Major Problems In Contemporary European Philosophy From Dilthey To Heidegger:

Major Problems in Contemporary European Philosophy, from Dilthey to Heidegger Ludwig Landgrebe, 1969

Major problems in contemporary European philosophy, from Dilthey to Heidegger, Translated from the German by Kurt F. Reinhardt Ludwig Landgrebe, **Heidegger, Dilthey, and the Crisis of Historicism** Charles R. Bambach, 2018-09-05

The collapse of historicism was not merely the demise of an academic tradition but signified a shift in the understanding of hermeneutics and metaphysics. Whereas earlier books have explored the rise and dominance of historicism within academic history, this is the first to trace its collapse and to show how it was shaped by larger philosophical and scientific concerns. Charles R. Bambach's lucid account of the demise of historicism within the context of German metaphysics provides a rich new perspective on the development of the young Heidegger's concept of historicity and on the origins of postmodern thought. Bambach reconstructs the methodological debates arising from a pervasive sense of crisis among German philosophers in the late nineteenth century. He details the divergent attempts by the Neo-Kantians, Nietzsche, and Dilthey to overcome the limitations of historical relativism. Heidegger's view of historicity, Bambach shows, radically transforms the problematic of historicism into a discourse concerning the crisis of philosophical modernity. *Heidegger and the Problem of Knowledge* Charles B. Guignon, 1983-01-01. What Guignon does very skillfully is to use the problem of knowledge as a focus for organizing a discussion of Heidegger's thought in its entirety. Places him squarely within the philosophical tradition he struggled to overcome and provides an account of his development from *Being and Time* to the last writings. **Cultural Transitions in the Middle East** Mardin, 2021-10-11. *Cultural Transitions in the Middle East* deals with the interlacing of themes constitutive of traditional cultures and world views in the Middle East with concepts and outlooks that have originated in the modern Western World. A number of Muslim thinkers who are indigenous products of the Middle East cultural setting have now begun to use some of the forms of modern Western literature and social thought. Conversely, some intellectuals trained in modern secular schools have attempted to reevaluate their Islamic heritage. The papers cover aspects of this subtle interpenetration which has not been explored to date. **The Anthem Companion to Pierre Bourdieu** Derek Robbins, 2016-08-05. *The Anthem Companion to Pierre Bourdieu* provides an introduction to the French sociologist's thought and an evaluation of the international significance of his work from a range of national perspectives. The contributions in the companion investigate the applicability of Bourdieu's theories and concepts in diverse sociopolitical contexts and consider the ways they can be said to possess universal validity. In examining Bourdieu on his own philosophical terms, this companion contributes to the general debate about the effects of the transnational and transcultural transfer of concepts generated in the West. **The Blackwell Dictionary of Modern Social Thought** William Outhwaite, 2008-04-15. *Modern social thought* ranges widely from the social sciences to philosophy, political theories and doctrines, cultural ideas and movements, and the influence of the natural sciences. Provides an authoritative overview of the main themes of social thought. Long essays and

entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text *Habermas* Stefan Müller-Doohm, 2016-09-22 Jürgen Habermas wrote the American philosopher Ronald Dworkin on the occasion of the great European thinker's eightieth birthday is not only the world's most famous living philosopher Even his fame is famous Now after many years of intensive research and in depth conversations with contemporaries colleagues and Habermas himself Stefan Müller-Doohm presents the first comprehensive biography of one of the most important public intellectuals of our time From his political and philosophical awakening in West Germany to the formative relationships with Adorno and Horkheimer Müller-Doohm masterfully traces the major forces that shaped Habermas's intellectual development He shows how Habermas's life and work were conditioned by the possibilities offered to his generation in the unique circumstances of regained freedom that characterized postwar Germany And yet Habermas's career is fascinating precisely because it amounts to more than a corpus of scholarly work however original and influential that may be For here is someone who continually left the protective space of the university in order to assume the role of a participant in controversial public debates from the significance of the Holocaust to the future of Europe and in this way sought to influence the development of social and political life in an arena much broader than the academy The significance and virtuosity of Habermas's many writings over the years are also fully and expertly documented ranging from his early work on the public sphere to his more recent writings on communicative action cosmopolitanism and the postnational condition What emerges from this biography is a vivid portrait of one of the great public intellectuals of our time a unique thinker who has made an immense and lasting philosophical contribution but who when he perceives that society is not living up to its potential for creating free and just conditions for all becomes one of its most rigorous and persistent critics **Human Life is Radical Reality** Howard Nelson Tuttle, 2005 The twenty first century needs a new paradigm for philosophy because both Anglo American and Continental philosophy have ended in analytic sterility and deconstructive nihilism They have ignored the radical reality of human life which all other realities must presuppose Three European philosophers in the twentieth century Dilthey Heidegger and Ortega y Gasset began to develop this idea but never before has it been systematically conceptualized and adequately expounded With reference to the works of these philosophers this book examines the major categories and essential properties of human life as it is lived for example in time circumstance history and understanding Iranian Intellectuals and the West Mehrzad Boroujerdi, 1996-12-01 These intellectuals both religious and secular appropriated Islam as the vehicle through which they could most effectively challenge or accommodate modernity and Westernization Through such a fitting appropriation Boroujerdi asserts could modern Iranian thinkers lay the foundation for a nativist vision of an unsullied culture seemingly free of Western influence
