Overend, Biomass Conference of the Americas, 1997 Bioenergy Options for a Cleaner Environment: in Developed and Developing Countries Ralph E.H. Sims, 2003-12-08 Bioenergy Options for a Cleaner Environment describes the biomass resource and its delivery A panel of international experts describe the range of conversion technologies both commercially available and under development and explore the technical environmental and socio economic barriers and benefits of using biomass in both developed and developing countries Covers a number of perspectives taking the reader through the whole process from the bioenergy resource through conversion to fuel to policy issues World class Editor and contributors Accessible and useful to those working in agriculture forestry and planning as well as energy researchers

Biofuels from Agricultural Wastes and Byproducts Hans P. Blaschek, Thaddeus C. Ezeji, Jürgen Scheffran, 2016-06-14 Traditional agriculture and emerging biofuels technology produce a number of wastes and by products ranging from corn fiber and glycerin to animal manure that have the potential to serve as the basis for additional sources of bioenergy that includes both liquid biofuels and biogas Biofuels from Agricultural Wastes and Byproducts is the first book to focus solely on the production of biofuels primarily from agricultural waste and by products The book is divided roughly into two sections The first section looks at liquid biofuel production from agricultural byproducts densification of agricultural residues and the delivery from farm to processing plant of waste and byproducts for use in biofuel production The second section focuses on anaerobic digestion of food and animal wastes microbial diversity molecular and biochemical aspects of methanogenesis Together these sections solidify Biofuels from Agricultural Wastes and Byproducts as a definitive source of information on the use of agricultural waste and by products in biofuel production Gasification Technologies John Rezaian, Nicholas P. Cheremisinoff, 2005-04-08 In contrast to traditional combustion gasification technologies offer the potential for converting coal and low or negative value feedstocks such as petroleum coke and various waste materials into usable energy sources or chemicals With a growing number of companies operating and marketing systems based on gasification concepts worldwide this b Chemical Energy from Natural and Synthetic Gas Yatish T. Shah, 2017-03-16 Commercial development of energy from renewables and nuclear is critical to long term industry and environmental goals However it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures Gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil nuclear and renewable energies Chemical Energy from Natural and Synthetic Gas illustrates this point by examining the many roles of natural and synthetic gas in the energy and fuel industry addressing it as both a transition and end game fuel The book describes various types of gaseous fuels and how are they are recovered purified and converted to liquid fuels and electricity generation and

used for other static and mobile applications It emphasizes methane syngas and hydrogen as fuels although other volatile hydrocarbons are considered It also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas The book also deals applications such as the use of natural gas in power production in power plants engines turbines and vehicle needs Presents a unified and collective look at gas in the energy and fuel industry addressing it as both a transition and end game fuel Emphasizes methane syngas and hydrogen as fuels Covers gas storage and transport infrastructure Discusses thermal gasification gas reforming processing purification and upgrading Describes biogas and bio hydrogen production Deals with the use of natural gas in power production in power plants engines turbines and vehicle needs **Biotechnology for Fuels and Chemicals** William S.
