers Combines material from vibrations signal processing mechanics and controls Summarizes new research in the field
