on stage in print and in the critical and editorial tradition pertaining to the period when rigorous scholars and teachers meet language characters or plotlines that exceed and at times entirely undermine the goals and premises of scholarly rigor Each suggests that a framing of putative stupidity pursued through lexicography editorial glossing literary criticism and pedagogical practice can help us put Shakespeare and semantically obscure historical literature more generally to new communal ends Words such as baffle in Twelfth Night or twangling and jingling in The Tempest and characters such as Sir Andrew Aguecheek and Holofernes the pedant might in the past have been considered unworthy of critical attention too light or obvious to matter much for our understanding of Shakespeare and his contemporaries Adam Zucker's meditation on the limits of learnedness and the opportunities presented by a philology of stupidity argues otherwise Nature Charlotte Scott, 2024-01-11 Shakespeare Nature sets new agendas for the study of nature in Shakespeare s work Offering a rich exploration of the intersections between the human and non human worlds the chapters focus on the contested and persuasive language of nature both as organic matter and cultural conditioning Rooted in close textual analysis and historical acuity this collection addresses Shakespeare's works through the many ways in which nature performs as a cultural category a moral marker and a set of essential conditions through which the human may pass as well as affect Addressing the complex conditions of the play worlds the chapters explore the assorted forms through which Shakespeare s nature makes sense of its narratives and supports upholds or contests its story telling Over the course of the collection the contributors examine plays including Macbeth Julius Caesar The Tempest The Taming of the Shrew Othello Love s Labour s Lost Hamlet Timon of Athens and many more They discuss them through the various lenses of philosophy historicism psychoanalysis gender studies cosmography geography sexuality linguistics environmentalism feminism and robotics to provide new and nuanced readings of the intersectional terms of both meaning and matter Approaching nature in all its multiplicity this collection sets out to examine the divergent and complex ways in which the human and non human worlds intersect and the development of a language of symbiosis that attempts to both control and create the terms of human authority It offers an entirely new approach to the subject of nature bringing together disparate methods that have previously been pursued independently to offer a shared investment in the intersections between the human and non human worlds and how these discourses shape and condition the emotional organic cultural and psychological landscapes of Comedy of errors.
