Clocks of New York Chris DeSantis, Vinit Parmar, 2011-02-28 The phrase in a New York minute is virtually synonymous with all that is fast paced and technologically advanced One of the first cities founded on the eastern seaboard New York has been a horological trendsetter for almost four hundred years When the first Dutch settlers came to Manhattan in the early years of the 17th century they established America's first stronghold of capitalism Over the next few centuries precise schedules became an inescapable reality of modernization and precision timepieces became an art form in Europe and America As the center of commercial and industrial activity New York City developed a particular preoccupation with time and hence became a showplace for an astonishing array of timepieces From tower clocks to time balls this richly illustrated work chronicles the history of public clocks in New York City It discusses the premiere clock makers of the 19th century such as the Ansonia Clock Company and the Self Winding Clock Company the heyday of American public clock making and the ever increasing importance of clocks Post clocks church clocks sundials and labor timepieces are all discussed herein Photographs of subject pieces and an index are included [Fast, Fun & Easy Creative Fabric Clocks](#) Lynn

Koolish, 2007-04-01 It's About Time to Create a Clock Stitched shaped layered and decorated you've never seen clocks like these Time flies when you make one of these fun clocks Accent any room with working clocks made from fabric paper quilt blocks photo transfer buttons trims and memorabilia Helpful resource list makes it easy to find everything you need It's easy to forget that these fun projects are functional as well as decorative 6 different projects plus inspiration from guest artists will have you designing your own in a matter of minutes A resource list is included for clock materials movements and embellishments Make it quicker with fast2fuse Double Sided Fusible Stiff Interfacing *Making Time* Yulia Frumer, 2018-01-19 What is time made of We might balk at such a question and reply that time is not made of anything it is an abstract and universal phenomenon In *Making Time* Yulia Frumer upends this assumption using changes in the conceptualization of time in Japan to show that humans perceive time as constructed and concrete In the mid sixteenth century when the first mechanical clocks arrived in Japan from Europe the Japanese found them interesting but useless because they failed to display time in units that changed their length with the seasons as was customary in Japan at the time In 1873 however the Japanese government adopted the Western equal hour system as well as Western clocks Given that Japan carried out this reform during a period of rapid industrial development it would be easy to assume that time consciousness is inherent to the equal hour system and a modern lifestyle but *Making Time* suggests that punctuality and time consciousness are equally possible in a society regulated by a variable hour system arguing that this reform occurred because the equal hour system better reflected a new conception of time as abstract and universal which had been developed in Japan by a narrow circle of astronomers who began seeing time differently as a result of their measurement and

calculation practices Over the course of a few short decades this new way of conceptualizing time spread gradually becoming the only recognized way of treating time **The Making of America** Robert Marion La Follette,1906 Beautiful Antique Clocks from Around the World - Descriptions, Stories, and the History of These Beautiful Clocks Anon,2013-04-16 This vintage book comprises a guide to some of the world s most beautiful antique clocks complete with detailed descriptions interesting stories and comments on the history of these wonderful pieces An interesting and informative guide this book will appeal to those with a keen interest in historical clocks of note and it is a book not to be missed by the discerning collector The chapters of this volume include Curious Griffin Clock Water Clock Frankfort Clock James I s Clockmakers Clock a Surname Dutch Musical Clock Foreign Clockmakers in London Charles I charters the Clockmakers Company Early History of the Company Clock of St Margaret s Westminster Clock at Augsburg Clock in London Pageant etcetera We are republishing this vintage book now in an affordable modern edition complete with a specially commissioned new introduction on the history of clocks and watches **Electrical Review and Western Electrician with which is Consolidated Electrocraft** ,1916 *A Rudimentary Treatise on Clocks and Watches and Bells* Edmund Beckett Baron Grimthorpe,1883
