Major Achievements Of Science Volume 2:

The Major Achievements of Science Arthur Edward Ellard McKenzie, 1960 The Cambridge History of Science: Volume 2, Medieval Science David C. Lindberg, Michael H. Shank, 2013-10-07 This volume in the highly respected Cambridge History of Science series is devoted to the history of science in the Middle Ages from the North Atlantic to the Indus Valley. Medieval science was once universally dismissed as non-existent and sometimes it still is. This volume reveals the diversity of goals, contexts, and accomplishments in the study of nature during the Middle Ages. Organized by topic and culture, its essays by distinguished scholars offer the most comprehensive and up-to-date history of medieval science currently available. Intended to provide a balanced and inclusive treatment of the medieval world, contributors consider scientific learning and advancement in the cultures associated with the Arabic, Greek, Latin, and Hebrew languages. Scientists, historians, and other curious readers will all gain a new appreciation for the study of nature during an era that is often misunderstood. **The Major Achievements of Science School Edition** A. E. E. McKenzie, 1960-01 Science and Technology Policy - Volume II Rigas Arvanitis, 2009-07-20 Science and Technology Policy theme is a component of Encyclopedia of Technology, Information, and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. Science and technology policy covers all the public sector measures designed for the creation, funding, support, and mobilization of scientific and technological resources. The content of the Theme on Science and Technology Policy provides the essential aspects and a myriad of issues of great relevance to our world, such as Science and Technology Policy, International Dimensions of Science and Technology Policy, The Innovation System, The Policy-Making Process in Science and Technology, Regional Perspectives, A New Scenario for Science and Technology Policies in the Developed and Developing World. These two volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel, and Policy analysts, managers, and decision makers, and NGOs. Haunting Ecologies Ursula Kluwick, 2024-06-18 Victorians' views of water and its role in how the social fabric of Victorian Britain was imagined. Water matters like few other substances in people's daily lives. In the nineteenth century, it left its traces on politics, urban reform, and societal divisions, as well as on conceptualizations of gender roles. Drawing on the methodology of material ecocriticism, Ursula Kluwick's *Haunting Ecologies* argues that Victorian Britons were keenly aware of aquatic agency, recognizing water as an active force with the ability to infiltrate bodies and spaces. Kluwick reads works by canonical writers such as Braddon, Dickens, Stoker, and George Eliot alongside sanitary reform discourse, court cases, journalistic articles, satirical cartoons, technical drawings, paintings, and maps. This wide-ranging study sheds new light on Victorian-era anxieties about water contamination, as well as on how certain wet landscapes, such as sewers, rivers, and marshes, became associated with moral corruption and crime. Applying ideas from the field of blue humanities to nineteenth-century texts, *Haunting Ecologies* argues for the relevance of realism as an Anthropocene form. **Adaptation and**
