Will College Pay Off? Peter Cappelli, 2015-06-09 The decision of whether to go to college or where is hampered by poor information and inadequate understanding of the financial risk involved Adding to the confusion the same degree can cost dramatically different amounts for different people A barrage of advertising offers new degrees designed to lead to specific jobs but we see no information on whether graduates ever get those jobs Mix in a frenzied applications process and pressure from politicians for relevant programs and there is an urgent need to separate myth from reality Peter Cappelli an acclaimed expert in employment trends the workforce and education provides hard evidence that counters conventional wisdom and helps us make cost-effective choices Among the issues Cappelli analyzes are What is the real link between a college degree and a job that enables you to pay off the cost of college especially in a market that is in constant change Why it may be a mistake to pursue degrees that will land you the hottest jobs because what is hot today is unlikely to be so by the time you graduate Why the most expensive colleges may actually be the cheapest because of their ability to graduate students on time How parents and students can find out what different colleges actually deliver to students and whether it is something that employers really want College is the biggest expense for many families larger even than the cost of the family home and one that can bankrupt students and their parents if it works out poorly Peter Cappelli offers vital insight for parents and students to make decisions that both make sense financially and provide the foundation that will help students make their way in the world

Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty

repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially
