Complex Networks V Pierluigi Contucci, Ronaldo Menezes, Andrea Omicini, Julia Ponce-Casasnovas, 2014-02-20 A network is a mathematical object consisting of a set of points that are connected to each other in some fashion by lines. It turns out this simple description corresponds to a bewildering array of systems in the real world ranging from technological ones such as the Internet and World Wide Web biological networks such as that of connections of the nervous systems food webs or protein interactions infrastructural systems such as networks of roads airports or the power grid to patterns of social and professional relationships such as friendship sex partners network of Hollywood actors co authorship networks and many more. Recent years have witnessed a substantial amount of interest within the scientific community in the properties of these networks. The emergence of the internet in particular coupled with the widespread availability of inexpensive computing resources has facilitated studies ranging from large scale empirical analysis of networks in the real world to the development of theoretical models and tools to explore the various properties of these systems. The study of networks is broadly interdisciplinary and central developments have occurred in many fields including mathematics physics computer and information sciences biology and the social sciences. This book brings together a collection of cutting edge research in the field from a diverse array of researchers ranging from physicists to social scientists and presents them in a coherent fashion highlighting the strong interconnections between the different areas. Topics included are social networks and social media opinion and innovation diffusion biological and health related networks language networks as well as network theory community detection or growth models for Complex Networks.
