Proportion and Style in Ancient Egyptian Art Gay Robins, 2010-07-05 This study of ancient Egyptian art reveals the evolution of aesthetic approaches to proportion and style through the ages The painted and relief cut walls of ancient Egyptian tombs and temples record an amazing continuity of customs and beliefs over nearly 3 000 years Even the artistic style of the scenes seems unchanging but this appearance is deceptive In this work Gay Robins offers convincing evidence based on a study of Egyptian usage of grid systems and proportions that innovation and stylistic variation played a significant role in ancient Egyptian art Robins thoroughly explores the squared grid systems used by the ancient artists to proportion standing sitting and kneeling human figures This investigation yields the first chronological account of proportional variations in male and female figures from the Early Dynastic to the Ptolemaic periods Robins discusses the proportional changes underlying the revolutionary style instituted during the Amarna Period She also considers how the grid system influenced the overall composition of scenes Numerous line drawings with superimposed grids illustrate the text

Ancient Egyptian Portraiture Alessio Delli Castelli, 2024-12-09 Ancient Egyptian Portraiture History of an Idea concerns the origin nature and removal the unravelling and explanation of the impasse pertaining to the definition assessment and judgement of Ancient Egyptian portraiture

Condensed in the syntagm different from ours this impasse arises from the polarisation and dichotomy of idealism and realism which characterise the three main Egyptological definitions of portraiture In offering a transcendental definition of art and portraiture that is anthropologically valid the overarching aim of this book is to challenge assessments of Egyptian art and portraiture based on historically particularistic concepts that are foreign to its cultural premises and development
