Manuscript Verse Collectors and the Politics of Anti-Courtly Love Poetry Joshua Eckhardt,2009-05-21 This book reappraises the

work of early seventeenth century collectors of English Renaissance poetry in manuscript The verse miscellanies or poetry anthologies of these collectors have long attracted the attention of literary editors looking for texts by individual major authors and they have more recently interested historians for their poems on affairs of state called verse libels By contrast this book investigates the relationships that the compilers of miscellanies established between such presumably literary and political texts It focuses on two of the most popular and least printable literary genres that they collected libels and anti courtly love poetry a literary mode that the collectors of John Donne s poems played a major role in establishing They made Donne the most popular poet in manuscripts of the period and they demonstrated a special affinity for his most erotic or obscene poems such as To his Mistress going to bed and The Anagram Donne collectors also exhibited the similarities between these Ovidian love elegies and the sexually explicit or counter Petrarchan verse of other authors thereby organizing a literary genre opposed to the conventions of courtly love lyrics Furthermore collectors politicized this genre by relating examples of it to libels In so doing manuscript verse collectors demonstrated a type of literary and political activity distinct from that of authors stationers and readers Based on a thorough investigation of manuscript verse miscellanies the book appeals to scholars and students of early modern English literature and history Donne studies manuscript studies and the history of the book
